

# Fertilizers and liming materials and soil improvers — Vocabulary —

## Part 2: Terms relating to fertilizers

The European Standard EN 12944-2:1999 has the status of a  
British Standard

ICS 01.040.65; 65.080

## National foreword

This British Standard is the English language version of EN 12944-2:1999. Together with BS EN 12944-1:1999, it supersedes BS 5551:Section 1.2:1986 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee CII/37, Fertilizers and related chemicals, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

### Cross-references

The British Standards which implement international or European publications referred to in this document may be found in the BSI Standards Catalogue under the section entitled "International Standards Correspondence Index", or by using the "Find" facility of the BSI Standards Electronic Catalogue.

A British Standard does not purport to include all the necessary provisions of a contract. Users of British Standards are responsible for their correct application.

**Compliance with a British Standard does not of itself confer immunity from legal obligations.**

### Summary of pages

This document comprises a front cover, an inside front cover, the EN title page, pages 2 to 9, an inside back cover and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued.

This British Standard, having been prepared under the direction of the Sector Committee for Materials and Chemicals, was published under the authority of the Standards Committee and comes into effect on 15 January 2000

English version

## Fertilizers and liming materials - Vocabulary - Part 2: Terms relating to fertilizers

Engrais et amendements calciques et/ou magnésiens -  
Vocabulaire - Partie 2: Termes relatifs aux engrais

Düngemittel und Calcium-/Magnesium-  
Bodenverbesserungsmittel - Wörterbuch - Teil 2: Begriffe  
für Düngemittel

This European Standard was approved by CEN on 5 September 1999.

CEN members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration. Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the Central Secretariat or to any CEN member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CEN member into its own language and notified to the Central Secretariat has the same status as the official versions.

CEN members are the national standards bodies of Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and United Kingdom.

EUROPEAN COMMITTEE FOR STANDARDIZATION  
COMITÉ EUROPÉEN DE NORMALISATION  
EUROPÄISCHES KOMITEE FÜR NORMUNG

Central Secretariat: rue de Stassart, 36 B-1050 Brussels

## Foreword

This European Standard has been prepared by Technical Committee CEN/TC 260, Fertilizers and liming materials, the Secretariat of which is held by AFNOR.

This European Standard shall be given the status of a national standard, either by publication of an identical text or by endorsement, at the latest by May 2000, and conflicting national standards shall be withdrawn at the latest by May 2000.

This Standard is in 3 parts:

- *Part 1: General terms*
- *Part 2: Terms relating to fertilizers*
- *Part 3: Terms relating to liming materials*

These definitions may not necessarily correspond with those used in national legislation.

NOTE 1 Attention is drawn to EN 13535, *Fertilizers and liming materials - Classification*.

NOTE 2 A general index is incorporated in Part 3.

According to the CEN/CENELEC Internal Regulations, the national standards organizations of the following countries are bound to implement this European Standard: Austria, Belgium, Czech Republic, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United Kingdom.

## 1 Scope

This European Standard defines terms relating to fertilizers.

An index of all terms defined in this part of EN 12944, with their French and German equivalents, is given in annex A.

## 2 Definitions

### 2.1 Terms relating to products

#### 2.1.1

##### **basic slag**

product obtained in iron-smelting by treatment of phosphorus-containing melts and with calcium silico-phosphates as essential ingredients

NOTE The terms "Thomas phosphate" and "Thomas slag" are used in some countries to describe basic slag.

#### 2.1.2

##### **blood meal dried blood**

blood which has been dried and to which no other material has been added

#### 2.1.3

##### **bone meal**

degreased bone which may be degelatinized and which has been ground or crushed to pass a sieve of specified aperture size

#### 2.1.4

##### **dung**

semi-solid excrements of animals used as fertilizers and soil improvers

#### 2.1.5

##### **fish compost**

product obtained by grinding and composting fish or fish waste and to which no addition has been made

NOTE The term "fish guano" is also used but "fish compost" is preferred.

#### 2.1.6

##### **fish meal**

product obtained by drying and grinding fish or fish waste and to which no addition has been made

#### 2.1.7

##### **guano**

fresh or weathered excrement and remains of any birds, except poultry, containing nitrogen, phosphorus and potassium, prepared for use by screening, if necessary, and to which no addition has been made

#### 2.1.8

##### **leather waste**

waste in a form of pieces or powder resulting from the manufacture of leather goods

#### 2.1.9

##### **liquid manure**

liquid arising from animal urine and litter juices or from a dung heap

#### 2.1.10

##### **manure**

mixture of litter and dung in process of biological change

#### 2.1.11

##### **meat meal**

product obtained by drying and grinding, or otherwise treating, flesh or flesh fibre and to which no addition has been made

#### 2.1.12

##### **methylene urea**

##### **urea formaldehyde**

slow-release nitrogenous fertilizer produced by the reaction between urea and formaldehyde to produce polymethylene ureas of the general formula  $\text{NH}_2\text{-CO-(NHCH}_2\text{NHCO)}_n\text{NH}_2$  with low relative molecular mass and a relatively quick mineralization

#### 2.1.13

##### **oil cake**

residue remaining after the removal of the oil from oilseeds

#### 2.1.14

##### **peat**

residual matter from certain plants grown and decayed in almost permanently waterlogged conditions and which may contain a limited quantity of naturally occurring mineral material

#### 2.1.15

##### **slurry**

semi-liquid arising from livestock, consisting of urine and faeces, possibly diluted with water

NOTE In English, the term "slurry" has many meanings but, for the purpose of this European Standard, only the above meaning is used.

#### 2.1.16

##### **urea condensate**

product of reaction between urea and aldehyde(s) which produce a slow-release nitrogenous fertilizer

NOTE Examples of urea condensates are methylene urea (MU) or urea formaldehyde (UF), crotonylidene diurea (CDU) and isobutylidene diurea (IBDU).

## 2.2 Terms relating to physical and physico-chemical properties

#### 2.2.1

##### **apparent density**

mass per unit volume of the material included within the surface of the particles

#### 2.2.2

##### **bulk density (loose)**

mass per unit volume of a material after it has been tipped freely into a container under clearly specified conditions

#### 2.2.3

##### **bulk density (tapped)**

mass per unit volume of a material tipped into a container and compacted under clearly specified conditions

#### 2.2.4

##### **particle size analysis by sieving**

##### **granulometry by sieving**

division of a sample by sieving into size fractions

**2.2.5**

**sieving**

process of separating a mixture of particles according to their sizes by one or more sieves

**2.2.6**

**undersize**

that portion of the charge which passes through a sieve of specified aperture size

**2.2.7**

**oversize**

that portion of the charge which does not pass through a sieve of specified aperture size

**2.2.8**

**crushing strength**

force required to crush individual particles

**2.2.9**

**caking**

formation of a coherent mass from individual particles

**2.2.10**

**anti-caking agent**

substance incorporated in or applied to the surface of a solid fertilizer to prevent caking

**2.2.11**

**saturation temperature**

temperature below which crystallization of dissolved constituents begins and above which the last crystals dissolve

NOTE This is sometimes referred to as salting-out temperature or crystallization temperature.

**2.2.12**

**gel strength**

force required to break a gel

NOTE This is sometimes referred to as yield stress which is the strength corresponding to a "yield point" where there is a transition from elastic to plastic deformation.

**2.2.13**

**pourability**

extent to which a fluid fertilizer can be drained from its container by gravity as determined by an empirical procedure

**2.2.14**

**sedimentation**

process of particles settling in a fluid medium as a result of gravitational or other applied force

**2.2.15**

**flow rate**

mass flow of a material flowing freely through the outlet of a specified calibrated funnel

NOTE The term "flowability" is sometimes used but "flow rate" is preferred.

**2.2.16**

**free flowing**

description applied to a fertilizer which flows easily

**2.2.17**

**segregation**

differential movement of particles within a mixture due to differences in their size, shape or density

**2.2.18**

**sphericity**

degree to which the shape of a fertilizer particle approaches that of a sphere

**2.2.19**

**moisture**

water extracted from a fertilizer by using a specified method

NOTE The moisture content, as determined, may not include all the water present in the fertilizer.

**2.2.20**

**porosity**

volume fraction of the pores in a fertilizer

## Annex A (informative)

### Index

#### A

|                   |                 |                   |        |
|-------------------|-----------------|-------------------|--------|
| anti-caking agent | anti-massant    | Antibackmittel    | 2.2.10 |
| apparent density  | masse volumique | scheinbare Dichte | 2.2.1  |

#### B

|                       |                                 |                  |       |
|-----------------------|---------------------------------|------------------|-------|
| basic slag            | scories Thomas                  | Roheisenschlacke | 2.1.1 |
| blood meal            | sang séché                      | Blutmehl         | 2.1.2 |
| bone meal             | farine d'os                     | Knochenmehl      | 2.1.3 |
| bulk density (loose)  | masse volumique sans tassement  | Schüttdichte     | 2.2.2 |
| bulk density (tapped) | masse volumique après tassement | Rütteldichte     | 2.2.3 |

#### C

|                   |                           |                |       |
|-------------------|---------------------------|----------------|-------|
| caking            | prise en masse            | Verbacken      | 2.2.9 |
| crushing strength | résistance à l'écrasement | Kornfestigkeit | 2.2.8 |

#### D

|             |                |             |       |
|-------------|----------------|-------------|-------|
| dried blood | farine de sang | Trockenblut | 2.1.2 |
| dung        | excréments     | Dung        | 2.1.4 |

**F**

|              |                    |                          |        |
|--------------|--------------------|--------------------------|--------|
| fish compost | compost de poisson | Fischkompost             | 2.1.5  |
| fish meal    | farine de poisson  | Fischmehl                | 2.1.6  |
| flow rate    | taux d'écoulement  | Fließrate, Fließkennzahl | 2.2.15 |
| free flowing | écoulement libre   | frei fließend            | 2.2.16 |

**G**

|                         |                            |                             |        |
|-------------------------|----------------------------|-----------------------------|--------|
| gel strength            | résistance d'un gel        | Gelfestigkeit               | 2.2.12 |
| granulometry by sieving | granulométrie par tamisage | Granulometrie durch Siebung | 2.2.4  |
| guano                   | guano                      | Guano                       | 2.1.7  |

**L**

|               |                             |             |       |
|---------------|-----------------------------|-------------|-------|
| leather waste | déchet de cuir              | Lederabfall | 2.1.8 |
| liquid manure | déchets liquides d'abattoir | Jauche      | 2.1.9 |

**M**

|                |                   |                   |        |
|----------------|-------------------|-------------------|--------|
| manure         | fumier            | Stallmist         | 2.1.10 |
| meat meal      | farine de viande  | Fleischmehl       | 2.1.11 |
| methylene urea | urée de méthylène | Methylenharnstoff | 2.1.12 |
| moisture       | humidité          | Feuchte           | 2.2.19 |

**O**

|          |                       |          |        |
|----------|-----------------------|----------|--------|
| oil cake | tourteau d'oléagineux | Ölkuchen | 2.1.13 |
| oversize | refus                 | Überkorn | 2.2.7  |

**P**

|                                   |                                      |                                 |        |
|-----------------------------------|--------------------------------------|---------------------------------|--------|
| particle size analysis by sieving | analyse granulométrique par tamisage | Korngrößenanalyse durch Siebung | 2.2.4  |
| peat                              | tourbe                               | Torf                            | 2.1.14 |
| porosity                          | porosité                             | Porosität                       | 2.2.20 |
| pourability                       | aptitude à l'écoulement              | Gießbarkeit                     | 2.2.13 |

**S**

|                        |                           |                      |        |
|------------------------|---------------------------|----------------------|--------|
| saturation temperature | température de saturation | Sättigungstemperatur | 2.2.11 |
| sedimentation          | sédimentation             | Sedimentation        | 2.2.14 |
| segregation            | ségrégation               | Segregation          | 2.2.17 |
| sieving                | tamisage                  | Siebung              | 2.2.5  |
| slurry                 | lisier                    | Gülle, Flüssigmist   | 2.1.15 |
| sphericity             | sphéricité                | Rundheit             | 2.2.18 |

**U**

|                   |                   |                      |        |
|-------------------|-------------------|----------------------|--------|
| undersize         | tamisé - passant  | Unterkorn            | 2.2.6  |
| urea condensate   | urée condensée    | Harnstoffkondensat   | 2.1.16 |
| urea formaldehyde | urée formaldéhyde | Formaldehydharnstoff | 2.1.12 |

---

## BSI — British Standards Institution

BSI is the independent national body responsible for preparing British Standards. It presents the UK view on standards in Europe and at the international level. It is incorporated by Royal Charter.

### Revisions

British Standards are updated by amendment or revision. Users of British Standards should make sure that they possess the latest amendments or editions.

It is the constant aim of BSI to improve the quality of our products and services. We would be grateful if anyone finding an inaccuracy or ambiguity while using this British Standard would inform the Secretary of the technical committee responsible, the identity of which can be found on the inside front cover. Tel: 020 8996 9000. Fax: 020 8996 7400.

BSI offers members an individual updating service called PLUS which ensures that subscribers automatically receive the latest editions of standards.

### Buying standards

Orders for all BSI, international and foreign standards publications should be addressed to Customer Services. Tel: 020 8996 9001. Fax: 020 8996 7001.

In response to orders for international standards, it is BSI policy to supply the BSI implementation of those that have been published as British Standards, unless otherwise requested.

### Information on standards

BSI provides a wide range of information on national, European and international standards through its Library and its Technical Help to Exporters Service. Various BSI electronic information services are also available which give details on all its products and services. Contact the Information Centre. Tel: 020 8996 7111. Fax: 020 8996 7048.

Subscribing members of BSI are kept up to date with standards developments and receive substantial discounts on the purchase price of standards. For details of these and other benefits contact Membership Administration. Tel: 020 8996 7002. Fax: 020 8996 7001.

### Copyright

Copyright subsists in all BSI publications. BSI also holds the copyright, in the UK, of the publications of the international standardization bodies. Except as permitted under the Copyright, Designs and Patents Act 1988 no extract may be reproduced, stored in a retrieval system or transmitted in any form or by any means – electronic, photocopying, recording or otherwise – without prior written permission from BSI.

This does not preclude the free use, in the course of implementing the standard, of necessary details such as symbols, and size, type or grade designations. If these details are to be used for any other purpose than implementation then the prior written permission of BSI must be obtained.

If permission is granted, the terms may include royalty payments or a licensing agreement. Details and advice can be obtained from the Copyright Manager. Tel: 020 8996 7070.
