

Standard Specification for Color Coding of Laboratory Pipets with Multiple Graduations, 0.1 mL and Larger, But Excluding Disposable Prothrombin and Disposable Micropipets¹

This standard is issued under the fixed designation E1380; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

1. Scope

1.1 This specification provides a system for color coding disposable pipets (glass and plastic) with multiple graduations. The color will indicate capacity and subdivisions for identification purposes.

1.2 The intent of this specification is to ensure that when color coding is utilized, all manufacturers will be encouraged to use the same color for nominal value identification.

1.3 The values stated in SI units are to be regarded as standard. No other units of measurement are included in this standard.

2.1 *ASTM Standards*:²

E1273 Specification for Color Coding of Reusable Laboratory Pipets

3. General Requirements

3.1 Colors shall be as specified in **Table 1**.

3.2 *Durability*—Disposable pipet coding shall be as durable as the graduations of the pipet. (Any institution or individual

¹ This specification is under the jurisdiction of ASTM Committee E41 on Laboratory Apparatus and is the direct responsibility of Subcommittee E41.01 on Laboratory Ware and Supplies.

Current edition approved June 1, 2015. Published July 2015. Originally approved in 1990. Last previous edition approved in 2010 as E1380 – 90 (2010). DOI: 10.1520/E1380-90R15.

who reuses a disposable product must bear full responsibility for its safety and effectiveness).

4. Style

4.1 Each pipet may be color coded by one or more of the following methods:

4.1.1 A single or double color band. The single color band shall be 6 to 10 mm wide and the double color bands shall be 3 to 5 mm wide and separated by a clear space of 2 to 3 mm. Color bands need not be continuous, but may be broken as long as 40 % of the circumference of the pipet is covered.

4.1.2 Colored plugging material.

4.1.3 Permanent color constituent (ingredient) of the pipet material(s).

4.1.4 Coloring of the standard identification marking(s) of the pipet.

4.2 A color blow out band or bands shall not be the only method used to signify size.

4.3 *Location*—Color coding shall be near the top end of the pipet. In the instances where a separate band or bands are utilized to indicate “blow-out” or “blow-out” style pipets, there shall be a distinct separation with the blow out band or bands in the upper most position.

4.4 *Color Code Packaging*—If color coding is used in packaging graphics, then the color will be the same as in **Table 1**.

5. Keywords

5.1 colorcoding; disposable; graduated; pipets

TABLE 1 Color Coding

NOTE 1—The above mentioned color codes are consistent with Specification E1273.

Nominal Volume mL	Sub-division mL	Color Code
0.1	0.001	2 green
	0.005	1 red
	0.01	1 white
	0.05	2 orange
0.125	0.0125	2 yellow
0.2	0.001	2 blue
	0.002	2 white
	0.01	1 black
	0.1	1 orange
0.5	0.005	1 green
	0.01	2 yellow
	0.02	2 red
	0.05	2 black
	0.25	2 green
1	0.01	1 yellow
	0.05	2 green
	0.1	1 red
1.1	0.5, 1.0, 1.1	1 purple
1.5	0.01	2 red
2	0.01	2 white
	0.02	1 black
	0.05	2 orange
	0.1	1 green
2.2	1.0, 2.0, 2.1, 2.2	1 black
3	0.01	2 blue
5	0.05	1 red
	0.1	1 blue
10	0.1	1 orange
	0.2	2 orange
15	0.1	2 green
20	0.1	2 yellow
25	0.1	1 white
	0.2	1 green
	0.1	2 orange
50	0.2	1 black
	0.5	1 purple
	0.2	1 red
100	0.2	1 red

ASTM International takes no position respecting the validity of any patent rights asserted in connection with any item mentioned in this standard. Users of this standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, are entirely their own responsibility.

This standard is subject to revision at any time by the responsible technical committee and must be reviewed every five years and if not revised, either reapproved or withdrawn. Your comments are invited either for revision of this standard or for additional standards and should be addressed to ASTM International Headquarters. Your comments will receive careful consideration at a meeting of the responsible technical committee, which you may attend. If you feel that your comments have not received a fair hearing you should make your views known to the ASTM Committee on Standards, at the address shown below.
