

## BSI Standards Publication

# Specifications for particular types of winding wires

Part 36: Solderable polyesterimide enamelled round copper wire, class 180, with a bonding layer

**National foreword**

This British Standard is the UK implementation of EN 60317-36:2014. It is identical to IEC 60317-36:2013. It supersedes BS EN 60317-36:1995 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee GEL/55, Winding wires.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

This European Standard was approved by CENELEC on 2013-11-18. CENELEC members are bound to comply with the CEN/CENELEC Internal Regulations which stipulate the conditions for giving this European Standard the status of a national standard without any alteration.

Up-to-date lists and bibliographical references concerning such national standards may be obtained on application to the CEN-CENELEC Management Centre or to any CENELEC member.

This European Standard exists in three official versions (English, French, German). A version in any other language made by translation under the responsibility of a CENELEC member into its own language and notified to the CEN-CENELEC Management Centre has the same status as the official versions.

CENELEC members are the national electrotechnical committees of Austria, Belgium, Bulgaria, Croatia, Cyprus, the Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## Foreword

The text of document 55/1417/FDIS, future edition 2 of IEC 60317-36 prepared by IEC/TC 55 "Winding wires" was submitted to the IEC-CENELEC parallel vote and approved by CENELEC as EN 60317-36:2014.

The following dates are fixed:

- latest date by which the document has to be implemented at national level by publication of an identical national standard or by endorsement (dop) 2014-08-18
- latest date by which the national standards conflicting with the document have to be withdrawn (dow) 2016-11-18

This document supersedes EN 60317-36:1994.

EN 60317-36:2014 includes the following significant technical changes with respect to EN 60317-36:1994:

- new 3.2.2 containing general notes on winding wire, formerly a part of the scope;
- revision to references to EN 60317-0-1:2014 to clarify that their application is normative;
- consolidation of 17.1 and 17.2 of the solderability requirements;
- new Clause 23, Pin hole test.

The numbering of clauses in this standard is not continuous from Clauses 20 and 30 in order to reserve space for possible future wire requirements prior to those for wire packaging.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CENELEC [and/or CEN] shall not be held responsible for identifying any or all such patent rights.

## Endorsement notice

The text of the International Standard IEC 60317-36:2013 was approved by CENELEC as a European Standard without any modification.

In the official version, for Bibliography, the following notes have to be added for the standards indicated:

- |                  |      |   |
|------------------|------|---|
| IEC 60264 Series | NOTE | Harmonized as EN 60264 Series (not modified). |
| IEC 60317 Series | NOTE | Harmonized as EN 60317 Series (not modified). |
| IEC 60851 Series | NOTE | Harmonized as EN 60851 Series (not modified). |

**Annex ZA**  
(normative)**Normative references to international publications  
with their corresponding European publications**

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

NOTE When an international publication has been modified by common modifications, indicated by (mod), the relevant EN/HD applies.

## INTRODUCTION

This part of IEC 60317 is one of a series of standards which deals with insulated wires used for windings in electrical equipment. The series has three groups describing:

- 1) Winding wires – Test methods (IEC 60851);
- 2) Specifications for particular types of winding wires (IEC 60317);
- 3) Packaging of winding wires (IEC 60264).

## SPECIFICATIONS FOR PARTICULAR TYPES OF WINDING WIRES –

### Part 36: Solderable polyesterimide enamelled round copper wire, class 180, with a bonding layer

#### 1 Scope

This part of IEC 60317 specifies the requirements of solderable enamelled round copper winding wire of class 180 with a dual coating. The underlying coating is based on polyesterimide resin, which may be modified providing it retains the chemical identity of the original resin and meets all specified wire requirements. The superimposed coating is a bonding layer based on a thermoplastic resin.

NOTE A modified resin is a resin that has undergone a chemical change, or contains one or more additives to enhance certain performance or application characteristics.

The range of nominal conductor diameters covered by this part is:

- Grade 1B: 0,020 mm up to and including 1,600 mm;
- Grade 2B: 0,020 mm up to and including 1,600 mm.

The nominal conductor diameters are specified in Clause 4 of IEC 60317-0-1:2013.

#### 2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

IEC 60317-0-1:2013, *Specifications for particular types of winding wires – Part 0-1: General requirements – Enamelled round copper wire*

#### 3 Terms, definitions, general notes and appearance

##### 3.1 Terms and definitions

Subclause 3.1 of IEC 60317-0-1:2013 applies.

##### 3.2 General notes

###### 3.2.1 Test methods

Subclause 3.2.1 of IEC 60317-0-1:2013 applies. In case of inconsistencies between IEC 60317-0-1:2013 and this part of IEC 60317, the latter shall prevail.

###### 3.2.2 Winding wire

Class 180 is a thermal class that requires a minimum temperature index of 180 and a heat shock temperature of at least 200 °C.

The temperature in degrees Celsius corresponding to the temperature index is not necessarily that at which it is recommended that the wire be operated and this will depend on many factors, including the type of equipment involved.

### **3.3 Appearance**

Subclause 3.3 of IEC 60317-0-1:2013 applies.

## **4 Dimensions**

Clause 4 of IEC 60317-0-1:2013 applies.

## **5 Electrical resistance**

Clause 5 of IEC 60317-0-1:2013 applies.

## **6 Elongation**

Clause 6 of IEC 60317-0-1:2013 applies.

## **7 Springiness**

Clause 7 of IEC 60317-0-1:2013 applies.

## **8 Flexibility and adherence**

Clause 8 of IEC 60317-0-1:2013 applies. For 8.4, the constant  $K$  used for the calculation of the number of revolutions for the peel test shall be 110 mm.

## **9 Heat shock**

Clause 9 of IEC 60317-0-1:2013 applies. The minimum heat shock temperature shall be 200 °C.

## **10 Cut-through**

No failure shall occur within 2 min at 265 °C.

## **11 Resistance to abrasion (nominal conductor diameters from 0,250 mm up to and including 1,600 mm)**

The wire shall meet the requirements given in Table 1.

For intermediate nominal conductor diameters, the value of the next larger nominal conductor diameter shall be taken.

**Table 1 – Resistance to abrasion**

Nominal conductor diameter mm	Grade 1B		Grade 2B	
	Minimum average force to failure N	Minimum force to failure of each measurement N	Minimum average force to failure N	Minimum force to failure of each measurement N
0,250	2,85	2,45	4,70	4,00
0,280	3,10	2,60	5,05	4,30
0,315	3,35	2,80	5,45	4,60
0,355	3,60	3,05	5,85	4,95
0,400	3,85	3,25	6,25	5,30
0,450	4,15	3,50	6,75	5,70
0,500	4,45	3,75	7,20	6,10
0,560	4,75	4,05	7,70	6,50
0,630	5,10	4,35	8,25	7,00
0,710	5,45	4,65	8,85	7,50
0,800	5,85	4,95	9,50	8,05
0,900	6,30	5,35	10,2	8,60
1,000	6,75	5,75	10,9	9,20
1,120	7,35	6,20	11,6	9,80
1,250	7,90	6,70	12,5	10,5
1,400	8,50	7,20	13,3	11,3
1,600	9,20	7,80	14,3	12,1

## 12 Resistance to solvents

Test inappropriate.

## 13 Breakdown voltage

Clause 13 of IEC 60317-0-1:2013 applies. The elevated temperature shall be 180 °C.

## 14 Continuity of insulation

Clause 14 of IEC 60317-0-1:2013 applies.

## 15 Temperature index

Clause 15 of IEC 60317-0-1:2013 applies. The minimum temperature index shall be 180.

## 16 Resistance to refrigerants

Test inappropriate.

## 17 Solderability

### 17.1 Nominal conductor diameters up to and including 0,100 mm

The temperature of the solder bath shall be  $(470 \pm 5)$  °C. The maximum immersion time shall be 3 s.

The surface of the tinned wire shall be smooth and free from holes and enamel residues.

### 17.2 Nominal conductor diameters over 0,100 mm

The temperature of the solder bath shall be  $(470 \pm 5)$  °C. The maximum immersion time (in seconds) shall be the following multiple of the nominal conductor diameter (in millimetres) with a minimum of 3 s.

Grade 1B	Grade 2B
12 s/mm	16 s/mm

The surface of the tinned wire shall be smooth and free from holes and enamel residues.

## 18 Heat or solvent bonding

### 18.1 Heat bonding

#### 18.1.1 Heat bonding strength of a helical coil

##### 18.1.1.1 At room temperature

The specimens shall be prepared according to the test method, and the temperature of the oven for bonding shall be fixed as agreed between purchaser and supplier for the different types of bonding enamels. The suggested temperature for polyamide bonding enamel is  $(200 \pm 2)$  °C and the suggested temperature for aromatic polyamide bonding enamel is  $(230 \pm 2)$  °C.

Results: when testing the specimens according to the test method, under the action of load specified in Table 2, no turns (other than possibly the first and the last) shall separate.

##### 18.1.1.2 At elevated temperature

The specimens shall be prepared and shall be conditioned as described in the test method.

The elevated temperature shall be fixed as agreed between purchaser and supplier for the different types of bonding enamels. The suggested temperature for polyamide bonding enamel is  $(155 \pm 2)$  °C and the suggested temperature for aromatic polyamide bonding enamel is  $(170 \pm 2)$  °C.

Results: when testing the specimens according to the test method, under the action of load specified in Table 2, no turns (other than possibly the first and the last) shall separate.

**Table 2 – Loads**

Nominal conductor diameter mm		Load N	
Over	Up to and including	Room temperature	Elevated temperature
–	0,050	a	a
0,050	0,071	0,05	0,04
0,071	0,100	0,08	0,06
0,100	0,160	0,12	0,08
0,160	0,200	0,25	0,19
0,200	0,315	0,35	0,25
0,315	0,400	0,70	0,55
0,400	0,500	1,10	0,80
0,500	0,630	1,60	1,20
0,630	0,710	2,20	1,70
0,710	0,800	2,80	2,10
0,800	0,900	3,40	2,60
0,900	1,000	4,20	3,20
1,000	1,120	5,00	3,80
1,120	1,250	5,80	4,40
1,250	1,400	6,50	4,90
1,400	1,600	8,50	6,40

a For nominal conductor diameters up to and including 0,050 mm, the test method and requirements shall be agreed between purchaser and supplier.

### 18.1.2 Bond strength on a twisted coil

#### 18.1.2.1 General

This test shall be considered only as a special test and is applicable to the diameter 0,315 mm.

#### 18.1.2.2 At room temperature

When preparing a test sample of diameter 0,315 mm according to the test method, the time shall be 30 s and the current shall be fixed as agreed between purchaser and supplier. The suggested value for polyamide bonding enamel is  $(2,7 \pm 0,1)$  A and the suggested value for aromatic polyamide bonding enamel is  $(3,0 \pm 0,1)$  A.

Results: when testing the samples according to the test method, under the action of the deflection force of 100 N, the sample shall not break.

#### 18.1.2.3 At elevated temperature

The samples of diameter 0,315 mm shall be prepared according to the test method, using the parameters listed in 18.1.2.2 and shall then be conditioned as described in the test method.

The elevated temperature shall be fixed as agreed between purchaser and supplier. The suggested temperature for polyamide bonding enamel is  $(155 \pm 2)$  °C and the suggested temperature for aromatic polyamide bonding enamel is  $(170 \pm 2)$  °C.

Results: when testing the samples according to the test method, under the action of the deflection force of 10 N, the sample shall not break.

## **18.2 Solvent bonding**

Test required but not yet under consideration.

## **19 Dielectric dissipation factor**

Test inappropriate.

## **20 Resistance to transformer oil**

Test inappropriate.

## **21 Loss of mass**

Test inappropriate.

## **23 Pin hole test**

Clause 23 of IEC 60317-0-1:2013 applies.

## **30 Packaging**

Clause 30 of IEC 60317-0-1:2013 applies.

# British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

## About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

## Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at [bsigroup.com/standards](http://bsigroup.com/standards) or contacting our Customer Services team or Knowledge Centre.

## Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at [bsigroup.com/shop](http://bsigroup.com/shop), where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

## Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to [bsigroup.com/subscriptions](http://bsigroup.com/subscriptions).

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

**PLUS** is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit [bsigroup.com/shop](http://bsigroup.com/shop).

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email [bsmusales@bsigroup.com](mailto:bsmusales@bsigroup.com).

## BSI Group Headquarters

389 Chiswick High Road London W4 4AL UK

## Rewvisions

Our British Standards and other publications are updated by amendment or revision. We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.

## Copyright
