BSI Standards Publication

Geosynthetics

Part 2: Symbols and pictograms (ISO 10318-2:2015)

bsi.

...making excellence a habit.™

National foreword

This British Standard is the UK implementation of EN ISO 10318-2:2015. Together with BS EN ISO 10318-1:2015, it supersedes BS EN ISO 10318:2005 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee B/553, Geotextiles and geomembranes.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

ISBN 978 0 580 75354 1

ICS 01.080.99; 59.080.70

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 30 April 2015.

Supersedes EN ISO 10318:2005

English Version

Geosynthetics - Part 2: Symbols and pictograms (ISO 10318-2:2015)

Géosynthétiques - Partie 2: Symboles et pictogrammes (ISO 10318-2:2015)

Geokunststoffe - Symbole und Piktogramme (ISO 10318-2:2015)

This European Standard was approved by CEN on 24 January 2015.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

Ref. No. EN ISO 10318-2:2015 E

Foreword

This document (EN ISO 10318-2:2015) has been prepared by Technical Committee ISO/TC 221 “Geosynthetics” in collaboration with Technical Committee CEN/TC 189 “Geosynthetics” the secretariat of which is held by NBN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2015, and conflicting national standards shall be withdrawn at the latest by October 2015.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

This document supersedes EN ISO 10318:2005.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

Endorsement notice

The text of ISO 10318-2:2015 has been approved by CEN as EN ISO 10318-2:2015 without any modification.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT), see the following URL: Foreword — Supplementary information.

The committee responsible for this document is ISO/TC 221, *Geosynthetics*.

This second edition cancels and replaces the first edition (ISO 10318:2005), which has been technically revised.

ISO 10318 consists of the following parts, under the general title *Geosynthetics*:

— *Part 1: Terms and definitions*

— *Part 2: Symbols and pictograms*

Geosynthetics —

Part 2:
Symbols and pictograms

1 Scope

The intent of this part of ISO 10318 is to define property symbols, graphical symbols, and pictograms used in EN and ISO geosynthetics standards. Definitions of particular or specific symbols and pictograms terms not included in this this part of ISO 10318 can be found in the International Standards describing appropriate test methods.

2 Symbols

2.1 Property symbols

2.1.1 Physical properties

Symbols	Units	References	Properties
d	mm	ISO 10318-1, 2.3.2.1	Thickness
b	m	—	Width
l	m	—	Length
ρ_A	g/m^2	ISO 10318-1, 2.3.2.2	Mass per unit area

2.1.2 Hydraulic properties of GTX and of GTP

Symbols	Units	References	Properties
k_n	m/s	ISO 10318-1, 2.3.3.3	Coefficient of permeability normal to the plane
ψ	s^{-1}	ISO 10318-1, 2.3.3.6	Permittivity ($\psi = k_n/d$)
θ	l/(m · s)	ISO 10318-1, 2.3.3.8	Transmissivity ($\theta = k_p \cdot d$)
v-index	mm/s	ISO 10318-1, 2.3.3.5	Velocity index
q_p	l/(m · s)	ISO 10318-1, 2.3.3.7	In-plane flow capacity
q_n	l/(m^2 · s)	ISO 10318-1, 2.3.3.4	Flux normal to the plane
O_{90}	µm	ISO 10318-1, 2.3.3.1	Characteristic opening size

2.1.3 Mechanical properties

2.1.3.1 Tensile characteristics

Symbols	Units	References	Properties
σ_y	MPa	ISO 10318-1, 2.3.4.1.2	Tensile stress at yield point

Symbols	Units	References	Properties
T_ε	kN/m	ISO 10318-1, 2.3.4.2	Tensile strength at a given strain ε (e.g. T_3 is the tensile strength at 3 % strain)
σ_f	MPa	ISO 10318-1, 2.3.4.1.3	Tensile stress at failure
T_f	kN/m	ISO 10318-1, 2.3.4.2.1	Tensile strength (related to the specimen width) at failure
σ_{max}	MPa	ISO 10318-1, 2.3.4.1.4	Maximum tensile stress
T_{max}	kN/m	ISO 10318-1, 2.3.4.2.2	Maximum tensile strength (related to the specimen width)
T_{Jmax}	kN/m	ISO 10318-1, 2.3.4.4.4	Maximum seam or joint strength
ξ_s	%	ISO 10318-1, 2.3.5.5	Joint or seam efficiency
J	kN/m or kPa	ISO 10318-1, 2.3.4.2.3	Tensile modulus

2.1.3.2 Frictional characteristics

Symbols	References	Properties
$\phi_{s,GSY}$	ISO 10318-1, 2.3.6.1	Friction angle between soil and GSY
$\phi_{GSY,GSY}$	ISO 10318-1, 2.3.6.1	Friction angle between GSY and GSY
$f_{s,GSY}$	ISO 10318-1, 2.3.6.2	Friction interaction (efficiency) coefficient between soil and GSY

2.1.3.3 Loading characteristics

Symbols	Units	References	Properties
F_f	kN	—	Load recorded at failure in a tensile test
F_{max}	kN	—	Maximum load recorded in a tensile test
F_p	kN	—	Puncture force in a static puncture test
P_n	kN	—	Normal load in a compressive creep test
P_s	kN	—	Shear load in a direct shear test

2.1.3.4 Other characteristics

Symbols	Units	Properties
D_C	mm	Diameter of the hole, if any, expressed in mm, obtained in the cone drop test

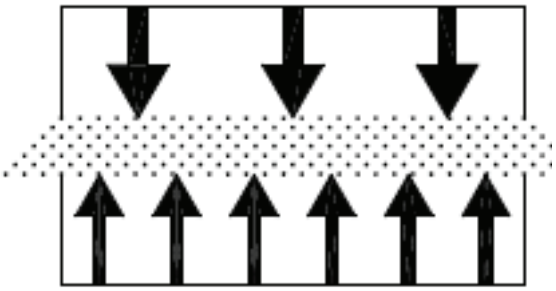
2.2 Graphical symbols and pictograms

2.2.1 Products

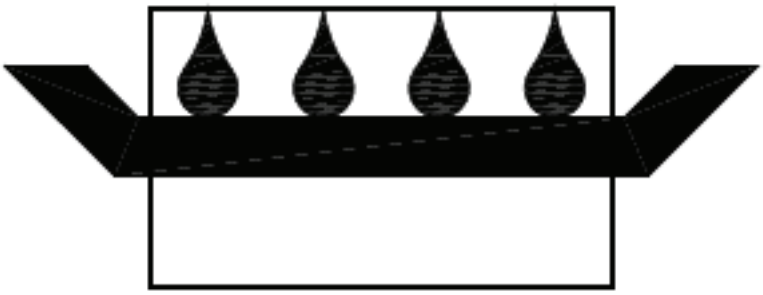
GTX		Geotextile
GBR		Geosynthetic barrier
GGR		Geogrid
GCO		Geocomposite
GNT		Geonet
GBR-C		Clay geosynthetic barrier
GCE		Geocell
GMA		Geomat

2.2.2 Functions

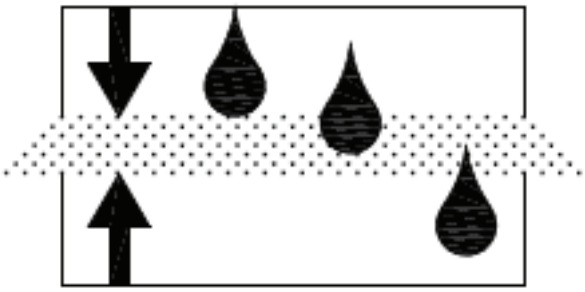
Separation



Barrier

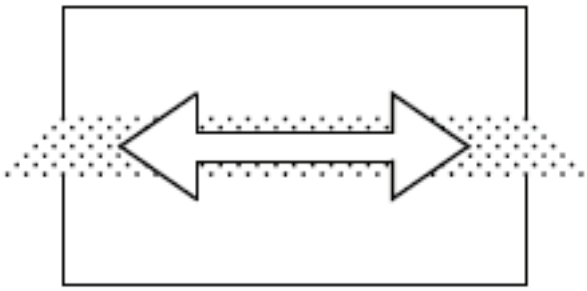


Filtration

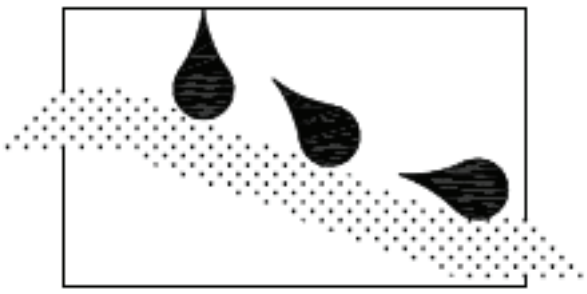


Drainage

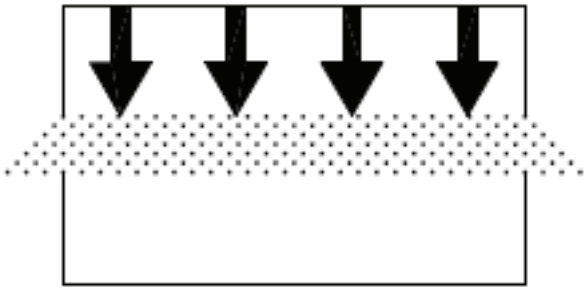
Reinforcement



Surface erosion control



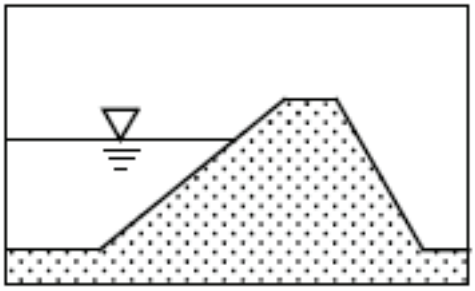
Protection



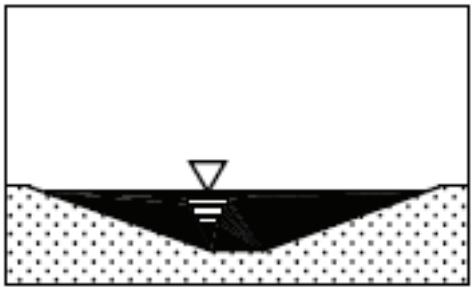
Stress Relief (for asphalt interlayer)

2.2.3 Applications

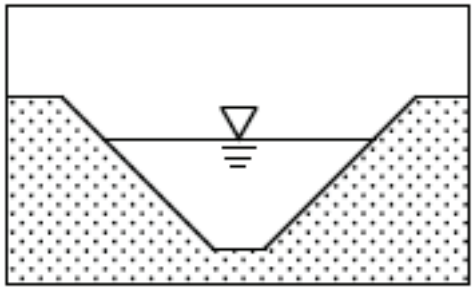
Reservoirs and dams



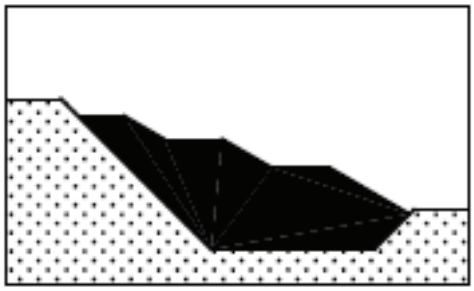
Liquid waste



Canals

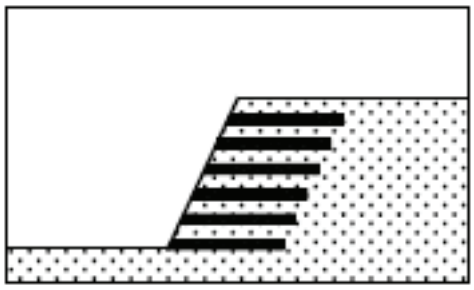


Solid waste

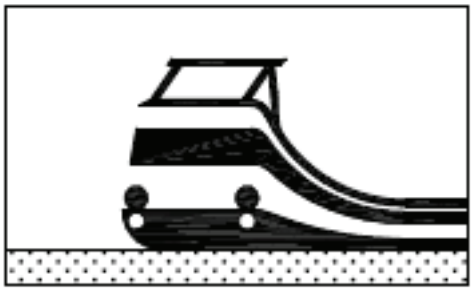


Transportation infrastructure and roads

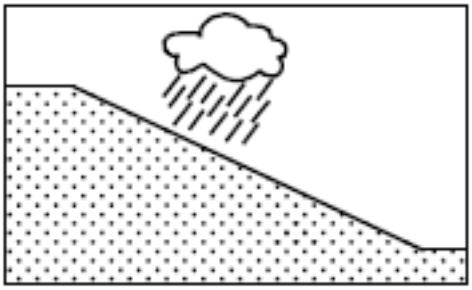
Foundations and retaining walls



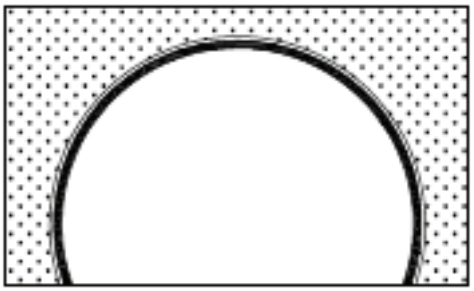
Railways



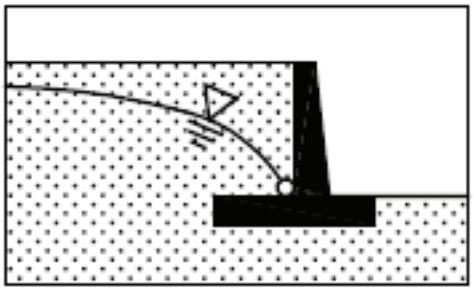
Surface erosion-control systems



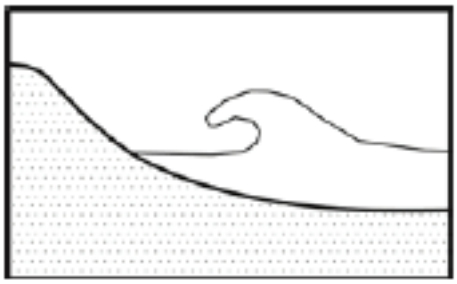
Tunnels and underground structures



Drainage systems



Coastal erosion control



Asphalt reinforcement

British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards -based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

PLUS is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup.com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email bsmusales@bsigroup.com.

BSI Group Headquarters

389 Chiswick High Road London W4 4AL UK

Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.
