# **Coal** — **Ultimate** analysis

BS ISO 17247:2013 BRITISH STANDARD

#### National foreword

This British Standard is the UK implementation of ISO 17247:2013. It supersedes BS ISO 17247:2005 which is withdrawn.

The UK participation in its preparation was entrusted to Technical Committee PTI/16, Solid mineral fuels.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

### Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committee responsible for this document is ISO/TC 27, *Solid mineral fuels, Subcommittee SC 5, Methods of analysis.* 

This second edition cancels and replaces the first edition (ISO 17247:2005), of which it constitutes a minor revision. It also incorporates the Technical Corrigendum ISO 17247:2005/Cor. 1:2006.

### **Coal** — **Ultimate** analysis

### 1 Scope

This International Standard establishes a practice for the ultimate analysis of coal and is intended for general utilization by the coal industry to provide a basis for comparison of coals.

### 2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 334, Solid mineral fuels — Determination of total sulfur — Eschka method

ISO 351, Solid mineral fuels — Determination of total sulfur — High temperature combustion method

ISO 589, Hard coal — Determination of total moisture

ISO 609, Solid mineral fuels — Determination of carbon and hydrogen — High temperature combustion method

ISO 625, Solid mineral fuels — Determination of carbon and hydrogen — Liebig method

ISO 1171, Solid mineral fuels — Determination of ash

ISO 1213-2, Solid mineral fuels — Vocabulary — Part 2: Terms relating to sampling, testing and analysis

ISO 11722, Solid mineral fuels — Hard coal — Determination of moisture in the general analysis test sample by drying in nitrogen

ISO 19579, Solid mineral fuels — Determination of sulfur by IR spectrometry

ISO 29541, Solid mineral fuels — Determination of total carbon, hydrogen and nitrogen content — Instrumental method

### 3 Terms and definitions

For the purposes of this document, the terms and definitions and those given in ISO 1213-2 apply with one exception: the definition of "ultimate analysis" applicable is that specified below.

### 3.1

### ultimate analysis

analysis of a solid mineral fuel reported in terms of its carbon, hydrogen, nitrogen, sulfur, ash, moisture, and oxygen by difference

Note 1 to entry: This definition includes hydrogen and oxygen present in the water of constitution of the mineral matter associated with the coal substance and carbon and oxygen present in mineral carbonates.

### 3.2

### oxygen by difference

sum of carbon, hydrogen, nitrogen, sulfur, ash, and moisture of a solid mineral fuel, expressed as percent mass fraction, subtracted from 100

### 4 Principle

Coal is analysed for carbon, hydrogen, nitrogen, sulfur, ash, and moisture. The oxygen by difference is calculated and the results are reported, to the preferred basis, as an *ultimate analysis*.

### 5 Preparation of sample

Prepare the sample so that it satisfies the requirements of the various test methods (see <u>Table 1</u>).

### 6 Test methods

Carry out the determination in accordance with the test methods specified in <u>Table 1</u>.

Table 1 — Standard test methods used for ultimate analysis

Component	Classical test method	Instrumental test method
Carbon and hydrogen	ISO 609 or ISO 625	ISO 29541
Nitrogen	-	ISO 29541
Total sulfur	ISO 334 or ISO 351	ISO 19579
Ash	ISO 1171	-
Moisture in the air-dried sample	ISO 11722	-
Total moisture (if an "as received" reporting basis is required)	ISO 589	-

### 7 Expression of results

The parameters as analysed in the sample or calculated by difference, expressed as percentage mass fraction, may be calculated to different bases using the formulae in <a href="Table 2">Table 2</a>.

See Annex A for an example of ultimate data reported to different bases.

Table 2 — Formulae for calculation of results to different bases

		Reporting basis		
As analysed <sup>a</sup>	Excluding hydrogen and oxygen	oxygen from moisture	Dry	Including hydrogen and oxygen from moisture
	Air dried (ad)	As received (ar)	(d)	As received (ar,m)
Parameter (ash, ca)	Parameter (ash, carbon, nitrogen or sulfur)			
Р	$P_{\mathrm{ad}} = P$	$P_{\rm ar} = P_{\rm ad} \times \left(\frac{100 - M_{\rm ar}}{100 - M_{\rm ad}}\right)$	$P_{\rm d} = P_{\rm ad} \times \left(\frac{100}{100 - M_{\rm ad}}\right)$	$P_{\text{ar,m}} = P_{\text{ad}} \times \left(\frac{100 - M_{\text{ar}}}{100 - M_{\text{ad}}}\right)$
Hydrogen				
Н	$H_{\rm ad} = H - 0,111  9 M_{\rm ad}$	$H_{ar} = H_{ad} \times \left(\frac{100 - M_{ar}}{100 - M_{ad}}\right)$	$H_{\rm d} = H_{\rm ad} \times \left(\frac{100}{100 - M_{\rm ad}}\right)$	$H_{\text{ar,m}} = H_{\text{ad}} \times \left( \frac{100 - M_{\text{ar}}}{100 - M_{\text{ad}}} \right) + 0,1119M_{\text{ar}}$
<b>Oxygen</b> (by difference)	ıce)			
O = 100 - (C + H + N + S + A)	$O_{\rm ad} = O - 0.888 \ 1 M_{\rm ad}$ or	$O_{\rm ar} = O_{\rm ad} \times \left(\frac{100 - M_{\rm ar}}{100 - M_{\rm ad}}\right)$	$O_{\rm d} = O_{\rm ad} \times \left(\frac{100}{100 - M_{\rm ad}}\right)$	$O_{\text{ar,m}} = O_{\text{ad}} \times \left( \frac{100 - M_{\text{ar}}}{100 - M_{\text{ad}}} \right) + 0,888  1M_{\text{ar}}$
	$O_{ad} = 100 - (C_{ad} + H_{ad} + N_{ad} + S_{ad} + A_{ad} + M_{ad})$	$O_{ar} = 100 - (C_{ar} + H_{ar} + N_{ar} + S_{ar} + A_{ar})$	$O_{d} = 100 - (C_{d} + H_{d} + N_{d} + S_{d} + A_{d})$	$O_{ar,m} = 100 - (C_{ar} + H_{ar} + N_{ar} + S_{ar} + A_{ar})$
a including hydroge	including hydrogen and oxygen from moisture			

including hydrogen and oxygen from moisture

where

are the percentage mass fractions of carbon, hydrogen, nitrogen, sulfur and ash, respectively, expressed on the sample as analysed (i.e. no corrections); Note: Hydrogen and oxygen reported on the as-analysed basis include hydrogen and oxygen in the free moisture that is associated with the analysis sample. C, H, N, S, A

is the moisture content, expressed as a percentage mass fraction; M

is the oxygen by difference.

# BS ISO 17247:2013 **ISO 17247:2013(E)**

### 8 Test report

The test report shall include the following information:

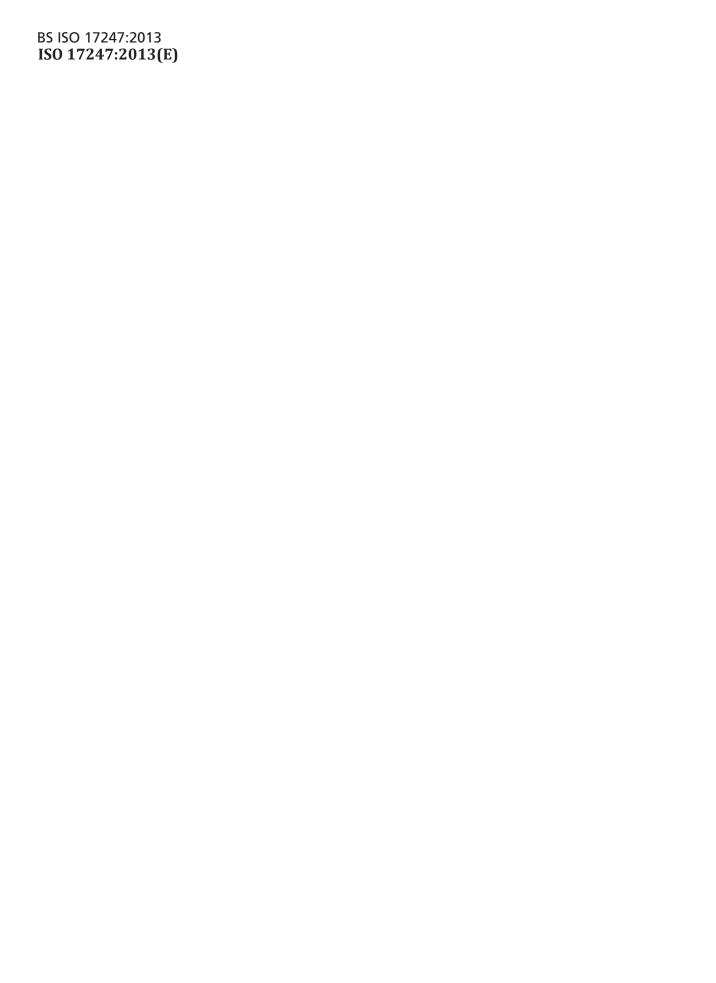

- a) reference to this International Standard, i.e. ISO 17247;
- b) identification of the coal sample tested;
- c) method or methods used;
- d) results and basis of reporting.

## Annex A

(informative)

# Ultimate analysis example

Parameter % m/m	As ana- lysed	Excluding hydrogen and oxygen from moisture Air dried (ad)	Excluding hydrogen and oxygen from moisture As received (ar)	Dry (d)	As received (ar,m)
Carbon	70,0	70,0	66,4	72,2	66,4
Hydrogen	4,34	4,00	3,79	4,12	4,69

# British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

### About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards -based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

### Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

### **Buying standards**

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

### **Subscriptions**

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

**PLUS** is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup.com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email bsmusales@bsigroup.com.

### **BSI Group Headquarters**

389 Chiswick High Road London W4 4AL UK

### **Revisions**

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.

### Copyright

All the data, software and documentation set out in all British Standards and other BSI publications are the property of and copyrighted by BSI, or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use. Except as permitted under the Copyright, Designs and Patents Act 1988 no extract may be reproduced, stored in a retrieval system or transmitted in any form or by any means – electronic, photocopying, recording or otherwise – without prior written permission from BSI.
