National foreword

This British Standard is the UK implementation of ISO 17246:2010. It supersedes BS ISO 17246:2005 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee PTI/16, Solid mineral fuels.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 17246 was prepared by Technical Committee ISO/TC 27, *Solid mineral fuels*, Subcommittee SC 5, *Methods of analysis*.

This second edition cancels and replaces the first edition (ISO 17246:2005), of which it constitutes a minor revision. (It also incorporates the Technical corrigendum ISO 17246:2005/Cor.1:2006.)

Coal — Proximate analysis

1 Scope

This International Standard establishes a practice for the proximate analysis of coal and is intended for general utilization by the coal industry to provide a basis for comparison of coals.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 562, *Hard coal and coke — Determination of volatile matter*

ISO 589, *Hard coal — Determination of total moisture*

ISO 1171, *Solid mineral fuels — Determination of ash*

ISO 1213-2, *Solid mineral fuels — Vocabulary — Part 2: Terms relating to sampling, testing and analysis*

ISO 11722, *Solid mineral fuels — Hard coal — Determination of moisture in the general analysis test sample by drying in nitrogen*

3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO 1213-2 apply.

4 Principle

Coal is analysed for content of moisture, ash and volatile matter. The fixed carbon is calculated and the results are reported, to the preferred basis, as a proximate analysis.

5 Preparation of sample

Prepare the sample in accordance with the requirements of the various test methods given in Table 1.

6 Test methods

Carry out the determination in accordance with the test methods specified in Table 1.

Table 1 — Standard test methods for proximate analysis

Parameter	Test method
Total moisture (if an “as received” reporting basis is required)	ISO 589
Moisture in air-dried sample	ISO 11722
Ash	ISO 1171
Volatile matter	ISO 562

7 Expression of results

The fixed carbon, $C_{\text{fix,ad}}$, calculated to air-dried basis and expressed as a percentage mass fraction, is given by Equation (1):

$$C_{\text{fix,ad}} = 100 - (M_{\text{ad}} + A_{\text{ad}} + V_{\text{ad}}) \quad (1)$$

where

M_{ad} is the moisture in the air-dried sample, expressed as a percentage mass fraction;

A_{ad} is the ash, calculated to an air-dried basis and expressed as a percentage mass fraction;

V_{ad} is the volatile matter, calculated to an air-dried basis and expressed as a percentage mass fraction.

The result is reported to the nearest 0,1 % mass fraction.

The fixed carbon may also be calculated to other bases using the equations in Table 2.

Table 2 — Equations for calculating the results to different bases

Basis of value given	Basis of value wanted		
	As received ^a (ar)	Air-dried (ad)	Dry ^a (d)
Parameter, P (moisture, ash or volatiles)	$P_{\text{ar}} = P_{\text{ad}} \times \frac{100 - M_{\text{ar}}}{100 - M_{\text{ad}}}$	—	$P_{\text{d}} = P_{\text{ad}} \times \frac{100}{100 - M_{\text{ad}}}$
^a Where M is the moisture content.			

For further calculations, see ISO 1170.

See Annex A for an example of proximate data reported to different bases.

8 Test report

The test report shall include the following information:

- a) reference to this International Standard, i.e. ISO 17246;
- b) identification of the sample tested;
- c) method or methods used;
- d) results and basis of reporting.

Annex A (informative)

Example of a proximate analysis

Parameter	As received (ar)	Air dried (ad)	Dry (d)
	% mass fraction	% mass fraction	% mass fraction
Total moisture, M_{ar}	8,0	—	—
Moisture in air-dried sample, M_{ad}	—	3,0	—
Ash, A	9,5	10,0	10,3
Volatile matter, V	19,0	20,0	20,6
Fixed carbon, C_{fix}	63,5	67,0	69,1
Total	100,0	100,0	100,0

British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

PLUS is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup.com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email bsmusales@bsigroup.com.

389 Chiswick High Road London W4 4AL UK

Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.

Copyright

All the data, software and documentation set out in all British Standards and other BSI publications are the property of and copyrighted by BSI, or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use. Except as permitted under the Copyright, Designs and Patents Act 1988 no extract may be reproduced, stored in a retrieval system or transmitted in any form or by any means – electronic, photocopying, recording or otherwise – without prior written permission from BSI.
