

Natural stone — Denomination criteria

ICS 01.040.91; 91.100.15

National foreword

This British Standard is the UK implementation of EN 12440:2008. It supersedes BS EN 12440:2001 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee B/545, Natural stone.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard cannot confer immunity from legal obligations.

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 29 February 2008

This European Standard was approved by CEN on 25 November 2007.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the CEN Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This document (EN 12440:2008) has been prepared by Technical Committee CEN/TC 246 "Natural stones", the secretariat of which is held by UNI.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by July 2008, and conflicting national standards shall be withdrawn at the latest by July 2008.

This document supersedes EN 12440:2000.

This European Standard is one of a series of European Standards for natural stone products including terminology, test methods and product standards.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland and United Kingdom.

Introduction

The International marketing of natural stone has introduced a great number of names to designate the different varieties of stone. Most of them are traditional names and usually reflect the typical colour and/or other natural features and the place of origin of the stone, although this is not always the case.

Sometimes, the name of a variety includes terms related to the geological classification of the rock (such as granite, marble, quartzite etc.) that may or may not coincide with the accurate petrological name of the rock. Other times, the same name is used to denominate different stones or similar varieties are denominated with different names.

The objective of this European Standard is to unify the designation criteria of natural stone varieties, maintaining the traditional names and introducing terms related to its petrologic nature, typical colour, and place of origin.

An informative annex provides a non-exhaustive provisional list of the names under which most stones from each contributing European country are known. This list is subjected to revision in future editions.

1 Scope

This European Standard specifies the criteria for the designation of natural stone from raw material to finished products.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 12407, *Natural stone test methods — Petrographic examination*

EN 12670:2001, *Natural stone — Terminology*

3 Denomination of natural stone

3.1 General

Natural stones will receive a description which shall include the following parts:

3.2 Name of the natural stone (traditional name)

The name of the natural stone under which it is marketed corresponds to a particular type of rock and with a specific place of origin. Geographical names not related with the actual place of origin of the stone and company names shall be avoided.

NOTE Frequently a place of origin of a specific stone does extend beyond purely administrative borderlines. A traditional name may include the designation of a variety name, which identifies a specific selection within a given type of rock and a given place of origin (e.g. the bench or level in the quarry, or some typical colour and character).

3.3 Petrological family

Scientific name of the petrological family of the rock according to 3.2 of EN 12670:2001. If the rock is not included in the classifications of 3.2 of EN 12670:2001, an appropriate scientific term shall be employed.

3.4 Typical colour

The range of colour that a stone variety shows. A visual colour appearance of one or more dry and clean bulk samples observed under shadow natural light. It is noted that surface finish and other features affect the visual colour impression of the stone.

3.5 Place of origin

The location of the area or quarry shall be as precise as possible, including at least, the city or village, municipality or community, county, province or department and country, separated by a comma (see Annex A).

4 Other information

4.1 General

If available or if agreed between buyer and seller, the following data may also be provided:

4.2 Process finish

For prepared products, the surface finish using an adequate term from 2.3 of EN 12670:2001.

4.3 Natural features

Natural features that may affect the appearance of the stone, according to Clause 2 of EN 12670:2001, i.e.: veins, inclusions, clots, xenoliths, texture, structures, cracks etc.

4.4 Petrographic name

Scientific name of the rock according to 3.2 of EN 12670:2001, and obtained by petrographic examination according to EN 12407.

4.5 Geological age

The age of the stone according to 3.1 of EN 12670:2001. It shall be given whenever possible. If available, further geological data may be provided.

Annex A (informative)

Traditional names of European natural stones

A.1 General

This annex is a non-exhaustive list of the majority of European natural stones and is a first attempt to list the stones produced in Europe and its petrological classification. It will be revised in further editions of this European Standard.

The structure of the information on each stone variety is:

- name or names (traditional name);
- petrological family;
- typical colour;
- place of origin.

In some cases the petrological family is provisional, pending to be established using EN 12407 and EN 12670. Unavailable data are represented by a hyphen.

BSI — British Standards Institution

BSI is the independent national body responsible for preparing British Standards. It presents the UK view on standards in Europe and at the international level. It is incorporated by Royal Charter.

Revisions

British Standards are updated by amendment or revision. Users of British Standards should make sure that they possess the latest amendments or editions.

It is the constant aim of BSI to improve the quality of our products and services. We would be grateful if anyone finding an inaccuracy or ambiguity while using this British Standard would inform the Secretary of the technical committee responsible, the identity of which can be found on the inside front cover.
Tel: +44 (0)20 8996 9000. Fax: +44 (0)20 8996 7400.

BSI offers members an individual updating service called PLUS which ensures that subscribers automatically receive the latest editions of standards.

Buying standards

Orders for all BSI, international and foreign standards publications should be addressed to Customer Services. Tel: +44 (0)20 8996 9001.
Fax: +44 (0)20 8996 7001. Email: orders@bsi-global.com. Standards are also available from the BSI website at <http://www.bsi-global.com>.

In response to orders for international standards, it is BSI policy to supply the BSI implementation of those that have been published as British Standards, unless otherwise requested.

Information on standards

BSI provides a wide range of information on national, European and international standards through its Library and its Technical Help to Exporters Service. Various BSI electronic information services are also available which give details on all its products and services. Contact the Information Centre.
Tel: +44 (0)20 8996 7111. Fax: +44 (0)20 8996 7048. Email: info@bsi-global.com.

Subscribing members of BSI are kept up to date with standards developments and receive substantial discounts on the purchase price of standards. For details of these and other benefits contact Membership Administration.
Tel: +44 (0)20 8996 7002. Fax: +44 (0)20 8996 7001.
Email: membership@bsi-global.com.

Information regarding online access to British Standards via British Standards Online can be found at <http://www.bsi-global.com/bsonline>.

Further information about BSI is available on the BSI website at <http://www.bsi-global.com>.
