

BS ISO 96-1:2016

BSI Standards Publication

Textile machinery and accessories — Rings and travellers for ring spinning and ring twisting frames

Part 1: Flange rings T and SF and their travellers

National foreword

This British Standard is the UK implementation of ISO 96-1:2016. It supersedes BS ISO 96-1:2009 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee TCI/33, Textile machinery.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The committee responsible for this document is ISO/TC 72, *Textile machinery and accessories*, Subcommittee SC 1, *Spinning preparatory, spinning, twisting and winding machinery and accessories*.

This third edition cancels and replaces the second edition (ISO 96-1:2009), of which it constitutes a minor revision with the following changes:

- a) full height h_1 in [Figure 1](#) given;
- b) full height h_2 in [Figure 2](#) given;
- c) value of flange width b_2 in [Table 1](#) changed;
- d) new value of 8 for height h_1 and h_2 in [Table 1](#) inserted;
- e) flange width b_1 in [Figure 3](#) removed and adapted to [Figure 4](#);
- f) [Clause 6](#) editorially revised.

A list of all parts in the ISO 96 series can be found on the ISO website.

Textile machinery and accessories — Rings and travellers for ring spinning and ring twisting frames —

Part 1: Flange rings T and SF and their travellers

1 Scope

This document specifies the principal dimensions of T- and SF-rings, and the mass and tolerance on the mass, of the appropriate travellers for flange rings employed on ring spinning and ring twisting machines. It also specifies the method of designation of the travellers.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 3, *Preferred numbers — Series of preferred numbers*

3 Terms and definitions

No terms and definitions are listed in this document.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <https://www.iso.org/obp/>

4 Principal dimensions of T- and SF-rings

The principal dimensions of T- and SF-rings are illustrated in [Figures 1](#) and [2](#), and specified in [Table 1](#).

Figure 1 — Example of a T-ring

Figure 2 — Example of an SF-ring

Table 1 — Ring dimensions

Dimensions in millimetres

Inside diameter d	T-Ring				SF-Ring			
	Height h_1	Fitting diameter		Flange width b_1 +0,15 0	Height h_2	Fitting diameter		Flange width b_2 +0,2 -0,1
		nominal	tolerance ^a			nominal	tolerance ^a	
36	8 10		0 -0,2				0 -0,2	
38								
40								
42								
45								
48	8 10 12	$d + 7$		2,6 ^b 3,2 ^c 4 ^d		$d + 12$	0 -0,25	2,8 3,8
(50)								
51								
54								
(55)								
57								
60								
63								
(65)								
70								
75								

^a The tolerance refers to the diameter d_1 , respectively d_2 , excluding any ovality.

^b The flange width $b_1 = 2,6$ mm was designated previously as ring flange No. 1/2.

^c The flange width $b_1 = 3,2$ mm was designated previously as ring flange No. 1.

^d The flange width $b_1 = 4$ mm was designated previously as ring flange No. 2.

5 Travellers

5.1 Examples of travellers appropriate for T- and SF-rings are shown in [Figures 3](#) and [4](#).

Figure 3 — Example of a traveller for a T-ring in the running position

Figure 4 — Example of a traveller for an SF-ring in the running position

5.2 The values for traveller mass are given in [Table 2](#).

Traveller mass is taken from the R20 series of preferred numbers in accordance with ISO 3. The range of traveller mass comprises values from 4 to 900 inclusive.

The traveller mass represents the nominal mass, in grams, of 1 000 travellers of the same type. The tolerance on the nominal mass for 1 000 travellers of the same type is $\pm 3\%$.

Table 2 — Traveller mass

Mass of traveller (grams per 1 000 travellers)		
4	25	160
4,5	28	180
5	31,5	200
5,6	35,5	224
6,3	40	250
7,1	45	280
8	50	315
9	56	355
10	63	400
11,2	71	450
12,5	80	500
14	90	560
16	100	630
18	112	710
20	125	800
22,4	140	900

6 Designation of travellers

The designation on the packing of travellers for the T- and SF-ring includes the following information:

- a) the denotation “Traveller” (optional);
- b) a reference to this document, i.e. ISO 96-1 (optional);
- c) the symbol “T” or “SF” (optional);
- d) the flange width, b_1 , in millimetres, of the appropriate ring (optional);
- e) the manufacturer’s designation for the traveller style (e.g. “C”, “EL”);
- f) the wire section symbol (if applicable), e.g. “f”, “r” (“f” = flat, “r” = round);
- g) the traveller mass (see [Table 2](#));
- h) the traveller material or traveller name if it is other than steel (where this information is omitted, it is assumed that the traveller material is steel);
- i) the surface finish (optional);
- j) the appearance (optional).

British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

Copyright in BSI publications

All the content in BSI publications, including British Standards, is the property of and copyrighted by BSI or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use.

Save for the provisions below, you may not transfer, share or disseminate any portion of the standard to any other person. You may not adapt, distribute, commercially exploit, or publicly display the standard or any portion thereof in any manner whatsoever without BSI's prior written consent.

Storing and using standards

Standards purchased in soft copy format:

- A British Standard purchased in soft copy format is licensed to a sole named user for personal or internal company use only.
- The standard may be stored on more than 1 device provided that it is accessible by the sole named user only and that only 1 copy is accessed at any one time.
- A single paper copy may be printed for personal or internal company use only.

Standards purchased in hard copy format:

- A British Standard purchased in hard copy format is for personal or internal company use only.
- It may not be further reproduced – in any format – to create an additional copy. This includes scanning of the document.

If you need more than 1 copy of the document, or if you wish to share the document on an internal network, you can save money by choosing a subscription product (see 'Subscriptions').

Reproducing extracts

For permission to reproduce content from BSI publications contact the BSI Copyright & Licensing team.

Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

PLUS is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup.com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email subscriptions@bsigroup.com.

Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.
