BSI Standards Publication

Tools for moulding — Shouldered ejector pins

bsi.

...making excellence a habit.™

National foreword

This British Standard is the UK implementation of ISO 8694:2011. It supersedes BS ISO 8694:1998 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee MTE/12, Tools for pressing and moulding.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 8694 was prepared by Technical Committee ISO/TC 29, *Small tools*, Subcommittee SC 8, *Tools for pressing and moulding*.

This third edition cancels and replaces the second edition (ISO 8694:1998), of which it constitutes a minor revision. In particular, the indication of surface textures has been updated in accordance with ISO 1302:2002.

Tools for moulding — Shouldered ejector pins

1 Scope

This International Standard specifies the dimensions and tolerances, in millimetres, of shouldered ejector pins with cylindrical head which are used in compression and injection moulds and in die casting dies.

It also gives material guidelines and hardness requirements, and specifies the designation of shouldered ejector pins.

Ejector pins with cylindrical head are specified in ISO 6751; flat ejector pins are specified in ISO 8693.

2 Dimensions

The dimensions of shouldered ejector pins shall be in accordance with the indications of Figure 1 and Table 1.

Key

- 1 edges without burrs
- ^a Ra 0,8 for hot worked steel. Ra 0,4 for alloyed cold worked steel.
- ^b The concentricity tolerance of 0,05 mm is measured over a maximum distance of 10 mm immediately after the end of the radius joining D_1 and D_2 .
- ^c Providing the ejector pin with an alternative surface roughness or a small variation on the diameter, D_2 , over a certain length is permitted.

Figure 1 — Shouldered ejector pin

Table 1 — Dimensions of shouldered ejector pins

Dimensions in millimetres

D_1 g6		D_2	D_3	L $+2$ 0					H	R
Standard size	Oversize			100	125	160	200	250		
		L_1 -1 -2					0 $-0,05$	$+0,2$ 0		
h11	0 $-0,2$	50	50	63	80	100				
0,8		2	4	X	X	X		2	0,2	
	0,9			X	X	X				
1				X	X	X				
	1,2			X	X	X				
1,5		3	6	X	X	X	X	3	0,3	
	1,6			X	X	X	X			
2				X	X	X	X			X
	2,2			X	X	X	X			X
2,5				X	X	X	X			X

3 Material and hardness

Shouldered ejector pins shall be made of hot worked steel or alloyed cold worked steel. The hardness of the shaft and head shall conform to the indication of Table 2.

Table 2 — Material and hardness

Material	Hardness ^a	
	Shaft	Head
Hot worked steel	Min. 1 400 MPa core strength min. 950 HV 0,3	(45 ± 5) HRC hot-forged
Alloyed cold worked steel	(60 ± 2) HRC	

^a The point at which hardness is measured is left to the manufacturer's discretion.

4 Designation

Shouldered ejector pins according to this International Standard shall be designated by:

- a) “shouldered ejector pin”;
- b) reference to this International Standard, i.e. ISO 8694;
- c) ejector pin diameter, D_1 , in millimetres;
- d) ejector pin length, L , in millimetres;
- e) ejector pin material.

EXAMPLE The designation for a shouldered ejector pin of diameter $D_1 = 0,8$ mm, of length $L = 100$ mm and of hot worked steel is as follows:

Shouldered ejector pin ISO 8694 - 0,8 - 100 - Hot worked steel

British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

PLUS is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup.com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email bsmusales@bsigroup.com.

Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.

Copyright

All the data, software and documentation set out in all British Standards and other BSI publications are the property of and copyrighted by BSI, or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use. Except as permitted under the Copyright, Designs and Patents Act 1988 no extract may be reproduced, stored in a retrieval system or transmitted in any form or by any means – electronic, photocopying, recording or otherwise – without prior written permission from BSI.
