Road vehicles — Communication between vehicle and external equipment for emissions-related diagnostics

Part 7: Data link security

bsi.

...making excellence a habit.™

National foreword

This British Standard is the UK implementation of ISO 15031-7:2013.

The UK participation in its preparation was entrusted to Technical Committee AUE/16, Electrical and electronic equipment.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents.

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committee responsible for this document is ISO/TC 22, *Road vehicles*, Subcommittee SC 3, *Electrical and electronic equipment*.

This second edition cancels and replaces the first edition (ISO 15031-7:2001) of which has been technically revised.

ISO 15031 consists of the following parts, under the general title *Road vehicles — Communication between vehicle and external equipment for emissions-related diagnostics*:

- *Part 1: General information and use case definition*
- *Part 2: Guidance on terms, definitions, abbreviations and acronyms*
- *Part 3: Diagnostic connector and related electrical circuits, specification and use*
- *Part 4: External test equipment*
- *Part 5: Emissions-related diagnostic services*
- *Part 6: Diagnostic trouble code definitions*
- *Part 7: Data link security*

Introduction

0.1 Overview

ISO 15031 consists of a number of parts which, taken together, provide a coherent self-consistent set of specifications to facilitate emissions-related diagnostics. ISO 15031-1 provides an introduction to the series of International Standards. ISO 15031-2 through ISO 15031-7 are based on Society of Automotive Engineers (SAE) recommended practices. This part of ISO 15031 is based on SAE J2186:1996, *E/E Data Link Security*.

The ISO 15031 document set includes the communication between the vehicle's On-Board Diagnostics (OBD) systems and test equipment implemented across vehicles within the scope of the legislated emissions-related OBD.

To achieve this, it is based on the Open Systems Interconnection (OSI) Basic Reference Model in accordance with ISO/IEC 7498-1 and ISO/IEC 10731, which structures communication systems into seven layers. When mapped on this model, the services specified by ISO 15031 are broken into the following:

- Diagnostic services (layer 7), specified in:
 - ISO 15031-5 (emissions-related OBD);
 - ISO 27145-3 (WWH-OBD);
- Presentation layer (layer 6), specified in:
 - ISO 15031-2, SAE J1930-DA;
 - ISO 15031-5, SAE J1979-DA;
 - ISO 15031-6, SAE J2012-DA;
 - ISO 27145-2, SAE J2012-DA;
- Session layer services (layer 5), specified in:
 - ISO 14229-2 supports ISO 15765-4 DoCAN and ISO 14230-4 DoK-Line protocols;
 - ISO 14229-2 is not applicable to the SAE J1850 and ISO 9141-2 protocols;
- Transport layer services (layer 4), specified in:
 - DoCAN: ISO 15765-2 Transport protocol and network layer services;
 - SAE J1850: ISO 15031-5 Emissions-related diagnostic services;
 - ISO 9141-2: ISO 15031-5 Emissions-related diagnostic services;
 - DoK-Line: ISO 14230-4, ISO 15031-5 Emissions-related diagnostic services;
- Network layer services (layer 3), specified in:
 - DoCAN: ISO 15765-2 Transport protocol and network layer services;
 - SAE J1850: ISO 15031-5 Emissions-related diagnostic services;
 - ISO 9141-2: ISO 15031-5 Emissions-related diagnostic services;
 - DoK-Line: ISO 14230-4, ISO 15031-5 Emissions-related diagnostic services;
- Data link layer (layer 2), specified in:
 - DoCAN: ISO 15765-4, ISO 11898-1, ISO 11898-2;

- SAE J1850;
- ISO 9141-2;
- DoK-Line: ISO 14230-2;
- Physical layer (layer 1), specified in:
 - DoCAN: ISO 15765-4, ISO 11898-1, ISO 11898-2;
 - SAE J1850;
 - ISO 9141-2;
 - DoK-Line: ISO 14230-1;

in accordance with [Table 1](#).

Table 1 — Legislated emissions-related OBD/WWH-OBD diagnostic specifications applicable to the OSI layers

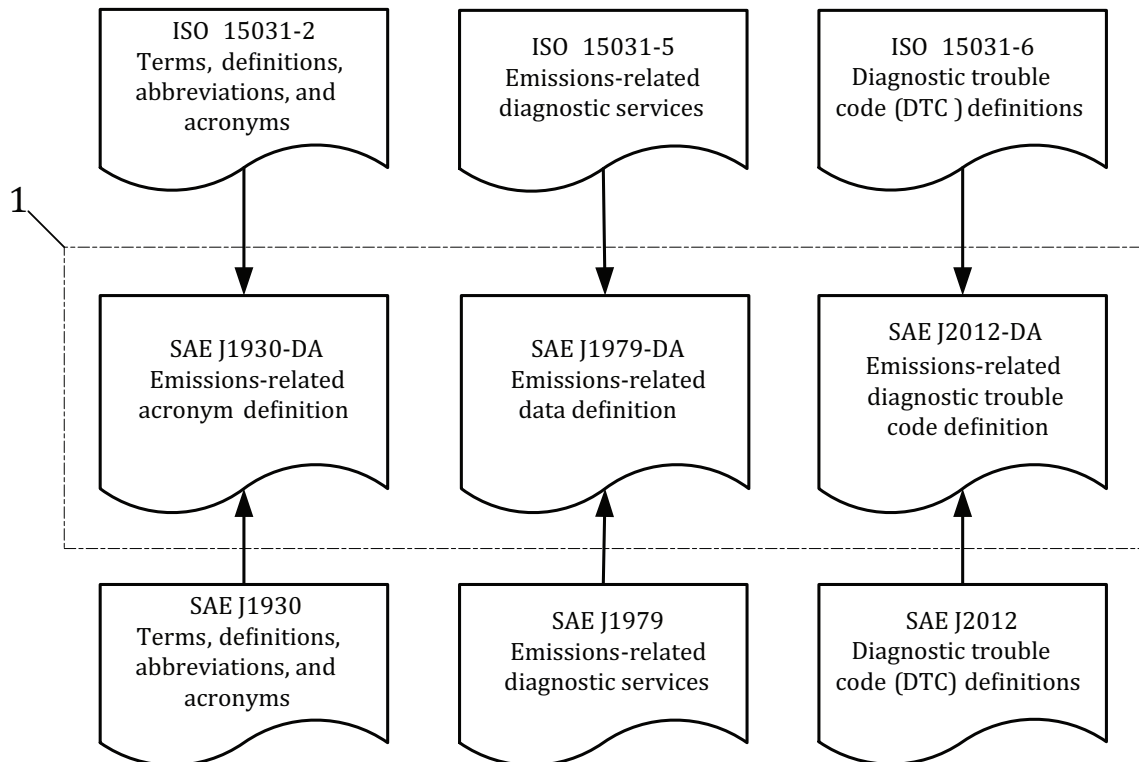

Applicability	OSI 7 layers	Emissions-related OBD communication requirements					Emissions-related WWH-OBD communication requirements		
Seven layer according to ISO/IEC 7498-1 and ISO/IEC 10731	Application (layer 7)	ISO 15031-5					ISO 27145-3		
	Presentation (layer 6)	ISO 15031-2, ISO 15031-5, ISO 15031-6 SAE J1930-DA / SAE J1979-DA					ISO 27145-2 SAE J1930-DA / SAE J1979-DA		
		SAE J2012-DA					SAE J2012-DA		
	Session (layer 5)	Not Applicable		ISO 14229-2					
	Transport (layer 4)	ISO 15031-5		ISO 14230-4	ISO 15765-2	ISO 15765-4	ISO 15765-2	ISO 27145-4	ISO 13400-2
	Network (layer 3)			ISO 14230-2	ISO 11898-1		ISO 11898-1		ISO 13400-3
	Data link (layer 2)	SAE J1850	ISO 9141-2	ISO 14230-2	ISO 11898-1	ISO 15765-4	ISO 11898-1	ISO 27145-4	ISO 13400-3
Physical (layer 1)	ISO 14230-1			ISO 11898-2	ISO 11898-2				

0.2 SAE document reference concept

ISO 15031 references several SAE documents which contain all terms, data, and diagnostic trouble code (DTC) definitions.

See [Figure 1](#) with the following definition of content in ISO 15031-2, ISO 15031-5, and ISO 15031-6:

- SAE J1930: this document is concerned with a procedure for naming objects and systems and with the set of words from which names are built. It references SAE J1930-DA which contains all standardized naming objects, terms, and abbreviations.
- SAE J1979: this document is concerned with the definition of emissions-related diagnostic services (diagnostic test modes). It references SAE J1979-DA which contains all standardized data items like Parameter IDs, Test IDs, Monitor IDs, and InfoType IDs.
- SAE J2012: this document is concerned with the procedure for defining emissions-related diagnostic trouble codes. It references SAE J2012-DA which contains all standardized data items like DTCs and failure type bytes (FTBs).

Key

1 SAE Digital Annexes

Figure 1 — SAE Digital Annex document reference

OBV regulations require passenger cars and light, medium, and heavy-duty trucks to support a minimum set of diagnostic information to external (off-board) “generic” test equipment.

0.3 SAE J1979-DA (Digital Annex)

This part of ISO 15031 references the SAE J1979-DA. The SAE J1979-DA is concerned with the definitions of

- Parameter Identifiers (PIDs),
- Test Identifiers (TIDs),
- OBD Monitor Identifiers (OBDMIDs),
- Unit and Scaling Identifiers (UASIDs), and
- INFOTYPES (INFOTYPES).

0.4 SAE Digital Annex revision procedure

New emissions-related regulatory requirements drive new in-vehicle technology to lower emissions. New technology related OBD monitor data and DTCs need to be standardized to support the external (off-board) “generic” test equipment. All relevant information is proposed by the automotive industry represented by members of the appropriate SAE task force.

The revision request form and instructions for updating the Registers to ISO 15031-5 can be obtained on the Registration Authority’s website at:

<http://www.sae.org/servlets/works/committeeHome.do?comtID=TEVDS14>

The column titled “Resources” shows a document with the title: J1979-DA_Revision_Request_Form.doc. Double click on the name and you will be asked to download the document with the filename:

SAE_J1979-DA_Revision_Request_Form.doc

Fill out the revision request form with your request.

Please send an email with the completed revision request form as an attachment to:

Road vehicles — Communication between vehicle and external equipment for emissions-related diagnostics —

Part 7: Data link security

1 Scope

This part of ISO 15031 gives guidelines for the protection of road vehicle modules from unauthorized intrusion through a vehicle diagnostic data link. These security measures offer vehicle manufacturers the flexibility to tailor their security to their own specific needs and do not exclude other, additional measures.

This part of ISO 15031 applies to vehicle modules whose solid-state memory contents are able to be altered from outside the electronic module through a diagnostic data communication link. Such alteration could potentially damage a vehicle's electronics or other components, placing at risk its compliance with government legislation or the vehicle manufacturer's interests in respect of security.

2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 9141-2, *Road vehicles — Diagnostic systems — Part 2: CARB requirements for interchange of digital information*

ISO 11898-1, *Road vehicles — Controller area network (CAN) — Part 1: Data link layer and physical signalling*

ISO 11898-2, *Road vehicles — Controller area network (CAN) — Part 2: High-speed medium access unit*

ISO 14229-2, *Road vehicles — Unified diagnostic services (UDS) — Part 2: Session layer services*

ISO 14230-2, *Road vehicles — Diagnostic communication over K-Line (DoK-Line) — Part 2: Data link layer*

ISO 14230-4, *Road vehicles — Diagnostic systems — Keyword Protocol 2000 — Part 4: Requirements for emission-related systems*

ISO 15031-2, *Road vehicles — Communication between vehicle and external equipment for emissions-related diagnostics — Part 2: Guidance on terms, definitions, abbreviations and acronyms*

ISO 15031-5, *Road vehicles — Communication between vehicle and external equipment for emissions-related diagnostics — Part 5: Emissions-related diagnostic services*

ISO 15031-6, *Road vehicles — Communication between vehicle and external equipment for emissions-related diagnostics — Part 6: Diagnostic trouble code definitions*

ISO 15765-2, *Road vehicles — Diagnostic communication over Controller Area Network (DoCAN) — Part 2: Transport protocol and network layer services*

ISO 15765-4, *Road vehicles — Diagnostic communication over Controller Area Network (DoCAN) — Part 4: Requirements for emissions-related systems*

ISO 27145-2, *Road vehicles — Implementation of World-Wide Harmonized On-Board Diagnostics (WWH-OBD) communication requirements — Part 2: Common data dictionary*

ISO 27145-3, *Road vehicles -- Implementation of World-Wide Harmonized On-Board Diagnostics (WWH-OBD) communication requirements — Part 3: Common message dictionary*

ISO/IEC 10731, *Information technology — Open Systems Interconnection — Basic Reference Model — Conventions for the definition of OSI services*

SAE J1850-DA, *Digital Annex of Class B Data Communications Network Interface*

SAE J1930-DA, *Digital Annex of Electrical/Electronic Systems Diagnostic Terms, Definitions, Abbreviations, and Acronyms*

SAE J1979-DA, *Digital Annex of E/E Diagnostic Test Modes*

SAE J2012-DA, *Digital Annex of Diagnostic Trouble Code Definitions and Failure Type Byte Definitions*

3 Terms, definitions, and abbreviated terms

For the purposes of this document, the terms and definitions given in ISO 15031-2 and the following apply.

3.1 Terms and definitions

3.1.1

unsecured functions

standard diagnostic functions provided by the vehicle manufacturer and controlled and protected by the on-board controller

EXAMPLE Reprogramming of selected items such as the clearing of fault codes.

3.1.2

secured functions

restricted functions whose access requires unlocking the on-board controller

EXAMPLE Programming of vehicle emission systems such as fuel/ignition maps, anti-theft systems, and odometer.

3.1.3

seed

pseudorandom data value sent from the on-board controller to the external test equipment and processed by the security algorithm to produce the key

3.1.4

key

data value giving access to the secured functions sent from the external test equipment to the on-board controller in response to the seed

3.1.5

false access attempt

FAA

incorrect key received by the on-board controller

3.1.6

delay time

DT

time period inserted between access attempts

3.2 Abbreviated terms

DT delay time

FAA false access attempt

4 Conventions

ISO 15031 is based on the conventions specified in the OSI Service Conventions (ISO/IEC 10731) as they apply for diagnostic services.

5 Document overview

[Figure 2](#) illustrates the emissions-related OBD on ISO 15765-4, SAE J1850, ISO 9141-2, and ISO 14230-4 document reference. The protocol initialization identifies whether ISO 15765-4 DoCAN, SAE J1850, ISO 14230-4 DoK-Line, or ISO 9141-2 is the data link layer supported by the vehicle. ISO 15031 references the International Standards as an applicable data link for emissions-related OBD.

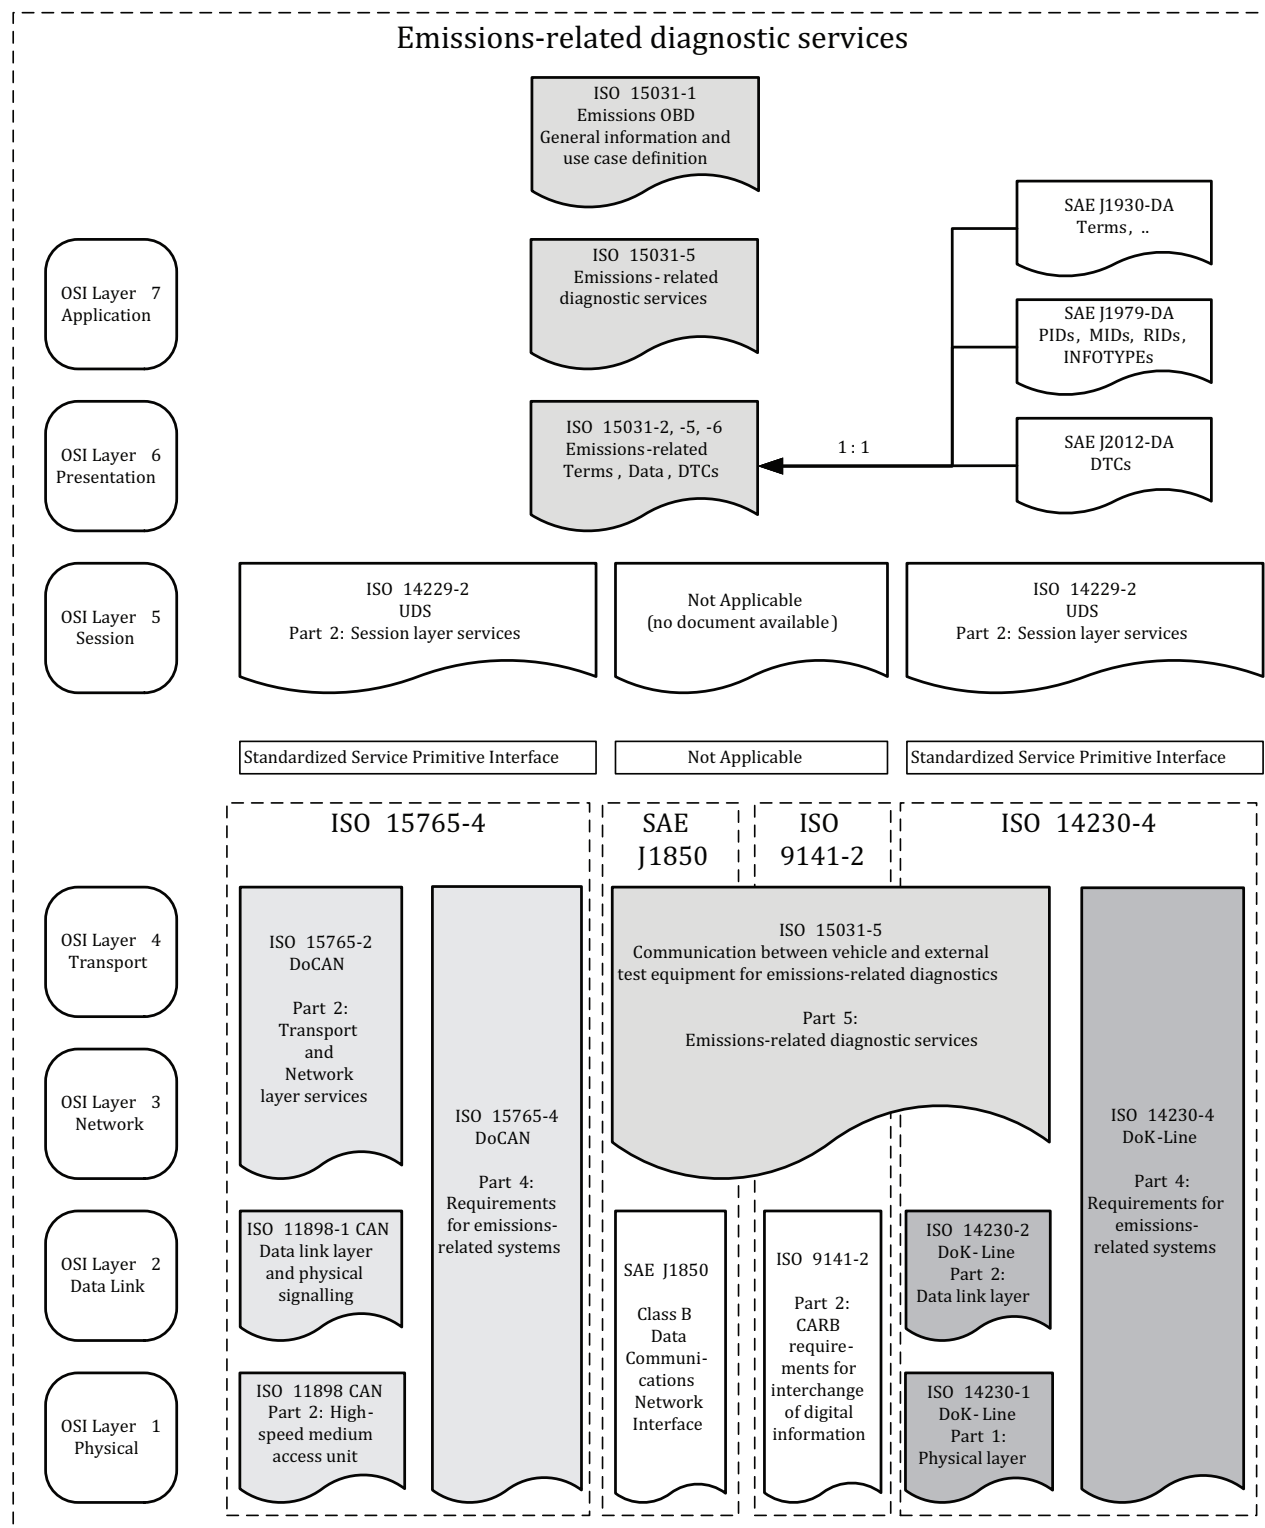

Figure 2 — Emissions-related OBD on ISO 15765-4, SAE J1850, ISO 9141-2, and ISO 14230-4 document reference according to the OSI model

6 Technical requirements

6.1 General

The unlocking of the on-board controller shall be a prerequisite for accessing certain critical on-board control functions.

NOTE This part of ISO 15031 does not specify the functions or information to be secured, leaving this to the vehicle manufacturer.

The only access permitted to the on-board controller when a function is locked shall be through the product-specific software, thus permitting the software to protect itself and the rest of the vehicle control system from unauthorized intrusion. Different on-board functions may be protected by separate seed-key combinations.

The security measures shall not prevent normal diagnostic communications between the external device and the on-board controller.

6.2 Security characteristics

The security measure may be incorporated in any communications protocol. Special commands shall be provided via the diagnostics communication link for unlocking the on-board controller.

Disclosure of the seed-key relationship and size should be limited to persons authorized by the vehicle manufacturer.

6.3 Security implementation

An example implementation of security access can be found in ISO 14229-1.

British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

PLUS is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup.com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email bsmusales@bsigroup.com.

BSI Group Headquarters

389 Chiswick High Road London W4 4AL UK

Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.

Copyright

All the data, software and documentation set out in all British Standards and other BSI publications are the property of and copyrighted by BSI, or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use.
