BSI Standards Publication

# Aerospace series — Paints and varnishes — Test method for determination of phosphoric acid index

**bsi.**

...making excellence a habit.™

**National foreword**

This British Standard is the UK implementation of EN 4171:2011.

The UK participation in its preparation was entrusted to Technical Committee ACE/65/-/3, Paints, Surface Finish and Protective Treatments for Aerospace Purposes for Aerospace Purposes.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

English Version

## Aerospace series - Paints and varnishes - Test method for determination of phosphoric acid index

Série aérospatiale - Peintures et vernis - Méthode d'essai pour la détermination de l'indice d'acide phosphorique

Luft- und Raumfahrt - Beschichtungsstoffe - Prüfverfahren zur Bestimmung des Phosphorsäure-Index

This European Standard was approved by CEN on 27 August 2011.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

## Foreword

This document (EN 4171:2011) has been prepared by the Aerospace and Defence Industries Association of Europe - Standardization (ASD-STAN).

After enquiries and votes carried out in accordance with the rules of this Association, this Standard has received the approval of the National Associations and the Official Services of the member countries of ASD, prior to its presentation to CEN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by June 2012, and conflicting national standards shall be withdrawn at the latest by June 2012.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and the United Kingdom.

## 1 Scope

This European test standard specifies a method for the titration and determination of the phosphoric acid content of an hydroalcoholic solution for aerospace applications.

This test method is relevant for the determination of total acidity and phosphoric acid content in a reactive thinner of a wash primer or in metal cleaners.

## 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN ISO 1513, *Paints and varnishes - Examination and preparation of test samples (ISO 1513)*

EN ISO 3696, *Water for analytical laboratory use - Specification and test methods (ISO 3696)*

EN ISO 15528, *Paints, varnishes and raw materials for paints and varnishes - Sampling (ISO 15528)*

## 3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

### 3.1

#### **reactive thinner**

alcoholic phosphoric acid solution, which reacts with the metallic substrate and the base

### 3.2

#### **metal cleaner**

aqueous phosphoric acid solution for the removal of slightly oxidic films on aluminium

## 4 Principle

The phosphoric acid content is determined by titration with aqueous solution of sodium or potassium hydroxide after ionisation of the phosphoric acid.

Successive pH jumps allow the determination of:

- total acidity;
- phosphoric acid content.

## 5 Apparatus

- conical flasks: 250 ml;
- burette: 50 ml or 100 ml;
- PTFE coated magnetic stirrer;
- pipette: 10 ml;
- buffered solutions (pH = 4,5 and pH = 6,2);
- indicator solution (helianthine and phenolphthalein);
- automatic acid/base titrator or glass electrode (and SCE electrode);

— 1 N sodium or potassium hydroxide solution: (calibrate N using phthalic acid).

All chemicals are analytical reagent grade. Titration has to be carried out accordingly.

## 6 Specimen

Test specimen shall be taken directly from the original container. See EN ISO 1513 and EN ISO 15528.

## 7 Procedure

- In the conical flask containing an accurate volume of 10 ml, ( $V_s$ ), of the test specimen, add approximately 150 ml of fresh distilled water in accordance with EN ISO 3696;
- Introduce the magnetic stirring bar and put the erlenmeyer on the magnetic stirrer;
- Add few drops of both coloured indicators in case of manual procedure;
- Introduce the glass electrode and the SCE in case of pH-f (V) procedure;
- Using automatic or manual procedure add slowly the alkaline solution and record alkaline solution volume versus pH or colour change;
- Determine accurately the volume of alkali added to achieve the first and second end points indicated by observed jumps in pH using the potentiometric method or colour change in the case of the manual procedure. According to the pKa of the phosphoric acid (2,1, 7,2, 12,7) three main pH jumps are theoretically detected, but the two first jumps (pH 4,5 and 9) are detected with good accuracy (see Figure 1);
- Note  $V_1$  and  $V_2$ , the alkaline solution volume required to obtain these two pH jumps or colour change.

**Figure 1 — Titration of phosphoric acid by a strong base. Typical curve**

**CAUTION** — In case of solution containing phosphoric acid as only acidic material, theoretically  $V_1 = V_2$  but due to carbonic acid dissolved in water  $V_2$  may be slightly higher than  $V_1$ .

## 8 Results

$$\text{Acid normality: } N_1 = \frac{(V_1 \times N)}{V_s}$$

$$\text{H}_3\text{PO}_4 \text{ content: } Na = 3 \times (V_2 - V_1) \times \frac{N}{V_s}$$

In order to avoid the contribution of the presence of any other strong acid in the test specimen, for the calculation of the phosphoric acid content only the difference ( $V_2 - V_1$ ) shall be used.

## 9 Designation

EXAMPLE

Description block	Identity block
PHOSPHORIC ACID INDEX	<u>EN4171</u>

Number of this standard \_\_\_\_\_

## 10 Test report

This test standard specifies a method for the titration and determination of the phosphoric acid content of an hydroalcoholic solution used in etch primer activators for aerospace applications.

- Reference to this European Standard (EN 4171);
- date;
- product designation;
- batch number;
- code number;
- N (Normality of sodium or potassium hydroxide solution);
- N1 (Acid normality);
- Na ( $\text{H}_3\text{PO}_4$  content);
- test procedure: coloured indicators,  $\text{pH} = f(V)$ .

# British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

## About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

## Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at [bsigroup.com/standards](http://bsigroup.com/standards) or contacting our Customer Services team or Knowledge Centre.

## Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at [bsigroup.com/shop](http://bsigroup.com/shop), where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

## Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to [bsigroup.com/subscriptions](http://bsigroup.com/subscriptions).

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

**PLUS** is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit [bsigroup.com/shop](http://bsigroup.com/shop).

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email [bsmusales@bsigroup.com](mailto:bsmusales@bsigroup.com).

## Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.

## Copyright

All the data, software and documentation set out in all British Standards and other BSI publications are the property of and copyrighted by BSI, or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use.
