BSI Standards Publication

Packaging — Codification of contents for inventories for shipments of household goods and personal effects

Part 1: Numeric codification of inventories

National foreword

This British Standard is the UK implementation of ISO 17451-1:2016.

The UK participation in its preparation was entrusted to Technical Committee PKW/0, Packaging.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

The committee responsible for this document is Technical Committee ISO/TC 122, *Packaging*.

A list of all parts in the ISO 17451 series can be found on the ISO website.

This document is based upon *ANSI/HHGFAA NCC 2008-001-2010* and has been revised during the ISO standards development process. *ANSI/HHGFAA NCC 2008-001-2010* will be withdrawn upon publication.

Introduction

This document seeks to codify the components of household goods and personal effects shipments. These shipments consist of items which are for residential and/or professional use, not for commercial resale and belong to private individuals.

By codifying the components of these shipments, the international moving industry seeks to provide a common codified language, which will enable users and industry stakeholders to communicate this information regardless of their language of choice and, as a result, promote transparency and visibility for these shipments.

A secondary motivation for the development of this document is to encourage standardization and, in turn, efficiency within the industry.

Packaging — Codification of contents for inventories for shipments of household goods and personal effects —

Part 1: Numeric codification of inventories

1 Scope

This document relates to the moving of household goods and personal effects. It provides the codification of items and their condition, the transportation modes and associated data relating to a shipment. The relevant codes can be found in the related annexes and information regarding their use can be found in [Clause 4](#).

The objective of this document is to provide a common set of codes which allow movers of household goods and personal effects to exchange shipment-related information with each other and with external partners.

2 Normative references

There are no normative references cited in this document.

3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO 21067 and the following apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

3.1 inventory

complete list of items in a particular *shipment* ([3.9](#))

3.2 household goods (HHG) items

goods and personal effects normally used within private residences

Note 1 to entry: They are tangible and movable personal property found in domestic premises.

3.3 HHG packaging type

product to be used for the containment, protection, handling, delivery, storage, and transport of a HHG item

3.4 method of preparation of HHG items

status of HHG items when control is transferred to the moving company

3.5 mode

means by which a *shipment* ([3.9](#)) is transported from origin to destination including storage

3.6
location

place where household goods can be found in the domestic premises

3.7
exception

suspected or actual damage or irregularities of an HHG item or its packaging

3.8
exception location

place where an *exception* ([3.7](#)) can be found on an HHG item or its packaging

3.9
shipment

HHG items transported and/or stored under the terms of a single bill of lading, waybill, or contract of carriage irrespective of the quantity or number of containers, packages, or pieces

4 Application

The following words are used to make the distinctions within this document:

- requirements: shall, shall not;
- recommendations: should, should not;
- permissions: may, may not;
- possibility and capability: can, cannot.

The following elements are codified in this document:

- HHG items;
- packaging types;
- methods of preparation of HHG items;
- modes;
- locations;
- exceptions;
- exception locations.

The code lists have been set up in the following languages:

- English;
- French;
- German;
- Spanish.

More information on each set of codes can be found below.

4.1 HHG item codes ([Annex A](#))

The objective of [Annex A](#) is to list the items which comprise a typical Household Goods shipment and their corresponding numerical item codes.

Users shall utilize this codification in order to classify the items which constitute the shipment.

It is recommended that users should describe items with the most specific code practical, for example, “table-coffee”, “table-computer”, or “table-kitchen”. However, [Annex A](#) also provides users with the ability to classify an item as a “Generic Item”, for example, “table”, whenever the term “not further specified” follows at the next level.

Where a specific code does not exist for an item and “other” is selected, users shall provide a description of that item. For example, if users need to classify an unlisted item, they shall use the term “other” and provide details such as “African Mask”, “Cuckoo Clock”, etc. in the description.

4.2 HHG packaging type codes ([Annex B](#))

The objective of [Annex B](#) is to list the types of packaging which may be used in a Household Goods shipment and their corresponding numeric codes.

Users should utilize [Annex B](#) to classify the packaging types which have been used in the preparation of HHG items for the shipment. Multiple codes can be used to describe the packaging.

Users can describe the packaging type with a specific code, for example, “carton-book”, “carton-file”, or “carton-china”. However, [Annex B](#) also provides users with the ability to classify the packaging as “Generic”, for example, “carton”, whenever the term “not further specified” follows at the next level.

If a specific code does not exist for packaging and “other” is selected, users shall provide a description of the packaging. For example, if users classify packaging as “other”, they shall provide details such as “Steel Frame Pallet”, “Roll File Container”, etc. in the description.

4.3 Method of preparation of HHG items ([Annex C](#))

The objective of [Annex C](#) is to list the types of preparation methods of HHG items when control is transferred to the moving company and their corresponding codes.

Users should utilize [Annex C](#) to describe the method of preparation of the HHG items for transport or storage. Multiple codes can be used to describe the methods of preparation.

If a specific code does not exist for a method of preparation and “other” is selected, users shall provide a description of the method of preparation. For example, if users classify method of preparation as “other”, they shall provide details such as “Sealed by customer” in the description.

4.4 Mode codes ([Annex D](#))

The objective of [Annex D](#) is to list the types of HHG transportation modes and their corresponding codes.

Users shall utilize [Annex D](#) to describe how the shipment will be transported and/or stored from origin to destination. If multiple modes are to be used, the primary transport mode shall be stated at least.

If a specific code does not exist for a mode and “other” is selected, users shall provide a description of the mode. For example, if users classify the mode as “other”, they shall provide details such as “Helicopter” in the description.

4.5 Location codes ([Annex E](#))

The objective of [Annex E](#) is to list the places where HHG items are located in the home and the corresponding location codes.

Users may utilize [Annex E](#) to describe either or both of the places in which the HHG item was located at origin and/or where it will be placed at destination.

It is recommended that users should describe locations with the most specific code practical, for example, “bathroom-first” or “bathroom-second”. However, [Annex E](#) also provides users with the ability to classify a location as a “Generic Location”, for example, “bathroom”, whenever the term “not further specified” follows at the next level.

If a specific code does not exist for a location and “other” is selected, users shall provide a description of the location. For example, if users classify the location as “other”, they shall provide details such as “Landing”, “Prayer Room”, “Mud Room”, etc. in the description.

4.6 Exception codes ([Annex F](#))

The objective of [Annex F](#) is to list the exceptions which explain the condition of the contents within a HHG shipment and the corresponding exception codes.

Users should utilize [Annex F](#) to describe the condition of the HHG item and/or packaging at origin as well as when it was received. Multiple exceptions can be recorded.

If a specific code does not exist for an exception and “other” is selected, users shall provide a description of the exception. For example, if users classify the exception as “other”, they shall provide details such as “bowed”, “bubbled”, etc. in the description.

In the event that exceptions are identified between origin and destination, these codes should be utilized.

Note Absence of exceptions can imply good condition.

4.7 Exception location codes ([Annex G](#))

The objective of [Annex G](#) is to list the place where an exception has been identified on a HHG item or its packaging and the corresponding exception location code.

If an exception has been identified, users shall utilize [Annex G](#) to describe the location of the exception. Multiple locations can be recorded.

If a specific code does not exist for an exception location and “other” is selected, users shall provide a description of the exception location. For example, if users classify the exception location as “other”, they shall provide details such as “Hose”, etc. in the description.

4.8 Basic information

The following basic information shall be provided with the inventory:

- first and last name of the client;
- address of origin (street, town, postal code, country);
- creation date of the inventory.

The following basic information should be additionally provided with the inventory, if available:

- address of destination (street, town, postal code, country);
- date of delivery;
- for sealed container: Seal Code.

Annex A (normative)

HHG item codes

The translations in French, German and Spanish of the HHG item descriptions presented in [Annex A](#) are available at the following link:

<http://standards.iso.org/iso/17451/-1>

The user is permitted to use the translation in its original format without any modifications for the purposes specified in this document.

British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

Copyright in BSI publications

All the content in BSI publications, including British Standards, is the property of and copyrighted by BSI or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use.

Save for the provisions below, you may not transfer, share or disseminate any portion of the standard to any other person. You may not adapt, distribute, commercially exploit, or publicly display the standard or any portion thereof in any manner whatsoever without BSI's prior written consent.

Storing and using standards

Standards purchased in soft copy format:

- A British Standard purchased in soft copy format is licensed to a sole named user for personal or internal company use only.
- The standard may be stored on more than 1 device provided that it is accessible by the sole named user only and that only 1 copy is accessed at any one time.
- A single paper copy may be printed for personal or internal company use only.

Standards purchased in hard copy format:

- A British Standard purchased in hard copy format is for personal or internal company use only.
- It may not be further reproduced – in any format – to create an additional copy. This includes scanning of the document.

If you need more than 1 copy of the document, or if you wish to share the document on an internal network, you can save money by choosing a subscription product (see 'Subscriptions').

Reproducing extracts

For permission to reproduce content from BSI publications contact the BSI Copyright & Licensing team.

Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

PLUS is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup.com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email subscriptions@bsigroup.com.

Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.
