BSI Standards Publication

## Rolling bearings — Accessories

Part 2: Dimensions for locknuts and locking devices

**bsi.**

...making excellence a habit.™

**National foreword**

This British Standard is the UK implementation of ISO 2982-2:2013. It supersedes BS ISO 2982-2:2001 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee MCE/7, Rolling bearings.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 2982-2 was prepared by Technical Committee ISO/TC 4, *Rolling bearings*.

This third edition cancels and replaces the second edition (ISO 2982-2:2001), which has been technically revised.

ISO 2982 consists of the following parts, under the general title *Rolling bearings — Accessories*:

- *Part 1: Dimensions for adapter sleeve assemblies and withdrawal sleeves*
- *Part 2: Dimensions for locknuts and locking devices*

# Rolling bearings — Accessories —

## Part 2: Dimensions for locknuts and locking devices

### 1 Scope

This part of ISO 2982 specifies:

- dimensions of locknuts;
- runout tolerance of locknut clamp face with respect to pitch diameter of screw thread;
- dimensions of lockwashers with straight inner tab for use with 4-slot locknuts;
- dimensions of locking clip assemblies for use with 8-slot locknuts.

The locknuts are also suitable for axial location of bearing inner rings on shafts and for dismounting of withdrawal sleeves.

For adapter sleeve assemblies and withdrawal sleeves, see ISO 2982-1.

### 2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 5593, *Rolling bearings — Vocabulary*

ISO 15241, *Rolling bearings — Symbols for physical quantities*

### 3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO 5593 and the following apply.

#### 3.1

##### **locking clip**

part in C-shape for securing a locknut

#### 3.2

##### **locking clip assembly**

assembly comprising a locking clip and a bolt

### 4 Symbols

#### 4.1 General

For the purposes of this document, the symbols given in ISO 15241 and the following listed in [4.2](#), [4.3](#), [4.4](#) and [4.5](#) apply.

The symbols shown in [Figure 1](#), [Figure 2](#), [Figure 3](#) and [Figure 4](#) and the values given in [Table 1](#), [Table 2](#), [Table 3](#) and [Table 4](#) denote nominal dimensions, unless specified otherwise.

## 4.2 Locknuts with 4 slots

See [Figure 1](#).

$B$  locknut width

$b$  width of slot in locknut

$d_1$  outside diameter of clamp face of locknut

$d_2$  outside diameter of locknut

$G$  designation of screw thread

$h$  depth of slot in locknut

$t_s$  runout tolerance of locknut clamp face with respect to pitch diameter of screw thread

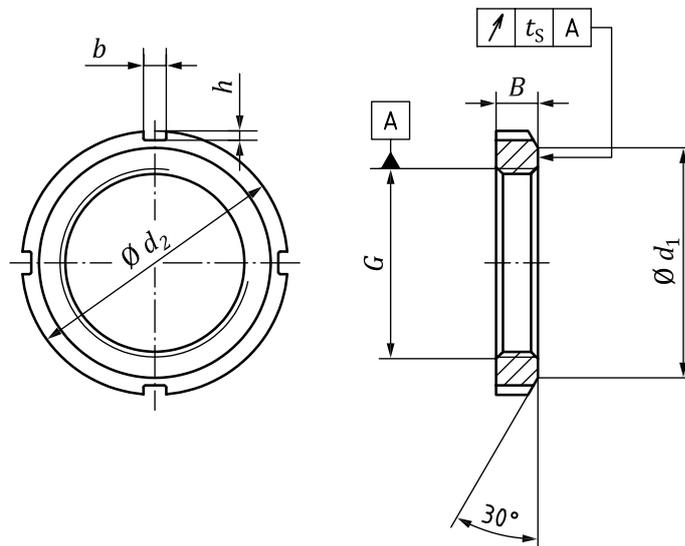

Figure 1 — Locknut with 4 slots

### 4.3 Lockwashers with straight inner tab

See [Figure 2](#).

- $B_7$  material thickness of lockwasher
- $d_3$  bore diameter of lockwasher
- $d_4$  root diameter of outer tab of lockwasher
- $d_5$  outside diameter of lockwasher
- $f$  width of outer tab of lockwasher
- $f_1$  width of inner tab of lockwasher
- $M$  distance between inner tab and bore ( $d_3 -$  height of inner tab)
- $N$  minimum number of outer tabs of lockwasher

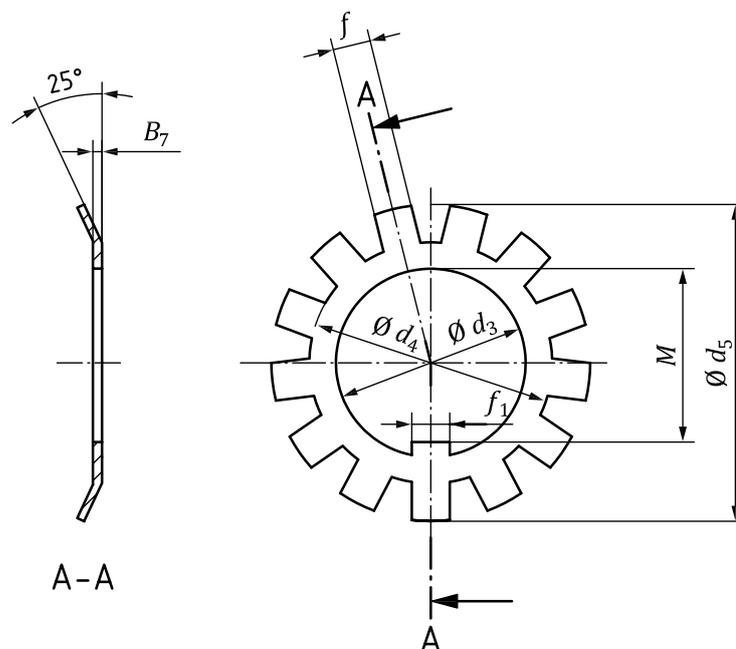

Figure 2 — Lockwasher with straight inner tab

#### 4.4 Locknuts with 8 slots

See [Figure 3](#).

- $B$  locknut width  
 $b$  width of slot in locknut  
 $d_1$  outside diameter of clamp face of locknut  
 $d_2$  outside diameter of locknut  
 $G_1$  designation of screw thread of the locknut bore  
 $h$  depth of slot in locknut  
 $t_s$  runout tolerance of locknut clamp face with respect to pitch diameter of screw thread

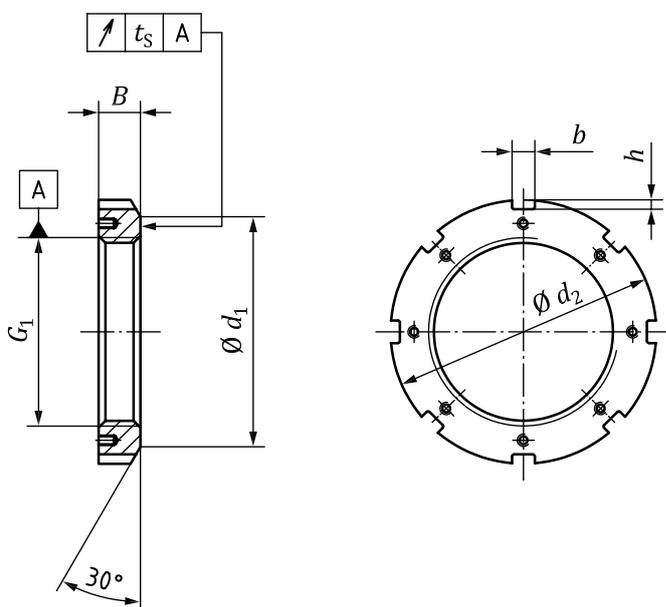

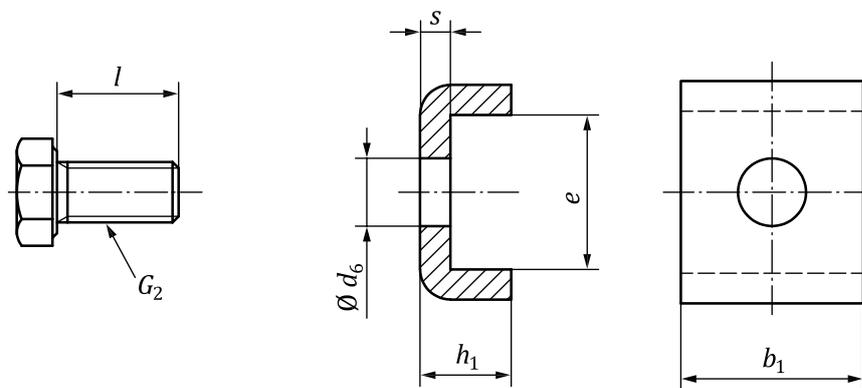

Figure 3 — Locknut with 8 slots

## 4.5 Locking clip assemblies

See [Figure 4](#) for bolt and locking clip.

- $b_1$  width of locking clip
- $d_6$  diameter of hole in locking clip
- $e$  inner width of locking clip
- $G_2$  designation of screw thread
- $h_1$  height of locking clip
- $l$  length of bolt
- $s$  material thickness of locking clip

NOTE The bolt may or may not be secured to prevent loosening.

**Figure 4 — Locking clip assembly**

## 5 Dimensions

### 5.1 Locknuts with 4 slots

Dimensions and runout tolerance,  $t_s$ , of locknuts with 4 slots are given in [Table 1](#).

**Table 1 — Locknuts with 4 slots**

Dimensions and tolerances in millimetres

<sup>a</sup> The thickness is only approximate and small variations are permissible.

<sup>b</sup>  $b_1$  shall be  $< b$  (see [Figure 3](#) and [Table 3](#)).

<sup>c</sup> The lengths shown correspond to preferred length of the bolt for the screw thread sizes listed; however, variations are permissible.

## Annex A (informative)

### Lockwashers with bent inner tab

#### A.1 General

In addition to lockwashers with straight inner tab given in 5.2, lockwashers with bent inner tab are available. They are used with 4-slot locknuts and are intended to be used for threaded shafts.

#### A.2 Symbols

See [Figure A.1](#).

In addition to the symbols given in 4.3, the following symbol is used.

$B_2$  protrusion of bent inner tab of lockwasher

The symbols shown in [Figure A.1](#) and the values given in [Table A.1](#) denote nominal dimensions, unless noted otherwise.

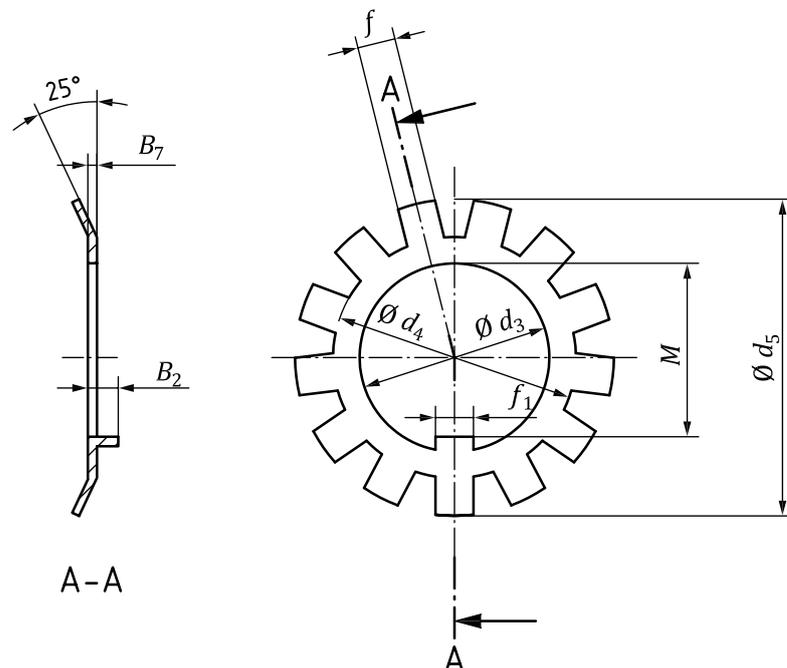

Figure A.1 — Lockwasher with bent inner tab

#### A.3 Dimensions

Dimensions of lockwashers with bent inner tab are shown in [Table A.1](#).

**Table A.1 — Lockwashers with bent inner tab**

Dimensions in millimetres

$d_3$	$d_4$	$d_5$ ≈	$f_1$ max.	$M$	$f^a$	$B_2$	$B_7^b$ ≈	$N^c$

160	182	217	18	154	16	12	2,5	19
165	193	222	18	157,5	16	12	2,5	19
170	193	232	18	164	16	12	2,5	19
180	203	242	20	174	18	12	2,5	19
190	214	252	20	184	18	12	2,5	19
200	226	262	20	194	18	12	2,5	19
220	250	292	24	213	20	14	3	19
240	270	312	24	233	20	14	3	19
260	300	342	28	253	24	14	3	19
280	320	362	28	273	24	14	3	19

<sup>a</sup>  $f$  is  $< b$  (see [Figure 1](#) and [Table 1](#)).

<sup>b</sup> The thickness is only approximate and small variations are permissible.

<sup>c</sup> Since the locknut has 4 slots,  $N$  is an odd number.

# British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

## About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

## Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at [bsigroup.com/standards](http://bsigroup.com/standards) or contacting our Customer Services team or Knowledge Centre.

## Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at [bsigroup.com/shop](http://bsigroup.com/shop), where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

## Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to [bsigroup.com/subscriptions](http://bsigroup.com/subscriptions).

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

**PLUS** is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit [bsigroup.com/shop](http://bsigroup.com/shop).

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email [bsmusales@bsigroup.com](mailto:bsmusales@bsigroup.com).

## BSI Group Headquarters

389 Chiswick High Road London W4 4AL UK

## Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.

## Copyright

All the data, software and documentation set out in all British Standards and other BSI publications are the property of and copyrighted by BSI, or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use. Except as permitted under the Copyright, Designs and Patents Act 1988 no extract may be reproduced, stored in a retrieval system or transmitted in any form or by any means – electronic, photocopying, recording or otherwise – without prior written permission from BSI.
