

BS ISO 14132-3:2014

BSI Standards Publication

# Optics and photonics — Vocabulary for telescopic systems

Part 3: Terms for telescopic sights

**bsi.**

...making excellence a habit.™

**National foreword**

This British Standard is the UK implementation of ISO 14132-3:2014.

The UK participation in its preparation was entrusted to Technical Committee CPW/172, Optics and Photonics.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword — Supplementary information](#).

The committee responsible for this document is ISO/TC 172, *Optics and photonics*, Subcommittee SC 4, *Telescopic systems*.

This second edition cancels and replaces the first edition (ISO 14132-3:2002), which has been technically revised.

ISO 14132 consists of the following parts, under the general title *Optics and photonics — Vocabulary for telescopic systems*:

- *Part 1: General terms and alphabetical indexes of terms in ISO 14132*
- *Part 2: Terms for binoculars, monoculars and spotting scopes*
- *Part 3: Terms for telescopic sights*
- *Part 4: Terms for astronomical telescopes*
- *Part 5: Terms for night vision devices*

# Optics and photonics — Vocabulary for telescopic systems —

## Part 3: Terms for telescopic sights

### 1 Scope

This part of ISO 14132 applies to telescopic sights used on hand-held firearms and airguns and gives terms and definitions for telescopic sights only.

The alphabetical indexes of terms in English, French, Russian, and German that are common for all published parts of ISO 14132 are published in ISO 14132-1.

The definitions can be changed, if required, by introducing derivative attributes into them, revealing the meanings of the terms used, showing the objects covered by the scope of the notion being defined. These changes will not affect the scope and contents of this part of ISO 14132.

**NOTE** In addition to terms used in the three official ISO languages (English, French, and Russian), this part of ISO 14132 gives the equivalent terms and definitions in the German language; these are published under the responsibility of the member body for Germany (DIN). However, only the terms and definitions given in the official languages can be considered as ISO terms and definitions.

### 2 Terms and definitions

#### 2.1

##### **telescopic sight**

telescopic observational instrument which is mounted on hand-held firearms and airguns and used for sighting

#### 2.2

##### **main tube**

main body of a *telescopic sight* (2.1)

#### 2.3

##### **central tube**

in most cases slimmest part of a *telescopic sight* (2.1) located between eyepiece and objective cell

#### 2.4

##### **objective tube**

straight, mostly cylindrical part of the *main tube* (2.2) in which the objective housing is mounted

#### 2.5

##### **parallax**

angular deviation between the *aiming points* (2.12) for on-axis and off-axis observation

#### 2.6

##### **parallax-free distance**

object distance for which the shift between the image of an object and the axial position of the reticle becomes imperceptible for on-axis and off-axis observations

Note 1 to entry: In the above case, the angular deviation for off-axis observation is zero.

#### 2.7

##### **elevation adjustment**

system to adjust the relative position of the object image and the reticle in vertical direction

**2.8**  
**windage adjustment**  
system to adjust the relative position of the object image and the reticle in horizontal direction

**2.9**  
**reticle adjustment range**  
independent adjustment range for the relative position of object image and the reticle in each of the two perpendicular directions for windage and elevation corrections

**2.10**  
**reticle tracking**  
angular deviation between the reticle adjustment axes (elevation and windage) and the axes that are defined by the reticle lines

**2.11**  
**aiming mark**  
structural part of the reticle which is used for aiming

Note 1 to entry: Note that besides the term “aiming mark” in some languages (but not in English) there exists a special term for the hunting style type of aiming mark, e.g. in German “Absehen”, “Abkommen”.

**2.12**  
**aiming point**  
point on an object which corresponds with the *aiming mark* ([2.11](#))

**2.13**  
**first image plane**  
image plane of the objective

**2.14**  
**second image plane**  
image plane of the erecting system

**2.15**  
**subtension value**  
**subtension measure**  
equivalent of a measure of the *aiming mark* ([2.11](#)) in the object plane

**2.16**  
**point of impact**  
point where the bullet actually hits the target

**2.17**  
**shift of point of impact**  
**sighting in**  
action to eliminate the deviation of *point of impact* ([2.16](#)) from line of sight

**2.18**  
**line of sight shift**  
displacement of the line of sight due to zooming or focusing

**2.19**  
**image jump**  
shift of the *aiming point* ([2.12](#)) due to a toggle of the position or change in the movement direction of the magnification changer

**2.20**  
**zoom riflescope**  
*telescopic sight* ([2.1](#)) with continuously changeable magnification

**2.21**

**eye relief range**

distance range from the vertex of the last optical surface to the eye's pupil over which the full field of view can be overlooked without noticeable vignetting

Note 1 to entry: For telescopic sights an eye pupil diameter of 3 mm (representing daylight conditions) is assumed.

# British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

## About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

## Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at [bsigroup.com/standards](http://bsigroup.com/standards) or contacting our Customer Services team or Knowledge Centre.

## Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at [bsigroup.com/shop](http://bsigroup.com/shop), where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

## Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to [bsigroup.com/subscriptions](http://bsigroup.com/subscriptions).

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

**PLUS** is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit [bsigroup.com/shop](http://bsigroup.com/shop).

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email [bsmusales@bsigroup.com](mailto:bsmusales@bsigroup.com).

## BSI Group Headquarters

389 Chiswick High Road London W4 4AL UK

## Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.

## Copyright

All the data, software and documentation set out in all British Standards and other BSI publications are the property of and copyrighted by BSI, or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use. Except as permitted under the Copyright, Designs and Patents Act 1988 no extract may be reproduced, stored in a retrieval system or transmitted in any form or by any means – electronic, photocopying, recording or otherwise – without prior written permission from BSI. Details and advice can be obtained from the Copyright & Licensing Department.
