BRITISH STANDARD

BS EN ISO 3977-5:2003
Incorporating Amendment No. 1 (renumbers BS ISO 3977-5:2001 as BS EN ISO 3977-5:2003)

Gas turbines — Procurement —

Part 5: Applications for petroleum and natural gas industries

The European Standards EN ISO 3977-5:2003 has the status of a British Standard

ICS 27.040; 75.180.10; 75.180.20

Confirmed October 2008

BSI British Standards

National foreword

This British Standard is the official English language version of EN ISO 3977-5:2003. It is identical with ISO 3977-5:2001.

The UK participation in its preparation was entrusted to Technical Committee MCE/16, Gas turbines, which has the responsibility to:

— aid enquirers to understand the text;

— present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;

— monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the *BSI Catalogue* under the section entitled "International Standards Correspondence Index", or by using the "Search" facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the EN ISO title page, the EN ISO foreword page, the ISO title page, pages ii and iv, pages 1 to 4, an inside back cover and a back cover.

The BSI copyright date displayed in this document indicates when the document was last issued.

This British Standard, having been prepared under the direction of the Engineering Sector Policy and Strategy Committee was published under the authority of the Standards Policy and Strategy Committee on 6 March 2002

Gas turbines - Procurement - Part 5: Applications for petroleum and natural gas industries (ISO 3977-5:2001)

Turbines à gaz - Spécifications pour l'acquisition - Partie 5: Applications pour les industries du pétrole et du gaz naturel (ISO 3977-5:2001)

Gasturbinen - Beschaffung - Teil 5: Anwendungen in der Erdöl- und Erdgasindustrie (ISO 3977-5:2001)

This European Standard was approved by CEN on 18 December 2002.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Slovak Republic, Spain, Sweden, Switzerland and United Kingdom.

Ref. No. EN ISO 3977-5:2003 E

Foreword

The text of ISO 3977-5:2001 has been prepared by Technical Committee ISO/TC 192, Gas turbines, of the International Organization for Standardization (ISO) and has been taken over as EN ISO 3977-5:2003 by Technical Committee CEN/TC 12, Materials, equipment and offshore structures for petroleum and natural gas industries, the Secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by August 2003, and conflicting national standards shall be withdrawn at the latest by August 2003.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Luxembourg, Malta, Netherlands, Norway, Portugal, Slovakia, Spain, Sweden, Switzerland and the United Kingdom.

Endorsement notice

The text of ISO 3977-5:2001 has been approved by CEN as EN ISO 3977-5:2003 without any modifications.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 3.

Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this part of ISO 3977 may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

International Standard ISO 3977-5 was prepared by Technical Committee ISO/TC 192, *Gas turbines*, in collaboration with Technical Committee ISO/TC 67, *Materials, equipment and offshore structures for petroleum and natural gas industries*, Subcommittee SC 6, *Processing equipment and systems*. Documents taken into account in the development of ISO 3977 include API STD 616, API RP 11PGT and the ASME B133 series of documents.

ISO 3977 consists of the following parts, under the general title *Gas turbines — Procurement*:

— *Part 1: General introduction and definitions*

— *Part 2: Standard reference conditions and ratings*

— *Part 3: Design requirements*

— *Part 4: Fuels and environment*

— *Part 5: Applications for petroleum and natural gas industries*

— *Part 6: Combined cycles*

— *Part 7: Technical information*

— *Part 8: Inspection, testing, installation and commissioning*

— *Part 9: Reliability, availability, maintainability and safety*

Introduction

Users of this part of ISO 3977 should be aware that further or differing requirements may be needed for individual applications. This part of ISO 3977 is not intended to inhibit a packager from offering, or the purchaser from accepting, alternative equipment or engineering solutions for the individual application. This may be particularly applicable where there is innovative or developing technology. Where an alternative is offered, the packager should identify any variations from this part of ISO 3977 and provide details.

Gas turbines — Procurement —

Part 5:
Applications for petroleum and natural gas industries

1 Scope

This part of ISO 3977 specifies requirements and gives recommendations for the design, materials, fabrication, inspection, testing and preparation for shipment of packaged gas turbines for use in drilling, production, refining and the transport by pipelines of petroleum and natural gas. It is applicable to the procurement of gas turbines and gas turbine systems, including gas turbines for combined cycle systems, and their auxiliaries by a purchaser from a packager.

This part of ISO 3977 is not intended to deal with local or national legislative requirements to which the installation may be required to conform.

2 Normative references

The following normative documents contain provisions which, through reference in this text, constitute provisions of this part of ISO 3977. For dated references, subsequent amendments to, or revisions of, any of these publications do not apply. However, parties to agreements based on this part of ISO 3977 are encouraged to investigate the possibility of applying the most recent editions of the normative documents indicated below. For undated references, the latest edition of the normative document referred to applies. Members of ISO and IEC maintain registers of currently valid International Standards.

ISO 3977-1, *Gas turbines — Procurement — Part 1: General introduction and definitions*

ISO 3977-2, *Gas turbines — Procurement — Part 2: Standard reference conditions and ratings*

ISO 3977-3, *Gas turbines — Procurement — Part 3: Design requirements*

ISO 3977-4, *Gas turbines — Procurement — Part 4: Fuels and environment*

ISO 3977-7, *Gas turbines — Procurement — Part 7: Technical information*

ISO 3977-8, *Gas turbines — Procurement — Part 8: Inspection, testing, installation and commissioning*

ISO 3977-9, *Gas turbines — Procurement — Part 9: Reliability, availability, maintainability and safety*

ISO 11086, *Gas turbines — Vocabulary*

3 Terms and definitions

For the purposes of this part of ISO 3977, the terms and definitions given in ISO 11086, ISO 3977-1, ISO 3977-3, ISO 3977-4, ISO 3977-8 and ISO 3977-9 apply.

4 Requirements for gas turbines for the petroleum and natural gas industries

4.1 Reference conditions and ratings

Standard reference conditions for gas turbines shall be as defined in ISO 3977-2.

The packager shall declare standard ratings associated with the operational modes defined in ISO 3977-2. The packager shall also declare the site power rating as specified in ISO 3977-2, for the specified site conditions of the installation and operating modes under which the plant is intended to run in service.

4.2 Design requirements

4.2.1 Basic requirements

The minimum basic requirements for the procurement of gas turbines and gas turbine systems are specified in ISO 3977-3. ISO 3977-3 also provides assistance and technical information to be used in the procurement.

The purchaser shall provide site condition data and shall specify the package site specific operating point(s) on data sheets in accordance with ISO 3977-3.

The packager shall review and comment the purchaser's piping, ducting and foundation drawings as specified in ISO 3977-3.

Operational requirements shall be in accordance with ISO 3977-3.

Service requirements shall be in accordance with ISO 3977-3.

Rotating equipment requirements shall be in accordance with ISO 3977-3.

Other equipment requirements shall be in accordance with ISO 3977-3.

Vibrations and dynamics shall be in accordance with ISO 3977-3.

4.2.2 Packaging and auxiliary equipment

Packaging and auxiliary equipment shall be in accordance with ISO 3977-3.

The packager shall provide, as a minimum, the equipment in ISO 3977-3 listed as the minimum to be provided as the package. Any other equipment required shall be as specified by the purchaser and shall be included in the packager's scope of supply. This equipment shall be assembled (packaged) to the maximum extent practical.

Auxiliary equipment may include

a) starting systems,

b) mounting systems,

c) enclosure and fire protection,

d) air inlet systems,

e) piping,

f) oil systems,

g) fuel system,

h) electrical systems,

i) exhaust system,

j) driven equipment (compressor, pump, generator), and

k) seal system for the above.

4.2.3 Control and instrumentation

Control and protection systems, and associated instrumentation, shall be in accordance with ISO 3977-3. Consideration shall be given to starting, loading and shutdown.

Provisions for ventilation and purging shall be in accordance with ISO 3977-3.

Fuel control, governing and limiting, and emission control shall be in accordance with ISO 3977-3.

Overspeed protection and protection systems shall be in accordance with ISO 3977-3.

Compressor wash systems shall be in accordance with ISO 3977-3.

Considerations for the control system shall be in accordance with ISO 3977-3.

Control panel installation shall be in accordance with ISO 3977-3.

Operability and diagnostics shall be in accordance with ISO 3977-3.

Data communications shall be in accordance with ISO 3977-3.

4.3 Fuels and environment

The responsibilities of the purchaser and of the packager with respect to the fuels and the relationship to the procurement of a gas turbine system shall be in accordance with ISO 3977-4.

4.4 Technical information

The information to be submitted during the proposal and contract stages of a project covering the packager's scope of supply is defined in ISO 3977-7.

The purchaser shall complete the data sheets and Packager Documentation Requirements from ISO 3977-7. The purchaser shall specify the performance data needed for the specific application in accordance with ISO 3977-7.

The packager shall provide the Proposal and the Contract Documentation in accordance with ISO 3977-7.

4.5 Inspection, testing, installation and commissioning

Inspection, testing, installation and commissioning shall be in accordance with ISO 3977-8. ISO 3977-8 states the principles for systems and procedures to assure the integrity of the packager's products and services, and also outlines the responsibilities between the purchaser and the packager.

Preparation for storage and shipment shall be in accordance with ISO 3977-8.

4.6 Reliability, availability, maintainability and safety

Exchange of information about reliability, availability, maintainability and safety between gas turbine manufacturers, packagers, purchasers, users, consultants, regulatory bodies and others shall be in accordance with ISO 3977-9.

BSI — British Standards Institution

BSI is the independent national body responsible for preparing British Standards. It presents the UK view on standards in Europe and at the international level. It is incorporated by Royal Charter.

Revisions

British Standards are updated by amendment or revision. Users of British Standards should make sure that they possess the latest amendments or editions.

It is the constant aim of BSI to improve the quality of our products and services. We would be grateful if anyone finding an inaccuracy or ambiguity while using this British Standard would inform the Secretary of the technical committee responsible, the identity of which can be found on the inside front cover. Tel: +44 (0)20 8996 9000. Fax: +44 (0)20 8996 7400.

BSI offers members an individual updating service called PLUS which ensures that subscribers automatically receive the latest editions of standards.

Buying standards

Orders for all BSI, international and foreign standards publications should be addressed to Customer Services. Tel: +44 (0)20 8996 9001. Fax: +44 (0)20 8996 7001. Email: orders@bsi-global.com. Standards are also available from the BSI website at http://www.bsi-global.com.

In response to orders for international standards, it is BSI policy to supply the BSI implementation of those that have been published as British Standards, unless otherwise requested.

Information on standards

BSI provides a wide range of information on national, European and international standards through its Library and its Technical Help to Exporters Service. Various BSI electronic information services are also available which give details on all its products and services. Contact the Information Centre. Tel: +44 (0)20 8996 7111. Fax: +44 (0)20 8996 7048. Email: info@bsi-global.com.

Subscribing members of BSI are kept up to date with standards developments and receive substantial discounts on the purchase price of standards. For details of these and other benefits contact Membership Administration. Tel: +44 (0)20 8996 7002. Fax: +44 (0)20 8996 7001. Email: membership@bsi-global.com.

Information regarding online access to British Standards via British Standards Online can be found at http://www.bsi-global.com/bsonline.

Further information about BSI is available on the BSI website at http://www.bsi-global.com.
