

Standard Specification for General-Purpose, Heavy-Duty, and Extra-Heavy-Duty Crosslinked Chlorinated Polyethylene (CM) Jackets For Wire and Cable¹

This standard is issued under the fixed designation D4313; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification covers crosslinked chlorinated polyethylene (CM) compounds suitable for use as outer coverings or jackets on electrical cables for general-purpose, heavy-duty, and extra-heavy-duty service.

1.2 These jacket materials are not recommended for use on cables which are to be installed at a temperature less than -25°C .

1.3 The values stated in inch-pound units are to be regarded as standard. The values given in parentheses are mathematical conversions to SI units that are provided for information only and are not considered standard.

[D1711 Terminology Relating to Electrical Insulation](#)

¹ This specification is under the jurisdiction of ASTM Committee D09 on Electrical and Electronic Insulating Materials and is the direct responsibility of Subcommittee D09.18 on Solid Insulations, Non-Metallic Shieldings and Coverings for Electrical and Telecommunication Wires and Cables.

Current edition approved Jan. 1, 2012. Published February 2012. Originally approved in 1987. Last previous edition approved in 2010 as D4313 – 03(2010). DOI: 10.1520/D4313-12.

3. Terminology

3.1 *Definitions:* For definitions of terms used in this specification refer to Terminology [D1711](#).

3.2 Definitions of Terms Specific to This Standard:

3.2.1 *aging (act of), n*—exposure of materials to air at a temperature of 121°C for 168 h and oil at 121°C for 18 h.

4. Physical Properties

4.1 Crosslinked jackets shall conform to the requirements for physical properties specified in [Table 1](#).

5. Sunlight and Weather Resistance Requirements

5.1 If sunlight and weather resistance are required of the crosslinked jackets, the jackets shall conform to the requirements specified in [Table 2](#).

6. Sampling

6.1 Sample the jacket in accordance with Test Methods [D470](#).

7. Test Methods

7.1 Test the jacket in accordance with Test Methods [D470](#). If the sunlight and weather resistance test is required, perform it in accordance with Practice [D1499](#) and Practice [G153](#).

8. Keywords

8.1 chlorinated polyethylene; crosslinked; oil immersion; sunlight resistance; tear; tensile strength; tensile stress; tension test; weather resistance

TABLE 1 Physical Properties for CM Jacket

	General-Purpose	Heavy-Duty	Extra-Heavy-Duty
<i>Physical Requirements (Original):</i>			
Tensile strength, min, psi (MPa)	1200 (8.3)	1800 (12.4)	2400 (16.5)
Tensile stress at 200 % elongation, min, psi (MPa)	...	500 (3.4)	700 (4.8)
Elongation at rupture, min, %	200	300	300
Tension set, max, %	35	30	30
<i>Physical Requirements [After aging in an air oven at 121 ± 1°C for 168 h]:</i>			
Tensile strength, min, % of original	75	85	70
Elongation at rupture, min, % of original	50	55	55
<i>Physical Requirements [After oil immersion at 121°C for 18 h]:</i>			
Tensile strength, min, % of original	60	60	60
Elongation at rupture, min, % of original	60	60	60

TABLE 2 Sunlight and Weather Resistance Requirements

	min,% Original Value
After 720 h in a dual carbon-arc apparatus:	
Tensile Strength	80
Elongation	80

ASTM International takes no position respecting the validity of any patent rights asserted in connection with any item mentioned in this standard. Users of this standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, are entirely their own responsibility.

This standard is subject to revision at any time by the responsible technical committee and must be reviewed every five years and if not revised, either reapproved or withdrawn. Your comments are invited either for revision of this standard or for additional standards and should be addressed to ASTM International Headquarters. Your comments will receive careful consideration at a meeting of the responsible technical committee, which you may attend. If you feel that your comments have not received a fair hearing you should make your views known to the ASTM Committee on Standards, at the address shown below.
