

Standard Performance Specification for Tipover Restraint(s) Used with Clothing Storage Unit(s)¹

This standard is issued under the fixed designation F3096; the number immediately following the designation indicates the year of original adoption or, in the case of revision, the year of last revision. A number in parentheses indicates the year of last reapproval. A superscript epsilon (ϵ) indicates an editorial change since the last revision or reapproval.

INTRODUCTION

This is a requirement for tipover restraints used on clothing storage units as defined in Specification [F2057](#).

1. Scope

1.1 This safety specification is intended to define the test method and other requirements for tipover restraints as required in Specification [F2057](#).

1.2 This specification assesses the strength of the tipover restraint only, and does not address the in situ performance of the tipover restraint.

1.3 The values stated in inch-pounds units are to be regarded as standard. The values given in parentheses are mathematical conversions to SI units that are provided for information only and are not considered standard.

1.4 The following safety hazard caveat pertains only to the test procedure portion, Section 4, of this safety specification. *This standard does not purport to address all of the safety concerns, if any, associated with its use. It is the responsibility of the user of this standard to establish appropriate safety and health practices and determine the applicability of regulatory limitations prior to use.*

3. Terminology

3.1 *Definitions of Terms Specific to This Standard*:

3.1.1 *clothing storage unit, n*—furniture item intended for the storage of clothing typical of bedroom furniture.

¹ This specification is under the jurisdiction of ASTM Committee F15 on Consumer Products and is the direct responsibility of Subcommittee F15.42 on Furniture Safety.

Current edition approved Oct. 1, 2014. Published October 2014. DOI: 10.1520/F3096-14.

² For referenced ASTM standards, visit the ASTM website, www.astm.org, or contact ASTM Customer Service at service@astm.org. For *Annual Book of ASTM Standards* volume information, refer to the standard's Document Summary page on the ASTM website.

3.1.2 *installation instructions, n*—detailed diagram and written description of the proper installation of tipover restraint.

3.1.3 *manufacturer, n*—organization or company that makes or consolidates the tipover restraint component parts and installation instructions.

3.1.4 *tipover restraint, n*—supplemental device that aids in the prevention of tipover.

4. Test Method

4.1 Assemble tipover restraint components including provided fasteners in accordance with manufacturer's instructions.

4.2 Rigidly suspend the assembly by securing one end of the tipover restraint by gripping directly, or attaching to a fixed structure (for example, wooden block). See [Fig. 1](#) for test method examples for commonly used tipover restraints.

4.3 Attach a loading device to the fastener(s) on the opposite end of restraint.

4.4 Gradually, over a period of not less than 2 s nor greater than 15 s, apply the static load of 50 lb (23 kg)³ and maintain for an additional 30 s.

4.5 If the fastener(s) become unattached from the test structure (wood block or fixed structure) in such a way that it prohibits the completion of the test, then the fastener(s) are to be reattached using whatever means possible without affecting the test results of the assembly.

5. Instructional Literature

5.1 Installation instructions shall include at a minimum the following:

5.1.1 Illustration showing installation method.

5.1.2 Detailed written instructions with step by step instructions on how to properly attach the tipover restraint.

5.1.3 Parts list including illustrations.

³ The total weight of 50 lb is equal to the 95th percentile 5 year old child.

FIG. 1 Test Method Examples

5.2 Clear and complete installation instructions for the tipover restraint shall be included.

6.1.2 Date of manufacture (capable of identifying at a minimum the month and year of manufacture).

6. Labeling Requirements

7. Keywords

6.1 The following information shall be provided with each tipover restraint:

7.1 clothing storage unit; fasteners; force; manufacturer; parts; tipover restraint

6.1.1 Manufacturer’s name and address.

ASTM International takes no position respecting the validity of any patent rights asserted in connection with any item mentioned in this standard. Users of this standard are expressly advised that determination of the validity of any such patent rights, and the risk of infringement of such rights, are entirely their own responsibility.

This standard is subject to revision at any time by the responsible technical committee and must be reviewed every five years and if not revised, either reapproved or withdrawn. Your comments are invited either for revision of this standard or for additional standards and should be addressed to ASTM International Headquarters. Your comments will receive careful consideration at a meeting of the responsible technical committee, which you may attend. If you feel that your comments have not received a fair hearing you should make your views known to the ASTM Committee on Standards, at the address shown below.
