BSI Standards Publication

Austenitic manganese steel castings

bsi.

...making excellence a habit.™

National foreword

This British Standard is the UK implementation of ISO 13521:2015.

The UK participation in its preparation was entrusted to Technical Committee ISE/111, Steel Castings and Forgings.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TC 17, *Steel*, Subcommittee SC 11, *Steel castings*.

This second edition cancels and replaces the first edition (ISO 13521:1999), which has been technically revised with the following changes:

- [6.3](#) was revised;
- [Clause 8](#) was revised;
- [Table 1](#), grade number was added.

Austenitic manganese steel castings

1 Scope

This International Standard specifies austenitic manganese cast steels for wear-resistant service. The grades covered by this International Standard will experience maximum service life in applications where the surface of the casting is subject to impact.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 4990, *Steel castings — General technical delivery requirements*

ISO 7438, *Metallic materials — Bend test*

ISO 6506 (all parts), *Metallic materials — Brinell hardness test*

3 General conditions of delivery

Materials furnished according to this International Standard shall conform to the applicable requirements of ISO 4990, including the supplementary requirements that are agreed in the inquiry and purchase order.

4 Heat treatment

Grade GX90MnMo14 can be supplied without heat treatment if the casting thickness is less than 45 mm and the carbon content is less than 0,8 %.

Where the thickness is 45 mm or greater and the carbon content is 0,8 % or greater, grade GX90MnMo14, and all other grades, shall be solution treated at temperatures not lower than 1 040 °C and quenched in water.

5 Chemical composition

The steel shall conform to the requirements for chemical composition specified in [Table 1](#).

Table 1 — Chemical composition, in % by mass

Grade designation		C	Si	Mn	P max.	S max.	Cr	Mo	Ni
Name	Number								
GX120MnMo7-1	1.3415	1,05	0,3	6,0	0,060	0,045		0,9	
		1,35	0,9	8,0				1,2	
GX110MnMo13-1	1.3416	0,75	0,3	11,0	0,060	0,045		0,9	
		1,35	0,9	14,0				1,2	
GX100Mn13 ^a	1.3406	0,90	0,3	11,0	0,060	0,045			
		1,05	0,9	14,0					
GX120Mn13 ^a	1.3802	1,05	0,3	11,0	0,060	0,045			
		1,35	0,9	14,0					
GX120MnCr13-2	1.3410	1,05	0,3	11,0	0,060	0,045	1,5		
		1,35	0,9	14,0			2,5		
GX120MnNi13-3	1.3425	1,05	0,3	11,0	0,060	0,045			3,0
		1,35	0,9	14,0				4,0	
GX120Mn18 ^a	1.3407	1,05	0,3	16,0	0,060	0,045			
		1,35	0,9	19,0					
GX90MnMo14	1.3417	0,70	0,3	13,0	0,070	0,045		1,0	
		1,00	0,6	15,0				1,8	
GX120MnCr18-2	1.3411	1,05	0,3	16,0	0,060	0,045	1,5		
		1,35	0,9	19,0			2,5		

^a These grades are sometimes used for non-magnetic service.

6 Mechanical tests

6.1 General

Mechanical tests at room temperature shall be performed when agreed upon between the purchaser and manufacturer.

6.2 Bend test

Bend tests shall be carried out in accordance with ISO 7438. The type and location of bend test pieces shall be agreed between the manufacturer and purchaser. The test specimen shall withstand bending at room temperature (18 °C to 28 °C) through 150 °C without breaking into two or more pieces. Surface cracks produced by bending are not considered as failure if the test specimen remains in one piece.

6.3 Hardness test

Hardness tests shall be carried out in accordance with ISO 6506. The hardness shall be a maximum of 300 HBW, unless otherwise agreed between the manufacturer and purchaser. When machining of castings is required, it might be necessary to control hardness. In this case, hardness tests shall be carried out after heat treatment and prior to machining.

7 Microstructure

Metallographic examination shall be performed when agreed upon between the manufacturer and purchaser. Standard microstructure charts can be agreed between the manufacturer and purchaser.

8 Supplementary requirements

A list of normative supplementary requirements for use at the discretion of the purchaser is included in ISO 4990.

Others, whether or not in ISO 4990, can be used with this specification upon agreement between the manufacturer and purchaser.

British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

PLUS is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup.com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email bsmusales@bsigroup.com.

BSI Group Headquarters

389 Chiswick High Road London W4 4AL UK

Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.

Copyright

All the data, software and documentation set out in all British Standards and other BSI publications are the property of and copyrighted by BSI, or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use. Except as permitted under the Copyright, Designs and Patents Act 1988 no extract may be reproduced, stored in a retrieval system or transmitted in any form or by any means – electronic, photocopying, recording or otherwise – without prior written permission from BSI.
