Sports mats —

Part 3: Judo mats, safety requirements

The European Standard EN 12503-3:2001 has the status of a British Standard

 $ICS\ 97.220.30$

National foreword

This British Standard is the official English language version of EN 12503-3:2001. Together with BS EN 12503-1:2001, BS EN 12503-2:2001, BS EN 12503-4:2001, BS EN 12503-5:2001, BS EN 12503-6:2001 and BS EN 12503-7:2001, it supersedes BS 1892-2.10:1990 which will be withdrawn on 15 August 2001.

The UK participation in its preparation was entrusted to Technical Committee SW/14, Gymnasium and sports equipment, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed:
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Additional information

Flame retardancy

For sports matting used in the UK certain minimum levels of flame retardancy and the required test methodology will be detailed in BS 1892-3, which is in preparation.

Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled "International Standards Correspondence Index", or by using the "Find" facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

This British Standard, having been prepared under the direction of the Consumer Products and Services Sector Committee, was published under the authority of the Standards Committee and comes into effect on 15 June 2001

Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 7 and a back cover.

EUROPEAN STANDARD

EN 12503-3

NORME EUROPÉENNE EUROPÄISCHE NORM

April 2001

ICS 97.220.30

English version

Sports mats - Part 3: Judo mats, safety requirements

Tapis de sport - Partie 3: Tapis de judo, exigences de sécurité

Sportmatten - Teil 3: Judomatten, sicherheitstechnische Anforderungen

This European Standard was approved by CEN on 21 January 2001.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Management Centre or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Management Centre has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

Foreword

This European Standard has been prepared by Technical Committee CEN/TC 136 "Sports, playground and other recreational equipment", the secretariat of which is held by DIN.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by October 2001, and conflicting national standards shall be withdrawn at the latest by October 2001.

This standard EN 12503 "Sports mats" consists of:

Part 1:

Gymnastic mats, safety requirements

Part 2

Pole vault and high jump mats, safety requirements

Part 3:

Judo mats, safety requirements

Part 4:

Determination of shock absorption

Part 5:

Determination of the base friction

Part 6:

Determination of the top friction

Part 7:

Determination of static stiffness

The annexes A and B are informative.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

1 Scope

This standard specifies performance and safety requirements for judo mats used in schools, training and competition.

The performance and safety values concern shock absorption, stiffness, anti-slip characteristics of the base and top friction characteristics of the surface. They refer to test methods defined in specific standards indicated in clause 2.

Dimensions and tolerances are given in an informative annex.

NOTE For the specific requirements of international official competitions, see appropriate international regulations.

2 Normative references

This European Standard incorporates, by dated or undated reference, provisions from other publications. These normative references are cited at the appropriate places in the text and the publications are listed hereafter. For dated references, subsequent amendments to or revisions of any of these publications apply to this European Standard only when incorporated in it by amendment or revision. For undated references, the latest edition of the publication referred to applies (including amendments).

EN 12503-1:2001

Sports mats - Part 1: Gymnastic mats, safety requirements

EN 12503-2:2001

Sports mats - Part 2: Pole vault and high jump mats, safety requirements

EN 12503-4:2001

Sports mats - Part 4: Determination of shock absorption

EN 12503-5:2001

Sports mats - Part 5: Determination of the base friction

EN 12503-6:2001

Sports mats – Part 6: Determination of the top friction

EN 12503-7:2001

Sports mats - Part 7: Determination of static stiffness

3 Terms and definitions

For the purposes of this standard the following terms and definitions apply.

3.1

shock absorption

ability of the mat to reduce impact forces on the athlete, expressed as a maximum deceleration under defined test conditions [EN 12503-1:2001]

3.2

static stiffness

ability of the mat to deform under a force expressed as a maximum deflection under test conditions

3.3

resilience

ability of the mat to return energy after an impact, expressed as resilience in percent under defined test conditions [EN 12503-1:2001]

3.4

surface

upper side of the mat on which the athlete moves [EN 12503-1:2001]

3.5

base

under side of the mat designed to be in contact with the floor during use [EN 12503-1:2001]

4 Classification

Judo mats shall be classified as type 12.

NOTE For types 1 to 8 see EN 12503-1:2001 and for types 9 to 11 see EN 12503-2:2001.

5 Performance and safety requirements

5.1 Shock absorption

5.1.1 Homogeneity test

When tested in accordance with 7.2 of EN 12503-4:2001, the maximum allowable difference between any of the 8 individual points (average reading between 3 to 5) and the overall mean shall be \pm 3 g.

5.1.2 Peak g and resilience

When tested in accordance with 7.2 of EN 12503-4:2001, the values shall be in accordance with table 1.

Indentor diameter mm 43 116 **Parameters** Fall height cm 20 60 20 60 Peak deceleration ... g 30 90 40 85 Resilience % 30 28 32 28

Table 1 - Required values

5.2 Static stiffness

When tested in accordance with EN 12503-7:2001, the maximum static stiffness value shall not be greater than 9 mm.

5.3 Base friction characteristics of the base

If the manufacturer describes a mat as having an anti-slip system, it shall be tested in accordance with the test method defined in EN 12503-5:2001.

When tested in accordance with EN 12503-5:2001, the frictional value shall be equal to or greater than 6,5.

5.4 Top friction characteristics

When tested in accordance with the test method defined in EN 12503-6:2001, the coefficient of rotational friction shall be equal to or greater than 1,0.

6 Marking

Mats shall be marked legibly and indelibly with the following information:

- a) the number of this European Standard EN 12503-3 and the type number;
- b) the name and trademark of the manufacturer, retailer or importer and the year of manufacture;
- c) which is the top surface of the mat (if not clearly recognizable).

Annex A (informative)

Dimensions and tolerances

The dimensions and tolerances of judo mats are measured in normal use conditions (temperature, humidity).

The dimensions of judo mats are given in table A.1, and the tolerances in table A.2

Table A.1- Dimensions of judo mats

Length (mm)	multiple of 1 m	
Width (mm)	multiple of 1 m	
Thickness (mm)	40 or 50	

Table A.2 - Tolerances of dimensions

Tolerance on length	± 5 mm
Tolerance on width	± 5 mm
Tolerance on thickness	± 3 %

Annex B (informative)

Flame retardancy

Sports matting for use in the United Kingdom shall satisfy certain minimum levels of flame retardancy. These levels and the required test methodology are detailed in BS 1892:2.10 : 1999 (revised).

BSI — British Standards Institution

BSI is the independent national body responsible for preparing British Standards. It presents the UK view on standards in Europe and at the international level. It is incorporated by Royal Charter.

Revisions

British Standards are updated by amendment or revision. Users of British Standards should make sure that they possess the latest amendments or editions.

It is the constant aim of BSI to improve the quality of our products and services. We would be grateful if anyone finding an inaccuracy or ambiguity while using this British Standard would inform the Secretary of the technical committee responsible, the identity of which can be found on the inside front cover. Tel: 020 8996 9000. Fax: 020 8996 7400.

BSI offers members an individual updating service called PLUS which ensures that subscribers automatically receive the latest editions of standards.

Buying standards

Orders for all BSI, international and foreign standards publications should be addressed to Customer Services. Tel: 020 8996 9001. Fax: 020 8996 7001. Standards are also available from the BSI website at http://www.bsi-global.com.

In response to orders for international standards, it is BSI policy to supply the BSI implementation of those that have been published as British Standards, unless otherwise requested.

Information on standards

BSI provides a wide range of information on national, European and international standards through its Library and its Technical Help to Exporters Service. Various BSI electronic information services are also available which give details on all its products and services. Contact the Information Centre. Tel: 020 8996 7111. Fax: 020 8996 7048.

Subscribing members of BSI are kept up to date with standards developments and receive substantial discounts on the purchase price of standards. For details of these and other benefits contact Membership Administration. Tel: 020 8996 7002. Fax: 020 8996 7001. Further information about BSI is available on the BSI website at http://www.bsi-global.com.

Copyright

Copyright subsists in all BSI publications. BSI also holds the copyright, in the UK, of the publications of the international standardization bodies. Except as permitted under the Copyright, Designs and Patents Act 1988 no extract may be reproduced, stored in a retrieval system or transmitted in any form or by any means — electronic, photocopying, recording or otherwise — without prior written permission from BSI.

This does not preclude the free use, in the course of implementing the standard, of necessary details such as symbols, and size, type or grade designations. If these details are to be used for any other purpose than implementation then the prior written permission of BSI must be obtained.

If permission is granted, the terms may include royalty payments or a licensing agreement. Details and advice can be obtained from the Copyright Manager. Tel: 020 8996 7070.
