Tools for pressing — Ball-lock punch retainers —

Part 3: Type E, reduced for heavy duty

 $ICS\ 25.120.10$

National foreword

This British Standard reproduces verbatim ISO 11900-3:2004 and implements it as the UK national standard.

The UK participation in its preparation was entrusted to Technical Committee MTE/12, Tools for pressing and moulding, which has the responsibility to:

- aid enquirers to understand the text;
- present to the responsible international/European committee any enquiries on the interpretation, or proposals for change, and keep the UK interests informed;
- monitor related international and European developments and promulgate them in the UK.

A list of organizations represented on this committee can be obtained on request to its secretary.

Cross-references

The British Standards which implement international publications referred to in this document may be found in the *BSI Catalogue* under the section entitled "International Standards Correspondence Index", or by using the "Search" facility of the *BSI Electronic Catalogue* or of British Standards Online.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Compliance with a British Standard does not of itself confer immunity from legal obligations.

Summary of pages

This document comprises a front cover, an inside front cover, the ISO title page, pages ii and iii, a blank page, pages 1 to 3 and a back cover.

The BSI copyright notice displayed in this document indicates when the document was last issued.

Amendments issued since publication

This British Standard was published under the authority of the Standards Policy and Strategy Committee on 8 September 2004

INTERNATIONAL STANDARD

ISO 11900-3

First edition 2004-08-15

Tools for pressing — Ball-lock punch retainers —

Part 3:

Type E, reduced for heavy duty

Outillage de presse — Porte-poinçons pour poinçons à bille — Partie 3: Type E, réduits pour tôles épaisses

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 11900-3 was prepared by Technical Committee ISO/TC 29, Small tools, Subcommittee SC 8, Tools for pressing and moulding.

ISO 11900 consists of the following parts, under the general title *Tools for pressing* — *Ball-lock punch retainers*:

- Part 1: Types A and B, rectangular and square for light duty
- Part 2: Types C and D, reduced for light duty
- Part 3: Type E, reduced for heavy duty

Tools for pressing — Ball-lock punch retainers —

Part 3:

Type E, reduced for heavy duty

1 Scope

This part of ISO 11900 specifies the dimensions and tolerances, in millimetres, of reduced ball-lock punch retainers, type E, for heavy duty, and of their backing plug, the main use being retention of ball-lock punches in accordance with ISO 10071-2, when punching holes in steel sheets.

It also gives material guidelines and hardness requirements, and specifies the designation of ball-lock punch retainers in accordance with this part of ISO 11900.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 273, Fasteners — Clearance holes for bolts and screws

ISO 3290:2001, Rolling bearings — Balls — Dimensions and tolerances

ISO 4762, Hexagon socket head cap screws

ISO 8735, Parallel pins with internal thread, of hardened steel and martensitic stainless steel

ISO 10071-21, Tools for pressing — Ball-lock punches — Part 2: Ball-lock punches for heavy duty

3 Dimensions

3.1 General tolerance

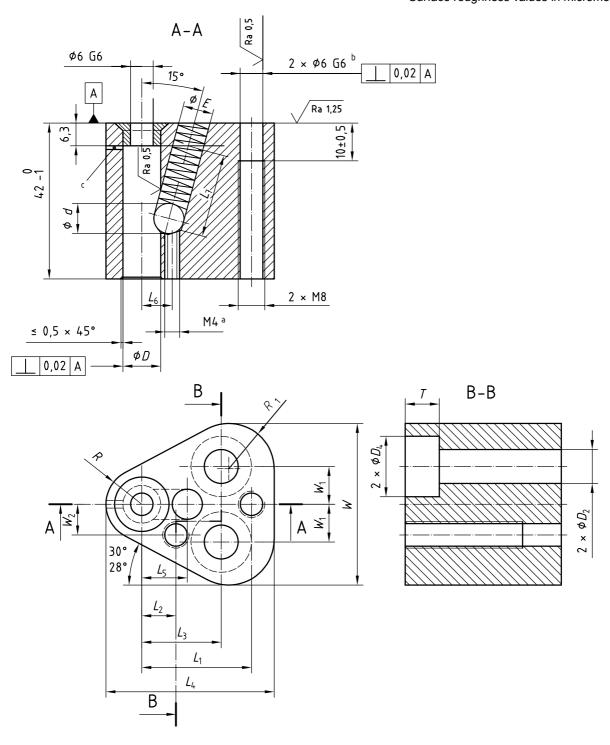

The general tolerance for all dimensions not individually toleranced is \pm 0,25 mm.

3.2 Type E reduced ball-lock punch retainer

See Figure 1 and Table 1.

¹⁾ To be published.

Surface roughness values in micrometres

Key

- a Optional.
- b Hole for parallel hardened pins (dowels pins) in accordance with ISO 8735.
- c Venting hole.

Counterbore in accordance with ISO 273 and M8, M10 and M12 head cap screws in accordance with ISO 4762.

4 Material and hardness

The material is left to the manufacturer's discretion. The hardness shall be (55 \pm 5) HRC for ball-lock punch retainers and for backing plugs.

5 Designation

Ball-lock punch retainers in accordance with this part of ISO 11900 shall be designated by:

- a) "Ball-lock retainer";
- b) reference to this part of ISO 11900, i.e. ISO 11900-3;
- c) its type;
- d) its diameter, D, in millimetres.

EXAMPLE A ball-lock punch retainer of type E with a diameter D = 10 mm is designated as follows:

Ball-lock retainer ISO 11900-3-E-10

b Ball in accordance with ISO 3290:2001, grade G 200.

BS ISO 11900-3:2004

BSI — British Standards Institution

BSI is the independent national body responsible for preparing British Standards. It presents the UK view on standards in Europe and at the international level. It is incorporated by Royal Charter.

Revisions

British Standards are updated by amendment or revision. Users of British Standards should make sure that they possess the latest amendments or editions.

It is the constant aim of BSI to improve the quality of our products and services. We would be grateful if anyone finding an inaccuracy or ambiguity while using this British Standard would inform the Secretary of the technical committee responsible, the identity of which can be found on the inside front cover. Tel: +44 (0)20 8996 9000. Fax: +44 (0)20 8996 7400.

BSI offers members an individual updating service called PLUS which ensures that subscribers automatically receive the latest editions of standards.

Buying standards

Orders for all BSI, international and foreign standards publications should be addressed to Customer Services. Tel: +44 (0)20 8996 9001. Fax: +44 (0)20 8996 7001. Email: orders@bsi-global.com. Standards are also available from the BSI website at http://www.bsi-global.com.

In response to orders for international standards, it is BSI policy to supply the BSI implementation of those that have been published as British Standards, unless otherwise requested.

Information on standards

BSI provides a wide range of information on national, European and international standards through its Library and its Technical Help to Exporters Service. Various BSI electronic information services are also available which give details on all its products and services. Contact the Information Centre. Tel: +44 (0)20 8996 7111. Fax: +44 (0)20 8996 7048. Email: info@bsi-global.com.

Subscribing members of BSI are kept up to date with standards developments and receive substantial discounts on the purchase price of standards. For details of these and other benefits contact Membership Administration.

Tel: +44 (0)20 8996 7002. Fax: +44 (0)20 8996 7001.

Email: membership@bsi-global.com.

Information regarding online access to British Standards via British Standards Online can be found at http://www.bsi-global.com/bsonline.

Further information about BSI is available on the BSI website at http://www.bsi-global.com.

Copyright

Copyright subsists in all BSI publications. BSI also holds the copyright, in the UK, of the publications of the international standardization bodies. Except as permitted under the Copyright, Designs and Patents Act 1988 no extract may be reproduced, stored in a retrieval system or transmitted in any form or by any means — electronic, photocopying, recording or otherwise — without prior written permission from BSI.

This does not preclude the free use, in the course of implementing the standard, of necessary details such as symbols, and size, type or grade designations. If these details are to be used for any other purpose than implementation then the prior written permission of BSI must be obtained.
