BS ISO 10889-3:2016

BSI Standards Publication

Tool holders with cylindrical shank

Part 3: Type B with rectangular radial seat

National foreword

This British Standard is the UK implementation of ISO 10889-3:2016. It supersedes BS ISO 10889-3:2004 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee MTE/18, Tools tips and inserts for cutting applications.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: Foreword - Supplementary information

The committee responsible for this document is ISO/TC 29, *Small tools*, Subcommittee SC 2, *Holding tools, adaptive items and interfaces*.

This third edition cancels and replaces the second edition (ISO 10889-3:2004), of which it constitutes a minor revision, notably with the addition of Annex A, which gives the relationship between the designations of this part of ISO 10889 and the ISO 13399 series.

ISO 10889 consists of the following parts, under the general title *Tool holders with cylindrical shank*:

— *Part 1: Cylindrical shank, location bore — Technical delivery conditions*

— *Part 2: Type A, shanks for tool holders of special designs*

— *Part 3: Type B with rectangular radial seat*

— *Part 4: Type C with rectangular axial seat*

— *Part 5: Type D with more than one rectangular seat*

— *Part 6: Type E with cylindrical seat*

— *Part 7: Type F with taper seat*

— *Part 8: Type Z, accessories*

INTERNATIONAL STANDARD ISO 10889-3:2016(E)

Tool holders with cylindrical shank —

Part 3:
Type B with rectangular radial seat

1 Scope

This part of ISO 10889 specifies dimensions, designations, and complementary technical delivery conditions for tool holders with a rectangular radial seat of types B1 to B8 with cylindrical shank in accordance with ISO 10889-1.

ISO 10889 is applicable to tool holders with cylindrical shank for machine tools with non-rotating tools, preferably for turning machines.

For non-standardized tool holders with a rectangular radial seat such as the tool holders shown in the figures, it is advisable to apply the corresponding specifications of this part of ISO 10889.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 2768-1, *General tolerances — Part 1: Tolerances for linear and angular dimensions without individual tolerance indications*

ISO 2768-2, *General tolerances — Part 2: Geometrical tolerances for features without individual tolerance indications*

ISO 10889-1, *Tool holders with cylindrical shank — Part 1: Cylindrical shank, location bore — Technical delivery conditions*

3 Dimensions

All dimensions and tolerances are given in millimetres. Tolerancing is done according to ISO 8015. Tolerances not specified shall be of tolerance class “m” in accordance with ISO 2768-1 and of class “H” in accordance with ISO 2768-2.

Unspecified details shall be chosen appropriately.

The dimensions of tool holders type B shall be in accordance with the dimensions shown in Figures 1 to 8 and given in Table 1.

The relationship between the symbols of this part of ISO 10889 and the symbols according to ISO 13399 is given in Annex A.

4 Geometrical tolerances

The geometrical tolerances shall be as defined in Figure 9.

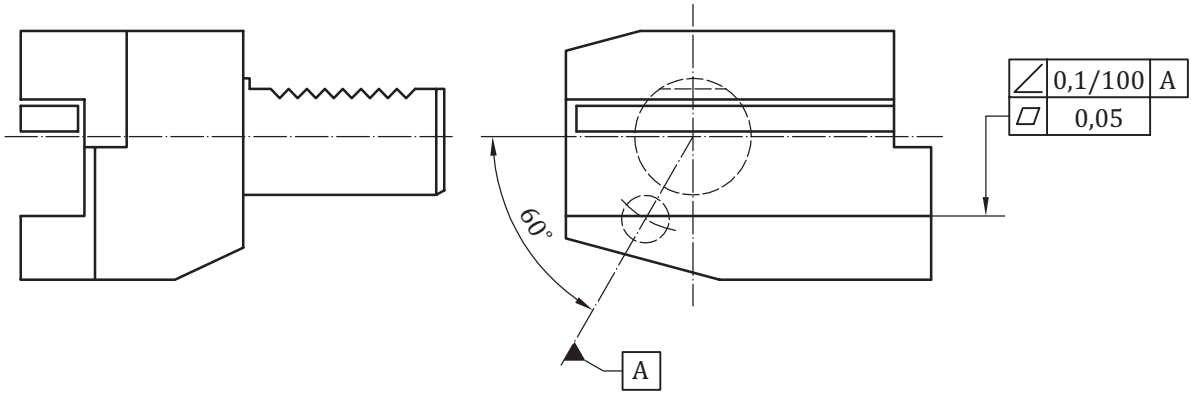

Figure 9 — Geometrical tolerances

5 Designation

A type B tool holder with rectangular radial seat in accordance with this part of ISO 10889 shall be designated by the following:

a) "Tool holder";

b) reference to this part of ISO 10889, i.e. ISO 10889-3;

c) type (B1, B2, B3, B4, B5, B6, B7, or B8);

d) nominal diameter, d_1, in millimetres;

e) nominal height, h_1, in millimetres;

f) head length, l_2, in millimetres.

EXAMPLE A tool holder with rectangular radial seat of type B1 with a nominal diameter d_1 = 60 mm, a nominal height h_1 = 32 mm, and a head length l_2 = 60 mm is designated as follows:

Tool holder ISO 10889-3 - B1 - 60 × 32 × 60

6 Technical delivery conditions

6.1 General

As a complement to the requirements of ISO 10889-1, those given in 6.2 and 6.3 shall also apply.

6.2 Design

Tool holders with rectangular radial seat are equipped with a coolant outlet with adjustable direction. The design is at the discretion of the manufacturer, e.g. ball-type nozzle.

The tools shall be adjustable in the tool holder at right angles to the rectangular seat. The design is at the discretion of the manufacturer.

It shall be possible to reduce the dimension h_1 specified in Table 1 to the next smallest standardized dimension h_1 as given in Table 2. The design is at the discretion of the manufacturer.

Table 2 — Smaller standardized dimension h_1

Dimensions in millimetres

d_1	**16**	**20**	**25**	**30**	**40**	**50**	**60**	**80**
h_1	10	12	12	16	20	25	25	32

Tool holders may also be supplied with a hardened contact surface. Then it shall be mentioned in the designation (H for hardened contact surface).

EXAMPLE A tool holder with rectangular radial seat of type B1 with a nominal diameter d_1 = 40 mm, a nominal height h_1 = 20 mm, and a head length l_2 = 44 mm with hardened contact surface is designated as follows:

Tool holder ISO 10889-3 - B1 -40 × 20 × 44 H

6.3 Scope of delivery

The scope of delivery of tool holders includes clamping elements for the clamping of the tools. The design of the clamping elements is at the discretion of the manufacturer.

Annex A
(informative)

Relationship between designations in this part of ISO 10889 and ISO 13399

For the relationship between the symbols of this part of ISO 10889 and symbols according to ISO 13399, see Table A.1.

British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards -based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

PLUS is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup.com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email bsmusales@bsigroup.com.

BSI Group Headquarters

389 Chiswick High Road London W4 4AL UK

Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.
