

BSI Standards Publication

Financial services — Entity legal forms (ELF)

National foreword

This British Standard is the UK implementation of ISO 20275:2017.

The UK participation in its preparation was entrusted to Technical Committee IST/12, Financial services.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 68, *Financial services*.

Introduction

Understanding the legal form of an entity is an important component of financial services transactions. Entering into a business relationship requires distinguishing the type of entity that is being transacted with. Parties (and their organizational structure) involved in financial transactions need to be identified within these transactions. This is achieved while the support for straight through processing (STP) is still maintained. Standardization of the legal or organizational construct will aid flexibility and provide greater understanding of exposure to risk and access to capital.

Regulators and market participants have recognized the need to identify entity legal forms, both nationally and consistently across the global markets and have asked for a standard to be developed to meet this need.

This document fulfils the need for the identification of entity legal forms in a structured way in order, among other things, for entities to be classified according to the nature of their legal constitution. Its key provisions are that it:

- enables unique identification globally of entity legal forms;
- defines an ELF scheme that is reliable and an ELF Code that is persistent;
- defines an ELF code that contains no embedded intelligence regarding the identification of the entity legal form to which it applies;
- leverages the expertise of ISO/TC 68 in defining and maintaining identifier standards;
- defines an ELF scheme that is extensible and free from limitation on use and redistribution.

Financial services — Entity legal forms (ELF)

1 Scope

This document specifies the elements of an unambiguous scheme to identify the distinct entity legal forms in a jurisdiction. Its aim is to enable legal forms within jurisdictions to be codified and thus facilitate the classification of legal entities according to their legal form.

It is not the purpose of the document to give the comparison or alignment of entity legal forms across different jurisdictions, so as not to limit its usage and relevance.

2 Normative references

The following documents are referred to in the text in such a way that some or all of their content constitutes requirements of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 639-1, *Codes for the representation of names of languages — Part 1: Alpha-2 code*

ISO 3166-1, *Codes for the representation of names of countries and their subdivisions — Part 1: Country codes*

ISO 3166-2, *Codes for the representation of names of countries and their subdivisions — Part 2: Country subdivision code*

ISO 8601, *Data elements and interchange formats — Information interchange — Representation of dates and times*

ISO Standards Catalogue 01.140.10: *Writing and transliteration*

3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

ISO and IEC maintain terminological databases for use in standardization at the following addresses:

— ISO Online browsing platform: available at <http://www.iso.org/obp>

— IEC Electropedia: available at <http://www.electropedia.org/>

3.1

entity legal form

type of entity that an organization is considered to be within the legal or regulatory system under which it is formed

Note 1 to entry: It includes, but is not limited to, both unincorporated forms and incorporated forms.

3.2

legal entity

legal person or structure that is organized under the laws of any jurisdiction

EXAMPLE Examples of eligible entities include, without limitation:

- all financial intermediaries;
- banks and finance companies;
- all entities that issue equity, debt or other securities for other capital structures;

- all entities listed on an exchange;
- all entities that trade stock or debt, investment vehicles, including mutual funds, pension funds and alternative investment vehicles constituted as corporate entities or collective investment agreements (including umbrella funds, as well as funds under an umbrella structure, hedge funds, private equity funds, etc.);
- all entities under the purview of a financial regulator and their affiliates, subsidiaries and holding companies;
- counterparties to financial transactions.

3.3 supranational

governmental or non-governmental entity that is established by international law or treaty or incorporated at an international level

3.4 country of formation

country or collection of countries (e.g. European Union) of the legal or regulatory system under which the *Entity Legal Form* (3.1) is formed, as represented in ISO 3166-1 alpha 2

3.5 jurisdiction of formation

sub-division of a country of the legal or regulatory system under which the *Entity Legal Form* (3.1) is formed, as represented in ISO 3166-2

4 ELF Code structure

The ELF Code is an alphanumeric code of four characters from the Basic Latin character set.

Alphabetic characters are uppercase letters A to Z, without accents (e.g. À, É, Ö, Ñ) and excluding “special” characters such as blanks, separators or punctuation.

Numeric characters are integers within the range 0 to 9.

Codes comprised of solely numeric characters will be reserved and not assigned by the maintenance agency.

An ELF code contains no embedded intelligence regarding the identification of the entity legal form to which it applies. Because this document does not document the comparison or alignment of entity legal forms across different countries or jurisdictions, a unique ELF Code will be assigned for every entity legal form identified using this document.

EXAMPLE A Limited Liability Company in one country or jurisdiction may be assigned an ELF Code of D4R1 whereas an equivalent or similarly named legal form in another country/jurisdiction may be assigned an ELF Code S3E3.

5 ELF data record

The ELF data record shall be composed of the following minimum data attributes.

- Entity legal form name, formed from the following components and present for all relevant official local languages of the country and/or jurisdiction of formation:
 - local name: name of the entity legal form in its local language and character set;
 - language: language used in the local name, as represented in ISO 639-1;
 - transliterated name: the local name transliterated into basic Latin using the relevant standard as per ISO Standards Catalogue 01.140.10;

- abbreviations: commonly used abbreviations such as acronyms and truncations.
- Country of formation: As defined in 3.4, including EU or XZ for supranationals.
- Jurisdiction of formation: For use where separate legal jurisdictions exist for the formation of an entity within a country, as represented in ISO 3166-2, where applicable, or otherwise full name in basic Latin.
- Date created: Date ELF record created, as represented in ISO 8601.
- ELF status: Whether the ELF is active or inactive (i.e. the legislation has been repealed or superseded).
- Modification date: Date ELF record was modified, as represented in ISO 8601.
- Modification reason: Reason ELF record was modified.

The ELF Data Record shall be structured as follows in relation to the minimum set of data attributes.

Attribute	Cardinality ^a	Format
Entity form name	1:n	—
Local name	1:1	Free text: local character set
Known abbreviations (local language)	0:n	Free text: local character set
Language	1:1	ISO 639 Alpha 2
Transliterated name	1:1	Local pronunciation, transliterated to Basic Latin character set per ISO Standards Catalogue 01.140.10.
Known abbreviations (Basic Latin)	0:n	Free text: Basic Latin
Country of formation	1:1	ISO 3166-1 alpha 2 country code including EU; or XZ
Jurisdiction of formation	0:1	<i>Choice between:</i>
Sub-division code		ISO 3166-2 country sub-division code if it exists
Name		otherwise full name in Basic Latin
Date created	1:1	ISO 8601 (YYYY-MM-DD)
ELF status	1:1	ACTV = Active INAC = Inactive
Modification	0:n	—
Date	1:1	ISO 8601 (YYYY-MM-DD)
Reason	1:1	Free text; Basic Latin

^a Minimum occurrences: maximum occurrences (*n* = unlimited).

6 Maintenance

A maintenance agency established by the ISO council acts in accordance with procedures approved by the council. It has been entrusted with the following functions:

- a) to issue and maintain ELF codes and data records as needed;
- b) to publish and disseminate ELF codes and data records;
- c) to establish, in the normal course of work, additional rules for the practical application of the principles, for issuing and maintaining ELF codes and data records.

The name and contact details of the organization acting as the maintenance agency for this document can be found at: http://www.iso.org/iso/maintenance_agencies.htm#20275

Enquiries concerning ELF codes, including requests for new codes should be directed to the maintenance agency.

British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

Copyright in BSI publications

All the content in BSI publications, including British Standards, is the property of and copyrighted by BSI or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use.

Save for the provisions below, you may not transfer, share or disseminate any portion of the standard to any other person. You may not adapt, distribute, commercially exploit, or publicly display the standard or any portion thereof in any manner whatsoever without BSI's prior written consent.

Storing and using standards

Standards purchased in soft copy format:

- A British Standard purchased in soft copy format is licensed to a sole named user for personal or internal company use only.
- The standard may be stored on more than 1 device provided that it is accessible by the sole named user only and that only 1 copy is accessed at any one time.
- A single paper copy may be printed for personal or internal company use only.

Standards purchased in hard copy format:

- A British Standard purchased in hard copy format is for personal or internal company use only.
- It may not be further reproduced – in any format – to create an additional copy. This includes scanning of the document.

If you need more than 1 copy of the document, or if you wish to share the document on an internal network, you can save money by choosing a subscription product (see 'Subscriptions').

Reproducing extracts

For permission to reproduce content from BSI publications contact the BSI Copyright & Licensing team.

Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

PLUS is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup.com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email subscriptions@bsigroup.com.

Revisions

Our British Standards and other publications are updated by amendment or revision.

We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.
