Safety of toys — Interpretations

Part 2: Replies to requests for interpretation of the chemical standards in the EN 71-series

National foreword

This Published Document is the UK implementation of CEN/TR 15371-2:2015.

The UK participation in its preparation was entrusted to Technical Committee CW/15, Safety of toys.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

European foreword

This document (CEN/TR 13571-2:2015) has been prepared by Technical Committee CEN/TC 52 “Safety of toys”, the secretariat of which is held by DS.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN [and/or CENELEC] shall not be held responsible for identifying any or all such patent rights.

CEN/TR 15371, *Safety of toys — Interpretations*, is currently composed with the following parts:

- *Part 1: Replies to requests for interpretation of EN 71-1, EN 71-2, EN 71-8 and EN 71-14;*
- *Part 2: Replies to requests for interpretation of the chemical standards in the EN 71-series.*

At the time of publication of this report, CEN/TC 52 had only received, and replied to, a few requests for interpretation to the chemical standards in the EN 71 series.

Even though they are few, CEN/TC 52 has decided to publish the replies to these requests for interpretation in CEN/TR 13571-2 to ensure they become publically available to all stakeholders.

0 Introduction

0.1 Interpretations and no-action decisions

This Technical Report contains replies to requests for interpretations concerning the understanding of clauses in the chemical standards in the EN 71 series:

- EN 71-3: Migration of certain elements;
- EN 71-4: Experimental sets for chemistry and related activities;
- EN 71-5: Chemical toys (sets) other than experimental sets;
- EN 71-7: Finger paints — Requirements and test methods;
- EN 71-9: Organic chemical compounds — Requirements;
- EN 71-10: Organic chemical compounds — Sample preparation and extraction;
- EN 71-11: Organic chemical compounds — Methods of analysis;
- EN 71-12: N-Nitrosamines and N-Nitrosatable substances;
- EN 71-13: Olfactory board games, cosmetic kits and gustative games.

The replies concern those requests that have resulted in an interpretation or a decision that no action is required as the standard is sufficiently clear.

An interpretation does not have the same status as the text of the standard, nor can it overrule the text of the standard. However, following an interpretation should give assurance that the relevant clause of the standard has been correctly applied. An interpretation should only be regarded as a clarification of the meaning of the standard.

Disclaimer

The interpretations have been derived by expert groups of CEN/TC 52. The information contained herein is for guidance only and does not reflect the formal approval by CEN or CEN member bodies. It should be noted that the interpretations are neither part of any standard nor have been referenced in the Official Journal of the European Union.

0.2 Requests for interpretation

Requests for interpretations may be submitted by a CEN member body through its national committee or by a CEN/TC 52 liaison (but not directly by an individual or a company) - in accordance with the interpretation protocols agreed by CEN/TC 52. The requests are then channelled to the relevant CEN/TC 52 working party, which will then deal with the request.

A request for an interpretation may lead to:

- a) *An interpretation of the standard:*

This should reflect a reasonable interpretation of how the standard should be used, taking into account:

- 1) the wording of the standard;

- 2) the rationale of the standard;
- 3) the history of the standard.

b) A no-action decision:

This is applicable when it is agreed that the standard appropriately specifies how a toy shall be assessed.

c) A proposal for an amendment of the standard:

This is applicable when it is agreed that the standard is deficient in some way.

NOTE Interpretation and no-action decisions are published in CEN/TR 15371-2, which will be updated on a regular basis.

Proposals for amendments will be progressed as new work item proposals in accordance with CEN rules.

0.3 Answers to requests for interpretations

Since requests for interpretations are submitted through a CEN member body or a CEN/TC 52 liaison, it is assumed that they will keep themselves informed about decisions concerning the request and its progress and will themselves inform the originator of the request as appropriate.

1 Scope

The purpose of this Technical Report is to provide replies to requests for interpretations of actual chemical standards in the EN 71 series:

- EN 71-3: Migration of certain elements;
- EN 71-4: Experimental sets for chemistry and related activities;
- EN 71-5: Chemical toys (sets) other than experimental sets;
- EN 71-7: Finger paints — Requirements and test methods;
- EN 71-9: Organic chemical compounds — Requirements;
- EN 71-10: Organic chemical compounds — Sample preparation and extraction;
- EN 71-11: Organic chemical compounds — Methods of analysis;
- EN 71-12: N-Nitrosamines and N-Nitrosatable substances;
- EN 71-13: Olfactory board games, cosmetic kits and gustative games.

2 EN 71-3:2013, Safety of toys — Part 3: Migration of certain elements

2.1 4.1 Toy material categories - “stickers” (interpretation)

Question

The question relates to the categorization of “stickers” under 4.1 Toy material categories of EN 71-3.

Stickers are often composed of paper/plastic and glue. Sticky/liquid glue as such falls within category II of the EN 71-3 (liquid or sticky material), while paper/plastic falls within category III (scraped-off material). We have considered two situations:

- stickers already on the toy (glue is not accessible to children since the sticker is already on the toy);
- stickers provided as such to children (glue is accessible once the sticker is removed from its backing).

We would like to know whether the sticker materials in the two above cases shall be considered independently for their categorization (i.e. category II for the glue and category III for the paper) or whether the whole sticker should be considered for the categorization.

Reply

- Stickers which are already placed on the toy (glue is not accessible) should be tested as scraped-off material (polymer/paper: category III).
- Stickers provided as such to the child with possible exposure to the thin sticky part (including temporary tattoos), should also be evaluated according to category III as a whole.

REQ 001-13 (UNI, Italy)

2.2 4.1 Toy material categories - “erasers” (interpretation)

Question

The question relates to the categorization of “erasers” under 4.1 Toy material categories of EN 71-3.

Erasers classified as toys which are made of polymeric material releases some particles when used. In which toy material category should we classify erasers?

Reply

Erasers made of polymeric material and classified as toys (see commission guidance document 15) and their released particles are categorized as category III toy material.

British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at bsigroup.com/standards or contacting our Customer Services team or Knowledge Centre.

Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at bsigroup.com/shop, where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to bsigroup.com/subscriptions.

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

PLUS is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit bsigroup.com/shop.

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email bsmusales@bsigroup.com.
