# Traditional Chinese medicine — Coding system for Chinese medicines

Part 4: Codes for granule forms of  
individual medicinals for prescriptions

**National foreword**

This British Standard is the UK implementation of ISO 18668-4:2017.

The UK participation in its preparation was entrusted to Technical Committee CH/100/1, Traditional Chinese Medicine.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 249, *Traditional Chinese medicine*.

A list of all parts in the ISO 18668 series can be found on the ISO website.

## Introduction

As the pharmaceutical materials extracted from natural and botanical products have become increasingly attractive, significant progress has been achieved in identifying new sources of natural products for traditional and alternative medicine. In particular, Chinese traditional medicine has been the focus of tremendous research, development and applications worldwide. Accordingly, Chinese medicinal materials are increasingly being used in countries around the world. Currently, there are more than 70 countries that have established administrative systems to regulate Chinese medicine. At present, the annual sale of Chinese medicines has reached more than USD 16 billion and is increasing at a rate of 10 % to 20 % per year with great future potential. At the same time, concerns of harm to the body associated with the long-term use of synthetic drugs have been recognized. Therefore, many countries are developing vigorous controls and regulations on using antibiotics and other synthetic drugs, while recognizing the importance of traditional and alternative medicines. Thus, this brings more opportunities for the development of the market of Chinese medicines.

Today, bar codes are widely used for managing almost all ordinary products that are put up for sale. For example, an eraser or a pencil has its individually identifiable bar code. Yet, so far, a bar coding system for products used in Chinese medicine has not been given sufficient attention, making it difficult to categorize individual items for international trade and research development. This brings challenges and concerns in government supervision and proper use by patients. As products for medicinal use, Chinese medicines could have bar codes that can be integrated into the current bar code system that is used for other commercial products. In this way, bar codes can be used to track sources and monitor the quality of the products. Therefore, there is an urgent need to develop a bar code system for Chinese medicine products that will enable to identify each specific Chinese medicine product.

The coding system for Chinese medicines is developed based on science and research rooted in plant taxonomy, Chinese medicine, Chinese medicinal processing, and other established regulatory handbooks and guidelines of GS1 General standard, central product classification (CPC), and ISO/IEC 15420, etc. The codes help translate complicated names of a wide variety of decoction pieces, Chinese Materia Medica (raw materials), and granule forms of individual medicinals for prescriptions into transparent digits. In this way, each Chinese medicine corresponds to a unique code as its identification.

The coding system for Chinese medicines aims to promote standardization and digitalization for Chinese medicine, to ensure authenticity, equality, fairness, and transparency in international markets and trade and to facilitate government supervision and regulation of Chinese medicine. It is hoped that it will help pharmaceutical enterprises to manage workflow and increase economic returns. It will help healthcare delivery organizations, such as hospitals and dispensaries, improve information management systems that can ensure the accuracy of dispensing, ensuring the safe and effective use of prescribed medicine.

Chinese medicines are substances or combinations of substances used under the guidance of traditional Chinese medicine (TCM) theory for medical care and the prevention and treatment of disease, including Chinese Materia Medica, decoction pieces, granule forms of individual medicinals for prescriptions (GFIMP), and Chinese patent medicines (CPM). As it has been previously acknowledged, Chinese decoction pieces are processed products of Chinese Materia Medica, which are also known as raw materials. Thus, when designing the coding system for Chinese medicines, it is feasible that one set of rules could incorporate all the features of each category of Chinese medicines, as they share the same medicinal source and medical part. To be specific, their divergence and commodity attributes can be clearly described in one of the layers (layer 8) in this set of coding rules. Granule forms of individual medicinals for prescriptions are innovative products made from decoction pieces. Based on the same considerations of feasibility and cost-control, the granular forms can be included within the same set of rules for decoction pieces.

However, although Chinese patent medicines (CPM) are made from decoction pieces, their coding rules are more complicated and differ from decoction pieces. Therefore, this coding system is not fit for CPM, and coding rules for CPM need to be formulated separately.

# Traditional Chinese medicine — Coding system for Chinese medicines —

## Part 4: Codes for granule forms of individual medicinals for prescriptions

### 1 Scope

This document encodes 777 kinds of granule forms of individual medicinals for prescriptions, according to the rules in ISO 18668-1.

This document is suitable for coding of granule forms of individual medicinals for prescriptions, as well as granule forms of individual medicinals for prescriptions in the fields of clinical medication, scientific research, teaching, statistics and management.

### 2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 18668-1, *Traditional Chinese medicine — Coding system for Chinese medicines — Part 1: Coding rules for Chinese medicines*

### 3 Terms and definitions

For the purposes of this document, the terms and definitions in ISO 18668-1 apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

- IEC Electropedia: available at <http://www.electropedia.org/>
- ISO Online browsing platform: available at <http://www.iso.org/obp>

### 4 Coding principles

#### 4.1 Uniqueness

Each variety and processed form corresponds to a unique code.

#### 4.2 Scientificity

By applying scientific research to decide the classification methods and principles, the most stable properties, attributes, and characteristics of each Chinese medicine are used as basis for classification and coding. Thus, the structure of 17 digits with 10 layers as coding rules for Chinese medicines covers the information on medicinal source, medicinal part, specification, and processing method, which respectively represent the basic characteristics, commercial attributes, and professional attributes of Chinese medicines.

### 4.3 Scalability

The coding rules allow sufficient space for expansion.

### 4.4 Compatibility

The coding rules are consistent with relevant existing International Standards.

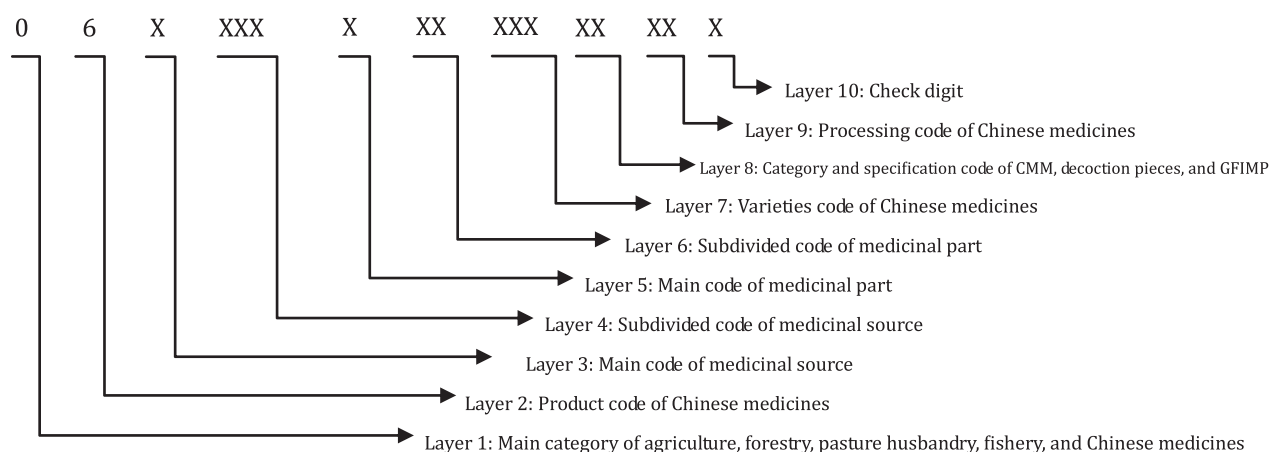

### 4.5 Stability

The code for decoction pieces remains unchanged once assigned.

The code for each Chinese medicine remains unchanged once assigned, as long as the basic characteristic of the medicinal does not change. Even if some Chinese medicines are discontinued for production and use, their codes should still be kept.

## 5 Coding structure

Coding rules are represented by 10 layers with 17-digit Arabic numerals in order. The structure is encoded according to the rules in ISO 18668-1 as shown in [Figure 1](#). See ISO 18668-1 for technical requirements.

**Figure 1 — Coding structure of Chinese medicines**

## 6 Codes for granule forms of individual medicinals for prescriptions

Codes for granule forms of individual medicinals for prescriptions are given in [Table 1](#).

Table 1 — Codes for granule forms of individual medicinals for prescriptions (777 kinds)

No.	Latin name	English name	Chinese name	Chinese phonetic alphabet (Pin Yin)	Medicinal source	Medicinal parts	Codes
30001	<i>Lycopodium Herba Granula</i>	Common Clubmoss Herb Granules	伸筋草配方颗粒	Shenjincao Pei fang ke li	<i>Lycopodium japonicum</i> Thunb.	Whole plant/ herb	06130250100109000
30002	<i>Selaginellae Herba Granula</i>	Spikemoss Granules	卷柏配方颗粒	Juan bai Pei fang ke li	(1) <i>Selaginella tamariscina</i> (Beauv.) Spring; (2) <i>Selaginella pulvinata</i> (Hook. et Grev.) Maxim.	Whole plant/ herb	06130350100109007
30003	<i>Selaginellae Tamariscinae Granula</i>	Carbonized Spikemoss Granules	卷柏炭配方颗粒	Juan bai tan Pei fang ke li	(1) <i>Selaginella tamariscina</i> (Beauv.) Spring; (2) <i>Selaginella pulvinata</i> (Hook. et Grev.) Maxim.	Whole plant/ herb	06130350100109410
30004	<i>Equisetis Hiemalis Herba Granula</i>	Common Scouring Rush Herb Granules	木贼(贼)配方颗粒	Mu zei Pei fang ke li	<i>Equisetum hyemale</i> L.	Aerial part	06130550500109007
30005	<i>Osmundae Rhizoma Granula</i>	Japanese Osmunda Rhizome Granules	紫萁贯(贯)众(眾)配方颗粒	Zi qi guan zhong Pei fang ke li	<i>Osmunda japonica</i> Thunb.	Rhizome and frond bases	06131310500109006
30006	<i>Lygodii Spora Granula</i>	Japanese Climbing Fern Spore Granules	海金沙配方颗粒	Hai jin sha Pei fang ke li	<i>Lygodium japonicum</i> (Thunb.) Sw.	Ripe spores	06131790100109000
30007	<i>Cibotii Rhizoma Granula</i>	Cibot Rhizome Granules	狗脊配方颗粒	Gou ji Pei fang ke li	<i>Cibotium barometz</i> (L.) J. Sm.	Rhizome	06131910500109008
30008	<i>Cibotii Rhizoma Aquosus Granula</i>	Scalded Cibot Rhizome Granules	烫(燙)狗脊配方颗粒	Tang gou ji Pei fang ke li	<i>Cibotium barometz</i> (L.) J. Sm.	Rhizome	06131910500109220
30009	<i>Dryopteridis Crassirhizomatis Rhizoma Granula</i>	Male Fern Rhizome Granules	绵马(馬)贯(貫)众(眾)配方颗粒	Mian ma guan zhong Pei fang ke li	<i>Dryopteris crassirhizoma</i> Nakai	Rhizome and frond bases	06134510500109007
30010	<i>Dryopteridis Crassirhizomatis Carbonisatum Granula</i>	Carbonized Male Fern Rhizome Granules	绵马(馬)贯(貫)众(眾)炭配方颗粒	Mian ma guan zhong tan Pei fang ke li	<i>Dryopteris crassirhizoma</i> Nakai	Rhizome and frond bases	06134510500109410

NOTE 1 "No." is sorted as follows: 10001 to 19999 indicate Chinese Materia Medica, 20001 to 29999 indicate decoction pieces, and 30001 to 39999 indicate granule forms of individual medicinals for prescriptions.

NOTE 2 The English names for the granule form of individual medicinals for prescriptions are written as medicinal <GFIMP> for short in this table regarding the length of the names. For example, the granule form of individual Common Clubmoss Herb for prescriptions is written as Common Clubmoss Herb <GFIMP> to save the space in the table.

Table 1 (continued)

No.	Latin name	English name	Chinese name	Chinese phonetic alphabet (Pin Yin)	Medicinal source	Medicinal parts	Codes
30011	<i>Drynariae Rhizoma Granula</i>	Fortune's <i>Drynaria</i> Rhizome Granules	骨碎补(补)配方颗粒	Gu sui bu Pei fang ke li	<i>Drynaria fortunei</i> (Kunze) J.Sm.	Rhizome	06135610500109003
30012	<i>Drynariae Rhizoma Praeparatum Granula</i>	Scalded Fortune's <i>Drynaria</i> Rhizome Granules	烫(烫)骨碎补(补)配方颗粒	Tang gu sui bu Pei fang ke li	<i>Drynaria fortunei</i> (Kunze) J.Sm.	Rhizome	06135610500109225

NOTE 1 "No." is sorted as follows: 10001 to 19999 indicate Chinese Materia Medica, 20001 to 29999 indicate decoction pieces, and 30001 to 39999 indicate granule forms of individual medicals for prescriptions.

NOTE 2 The English names for the granule form of individual medicals for prescriptions are written as medicinal <GFIMP> for short in this table regarding the length of the names. For example, the granule form of individual Common Clubmoss Herb for prescriptions is written as Common Clubmoss Herb <GFIMP> to save the space in the table.

# British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

## About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

## Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at [bsigroup.com/standards](http://bsigroup.com/standards) or contacting our Customer Services team or Knowledge Centre.

## Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at [bsigroup.com/shop](http://bsigroup.com/shop), where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

## Copyright in BSI publications

All the content in BSI publications, including British Standards, is the property of and copyrighted by BSI or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use.

Save for the provisions below, you may not transfer, share or disseminate any portion of the standard to any other person. You may not adapt, distribute, commercially exploit, or publicly display the standard or any portion thereof in any manner whatsoever without BSI's prior written consent.

## Storing and using standards

Standards purchased in soft copy format:

- A British Standard purchased in soft copy format is licensed to a sole named user for personal or internal company use only.
- The standard may be stored on more than 1 device provided that it is accessible by the sole named user only and that only 1 copy is accessed at any one time.
- A single paper copy may be printed for personal or internal company use only.

Standards purchased in hard copy format:

- A British Standard purchased in hard copy format is for personal or internal company use only.
- It may not be further reproduced – in any format – to create an additional copy. This includes scanning of the document.

If you need more than 1 copy of the document, or if you wish to share the document on an internal network, you can save money by choosing a subscription product (see 'Subscriptions').

## Reproducing extracts

For permission to reproduce content from BSI publications contact the BSI Copyright & Licensing team.

## Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to [bsigroup.com/subscriptions](http://bsigroup.com/subscriptions).

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

**PLUS** is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit [bsigroup.com/shop](http://bsigroup.com/shop).

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email [subscriptions@bsigroup.com](mailto:subscriptions@bsigroup.com).

## Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.
