## BSI Standards Publication

# Railway application — Design for PRM Use — Equipment and Components onboard Rolling Stock — Toilets

**bsi.**

...making excellence a habit.<sup>TM</sup>

**National foreword**

This Published Document is the UK implementation of CEN/TS 16635:2014.

The UK participation in its preparation was entrusted by Technical Committee RAE/1, Railway Applications, to Panel RAE/1/-/15, Railway Applications - People with Reduced Mobility.

A list of organizations represented on this committee can be obtained on request to its secretary.

This publication does not purport to include all the necessary provisions of a contract. Users are responsible for its correct application.

English Version

**Railway application - Design for PRM Use - Equipment and Components onboard Rolling Stock - Toilets**

Applications ferroviaires - Conception à l'usage des personnes à mobilité réduite - Équipements et éléments à bord du matériel roulant - Toilettes

Bahnanwendungen - Auslegung für eingeschränkt mobile Personen - Einrichtungen und Komponenten in Schienenfahrzeugen - Toiletten

This Technical Specification (CEN/TS) was approved by CEN on 26 November 2013 for provisional application.

The period of validity of this CEN/TS is limited initially to three years. After two years the members of CEN will be requested to submit their comments, particularly on the question whether the CEN/TS can be converted into a European Standard.

CEN members are required to announce the existence of this CEN/TS in the same way as for an EN and to make the CEN/TS available promptly at national level in an appropriate form. It is permissible to keep conflicting national standards in force (in parallel to the CEN/TS) until the final decision about the possible conversion of the CEN/TS into an EN is reached.

CEN members are the national standards bodies of Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and United Kingdom.

## **Foreword**

This document (CEN/TS 16635:2014) has been prepared by Technical Committee CEN/TC 256 “Railway applications”, the secretariat of which is held by DIN.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. CEN shall not be held responsible for identifying any or all such patent rights.

This document has been prepared under a mandate given to CEN by the European Commission and the European Free Trade Association.

According to the CEN-CENELEC Internal Regulations, the national standards organizations of the following countries are bound to announce this Technical Specification: Austria, Belgium, Bulgaria, Croatia, Cyprus, Czech Republic, Denmark, Estonia, Finland, Former Yugoslav Republic of Macedonia, France, Germany, Greece, Hungary, Iceland, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, Switzerland, Turkey and the United Kingdom.

## Introduction

This document is a Technical Specification for the assessment of the internal space requirements of a universal (wheelchair accessible) toilet.

This document aims to define the assessment and measuring methodology to allow a clear pass/fail assessment and allow successful implementation of the Technical Specification for Interoperability (TSI) for Persons with Reduced Mobility (PRM) [1]. Clause 5 reflects the requirements in the TSI and Clause 6 adds assessment criteria based on those requirements.

This document will be used until the issuing of EN 16585-1, *Railway applications — Design for PRM use — Equipment and components onboard rolling stock — Part 1: Toilets* [2].

## 1 Scope

This Technical Specification describes the specific 'Design for PRM use' requirements applying to rolling stock on the Trans-European Network (TEN) covered by the TSI for PRM and the assessment of those requirements. Regarding this document, the following statements apply.

- The definitions and requirements describe specific aspects of 'Design for PRM use' required by persons with reduced mobility as defined in the TSI PRM.
- The definitions and requirements of this specification will be used for rolling stock applications.
- This specification only refers to aspects of accessibility for PRM passengers; it does not define general requirements and general definitions for specific components and systems.
- This specification assumes that the vehicle is in the nominal operating condition; any damage or operating failures will not be taken into account when assessing these requirements.
- Where minimum or maximum dimensions are quoted, these are absolute NOT nominal requirements.

Measurement methods and/or assessment procedures needed to establish a clear pass/fail assessment are provided where necessary.

## 2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

EN 12183: 2014, *Manual wheelchairs - Requirements and test methods*

## 3 Terms and definitions

For the purposes of this document, the following terms and definitions apply.

### 3.1

#### **universal toilet**

toilet designed to be used by **all** passengers including passengers in wheelchairs

## 4 Symbols and abbreviations

**Table 1 — Abbreviations**

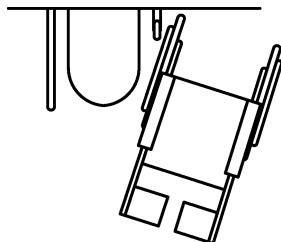

Abbreviation	Designation
PRM	Persons with Reduced Mobility
TEN	Trans-European Network
TSI	Technical Specification of Interoperability

**Table 2 — Symbols**

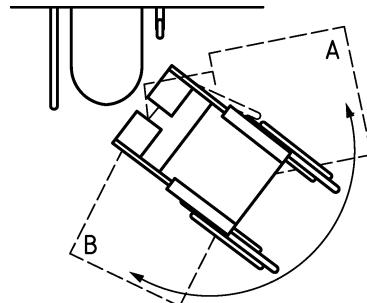

Symbol	Designation
%ile	Percentile
3D	3 Dimension

## 5 Requirements – Universal toilet dimensions

There shall be sufficient space inside the toilet compartment to enable a wheelchair as defined in Annex A to be manoeuvred to a position adjacent to the toilet seat, following both approaches shown in Figure 1.

a) Side approach

b) Diagonal approach

Figure 1 — Wheelchair positions adjacent to toilet seat

In front of the toilet seat there shall be a clear space with a minimum length of 700 mm as shown in Figure 2.

Dimensions in millimetres

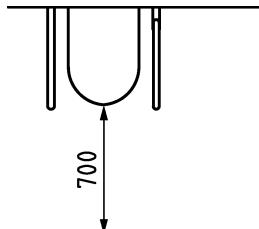

Figure 2 — Clear space in front of toilet seat

All amenities (wash basin, soap dispenser, mirror, water dispenser and hand dryer) shall be readily accessible to a person in a wheelchair.

## 6 Assessment – Universal toilet internal space

There shall be sufficient space to permit a wheelchair as defined in Annex A to be manoeuvred to a position adjacent to one side of the toilet seat to allow a side transfer as shown in Figure 3 at a position between 0° (parallel to the centreline of the toilet pan) and 40°.

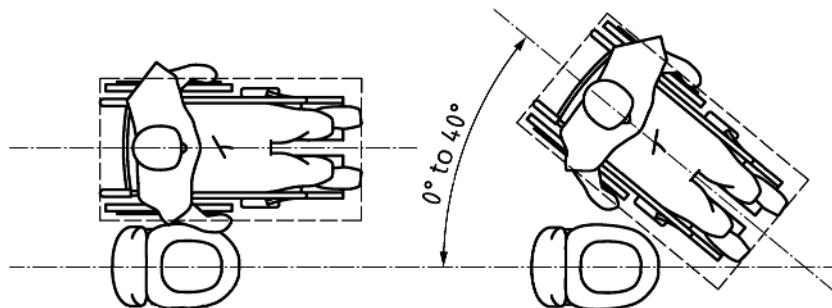

Figure 3 — Example for a lateral or side approach for right hand transfer to toilet seat

Assessment for a side approach:

- Method A: Side transfer wheelchair position is between  $0^\circ$  (parallel to pan centreline) and  $40^\circ$  with a turning circle of 1 500 mm that overlaps a rectangle of 1 250 mm  $\times$  700 mm wheelchair space envelope, see Figure 4. Across the full 700 mm side that would be the front of the wheelchair, see Figure 2. The wash basin may overlap the manoeuvring space by up to 300 mm if complying with knee and toe space requirements as in Figure B.1.

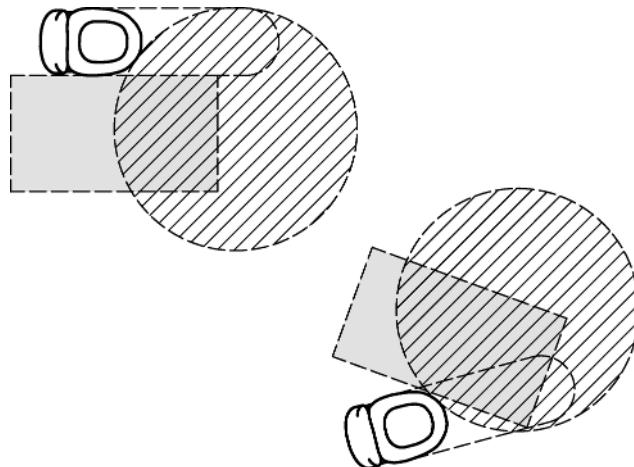

NOTE 1 Allowance for hands either side needs to be considered when assessing manoeuvring.

NOTE 2 See Figure C.3 for examples of current toilet designs with this assessment method overlaid.

- Method B: Movement through door to a position touching the toilet pan at an angle of maximum  $\pm 40^\circ$  to its centre line demonstrated through no more than five manoeuvres (after entering the toilet compartment) using the characteristics of the simplified profile of a person in a wheelchair as defined in Figure 5. The wash basin may overlap the manoeuvring space by up to 300 mm if it is complying with knee and toe space requirements in Figure B.1.

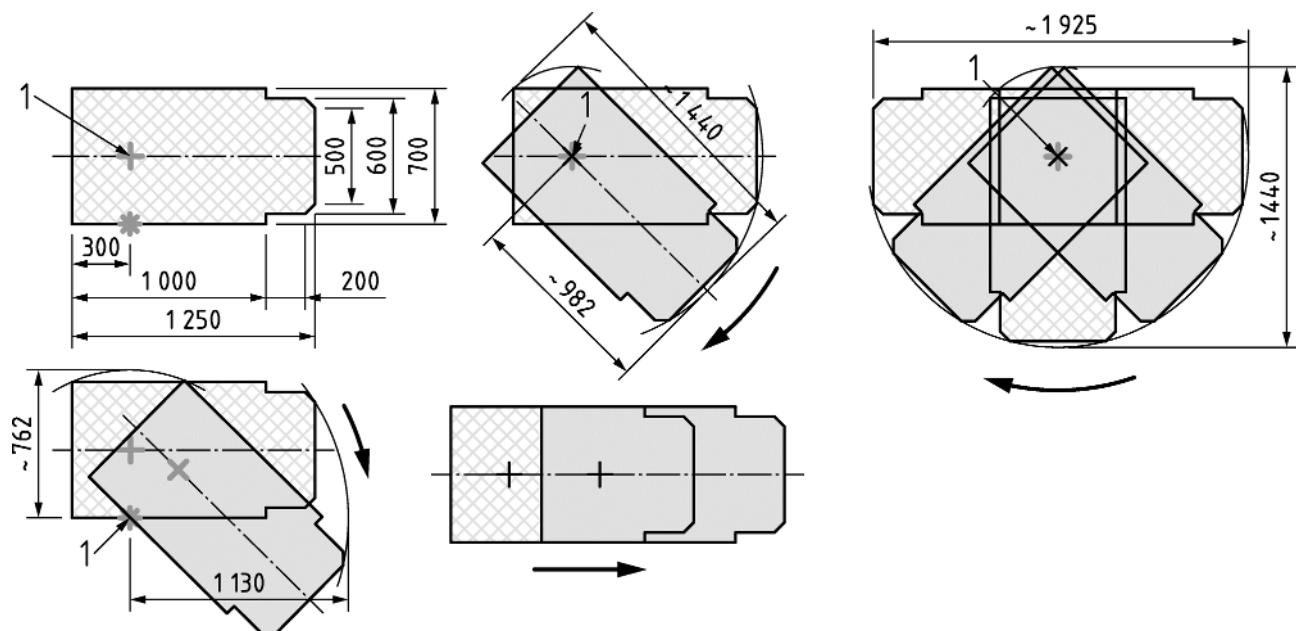

NOTE 3 Allowance for hands either side needs to be considered when assessing manoeuvring.

A curvature of up to 50 mm in radius between floor and wall is accepted, see Figure 8. Therefore when assessing compliance of the above, the measurements are permitted to be taken 50 mm above the walking floor.

**Figure 4 — Examples for method ‘A’ assessment of side approach**

Dimensions in millimetres

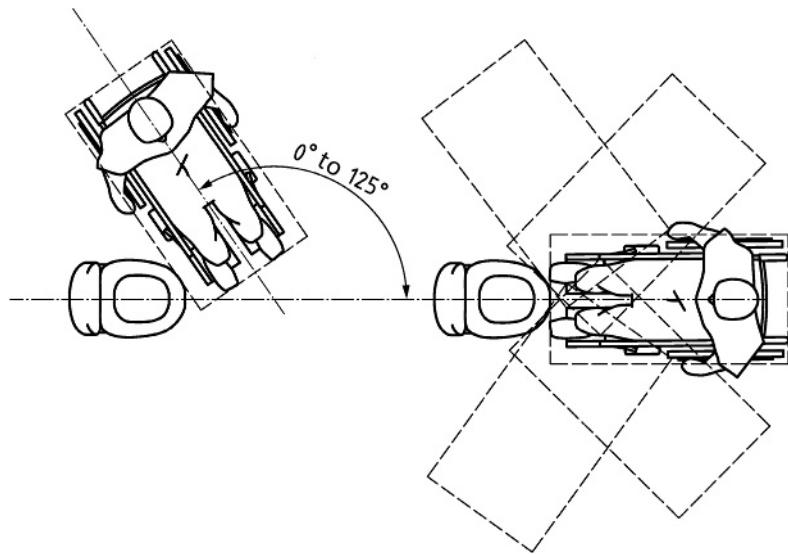

**Key**

- 1 simplified pivot points on rear wheel axis (rear wheel propelled wheelchairs)

**Figure 5 — Simplified profile of an occupied wheelchair for use in assessment method B**

There shall also be sufficient space inside the toilet compartment to enable a wheelchair as defined in Annex A to be manoeuvred to a diagonal transfer position adjacent to the toilet seat, between  $0^\circ$  (parallel to pan centreline) and  $125^\circ$ , as shown in Figure 6, diagonal approach:

**Figure 6 — Options for frontal or diagonal approach for transfer to toilet seat**

Assessment for a diagonal approach:

- Method A: The diagonal transfer wheelchair position is between  $0^\circ$  (parallel to pan centreline) and  $125^\circ$ , see Figure 6. There shall be a turning circle of 1 500 mm that overlaps a rectangle of 1 250 mm  $\times$  700 mm

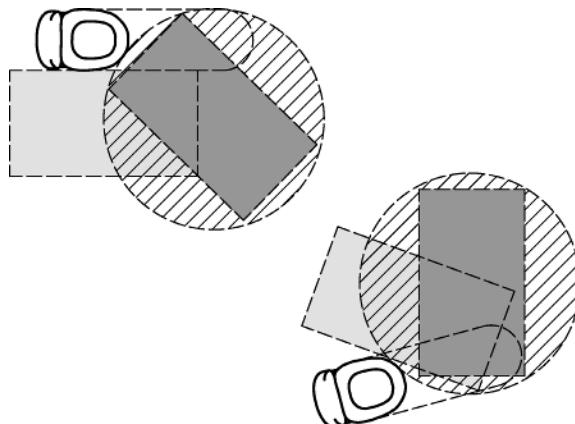

which represents the wheelchair space envelope, across the full width of the 700 mm side of the envelope, see Figure 7. The wash basin may overlap the manoeuvring space by up to 300 mm if it is compliant with the knee and toe space requirements as specified in Figure B.1.

NOTE 4 Allowance for hands either side needs to be considered when assessing manoeuvring.

- Method B: Movement through door to a position touching the toilet pan at an angle of maximum  $\pm 125^\circ$  to its centre line be demonstrated using the characteristics of the simplified profile of a person in a wheelchair, as defined in Figure 5, through five manoeuvres or fewer after entering the toilet compartment. The wash basin may overlap the manoeuvring space by up to 300 mm if complying with knee and toe space requirements in Figure B.1.

NOTE 5 Allowance needs to be made for hands on both sides when assessing manoeuvres.

A curvature of up to 50 mm in radius between floor and wall is permitted, see Figure 8. Therefore when assessing compliance with the above, the measurements are to be taken 50 mm above the floor.

**Figure 7 — Examples for method 'A' assessment of diagonal approach**

Dimensions in millimetres

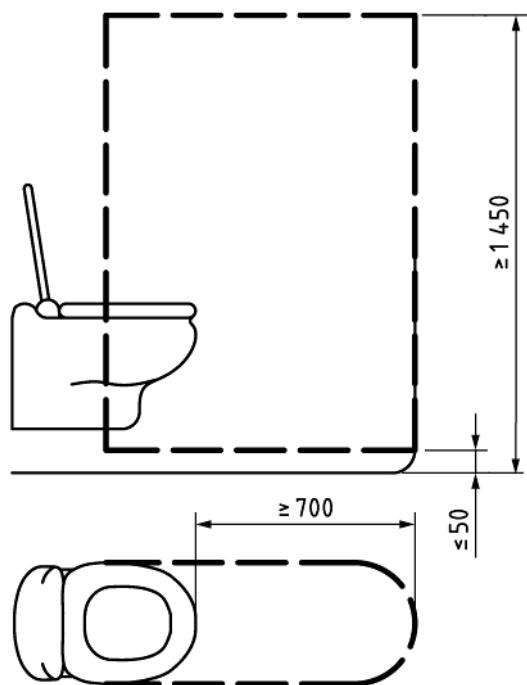

**Figure 8 — Acceptable curved surface radius between walls and floor**

In front of the toilet seat there shall be a minimum clear space of 700 mm as shown in Figure 9.

- The clear space shall be assessed horizontally from the leading edge of the toilet seat, along the centre axis of the toilet for the full width of the toilet seat from a height of 50 mm above floor to a point 1 450 mm above the floor. The assessment shall be through a drawing or 3D model at the design stage and type test.

Dimensions in millimetres

**Figure 9 — Space in front of toilet seat**

NOTE 6 700 mm as a minimum follows the front curvature of the toilet seat in its full width. An overlap of 50 mm with wash basin and/or handrail (vertical and/or horizontal) is allowed.

## Annex A (normative)

### Transportable wheelchair

#### A.1 Engineering limits

This annex identifies the maximum engineering limits for a transportable wheelchair, see also EN 12183:2014.

#### A.2 Characteristics

The minimum technical requirements are as follows.

Basic dimensions:

- width: 700 mm + 50 mm minimum each side for hands when moving;
- length: (1 200 + 50) mm for feet;
- height: 1 375 mm maximum including a 95<sup>th</sup> %ile male occupant.

Dimensions in millimetres

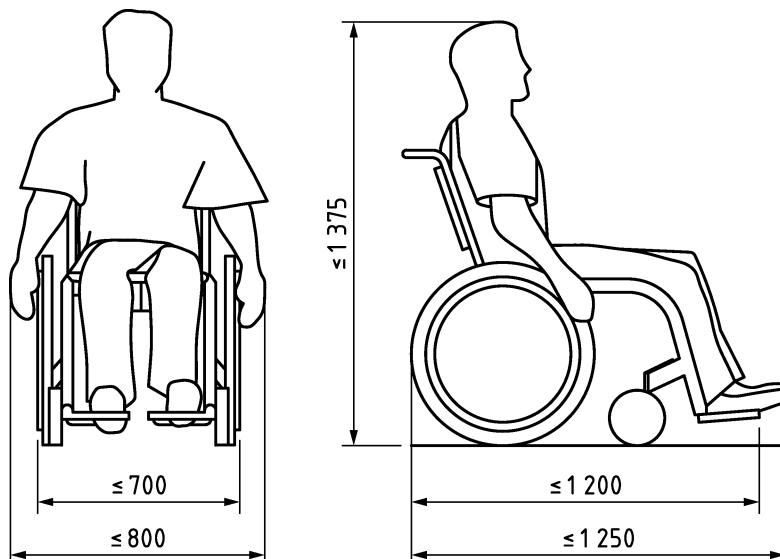

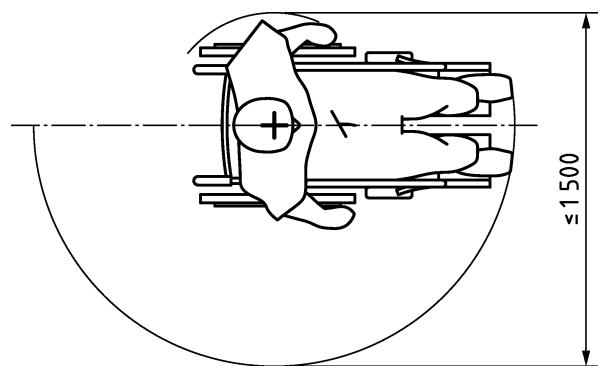

Figure A.1 — Basic dimensions

The turning circle of the wheelchair shall be included in a circle with a diameter of 1 500 mm.

Dimensions in millimetres

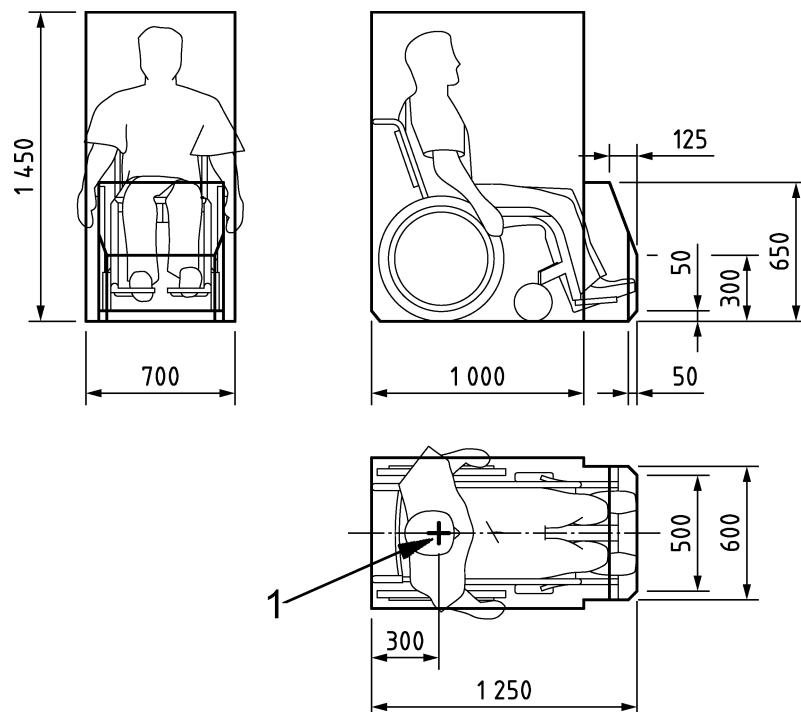

**Figure A.2 — Turning circle (turning between walls)**

## Annex B (normative)

### Simplified wheelchair profile

This annex presents simplified profiles that are usable for assessment of space requirements for a person in a transportable wheelchair.

Dimensions in millimetres

#### Key

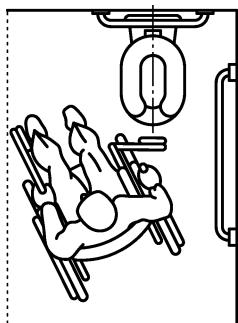

- 1 simplified central pivot point on rear wheel axis (rear wheel propelled wheelchairs)

**Figure B.1 — Simplified profile of a person in a transportable wheelchair**

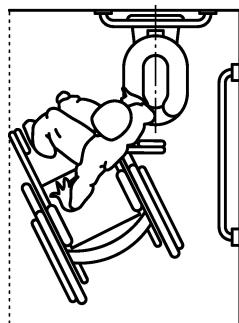

**Annex C**  
(informative)

**Wheelchair accessible toilet transfer guidance and examples**

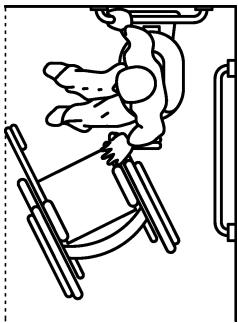

Examples of wheelchair accessible toilet guidance and good practice:

a) Takes transfer position, swings footrest out of the way, sets brakes

b) Removes armrest, transfers

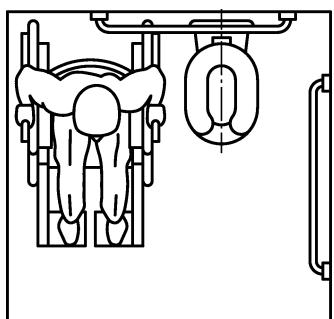

c) Moves wheelchair out of the way, changes position

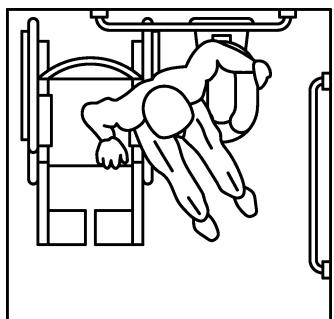

d) Positions on the toilet

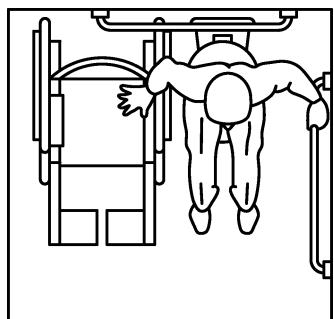

**Figure C.1 — Typical diagonal approach transfer**

a) Takes transfer position, removes armrests, sets brakes

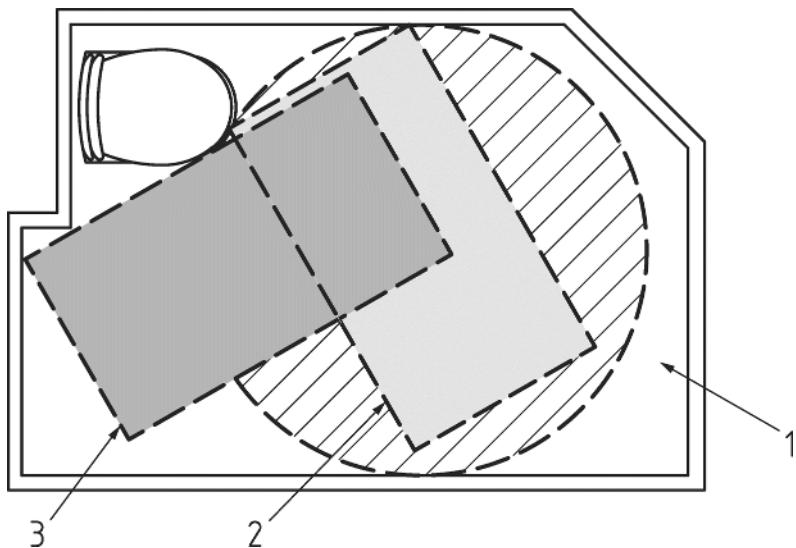

b) Transfers

c) Positions on the toilet

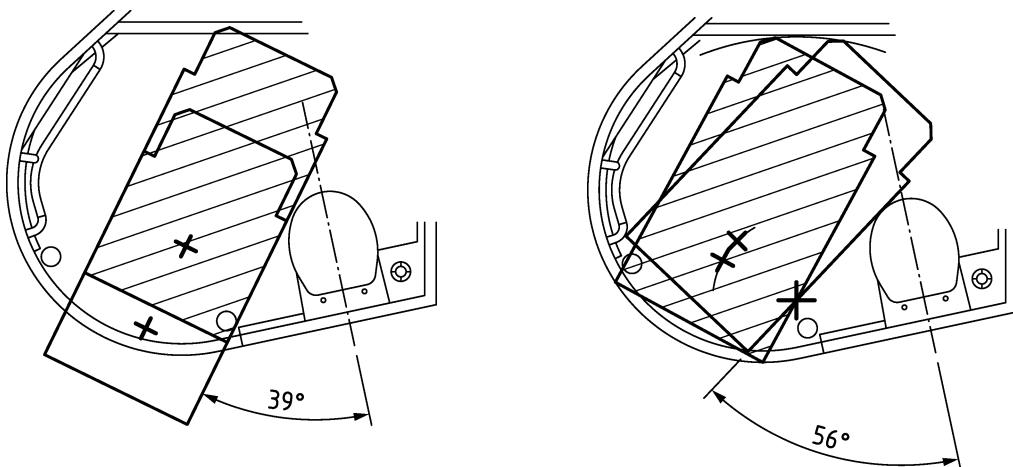

**Figure C.2 — Typical side approach transfer**

**Key**

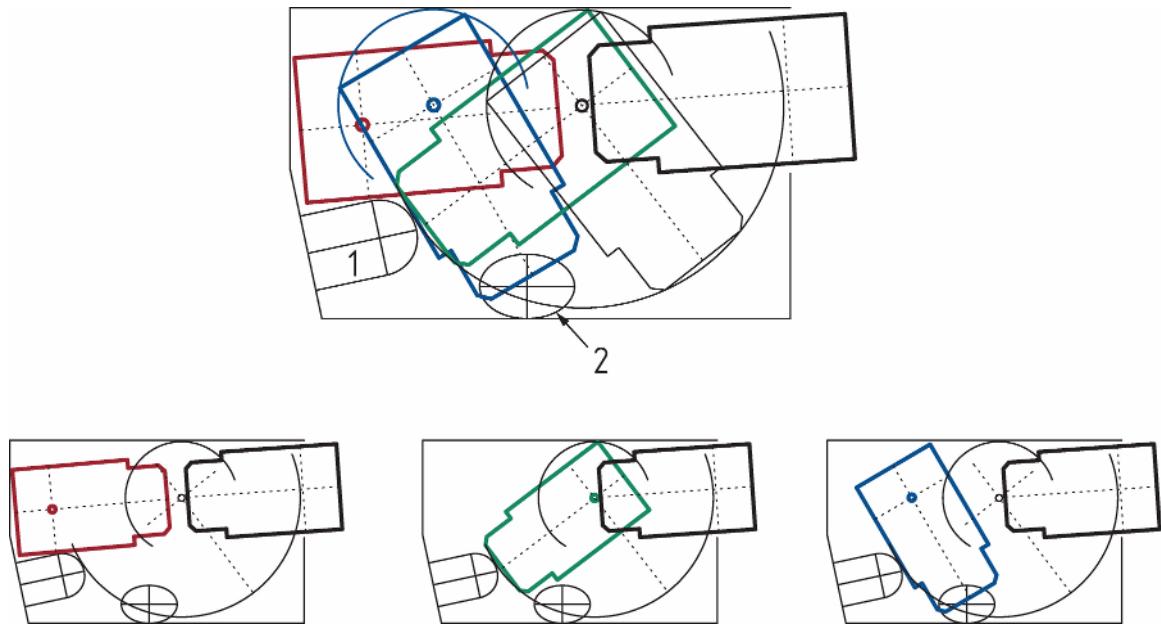

- 1 1 500 mm turning circle
- 2 diagonal transfer position
- 3 side approach position

**Figure C.3 — Example of combined transfer position assessment according to method A**

**Figure C.4 — Example of transfer position assessment according to method B in the restrictive toilet footprint that mandates method B assessment**

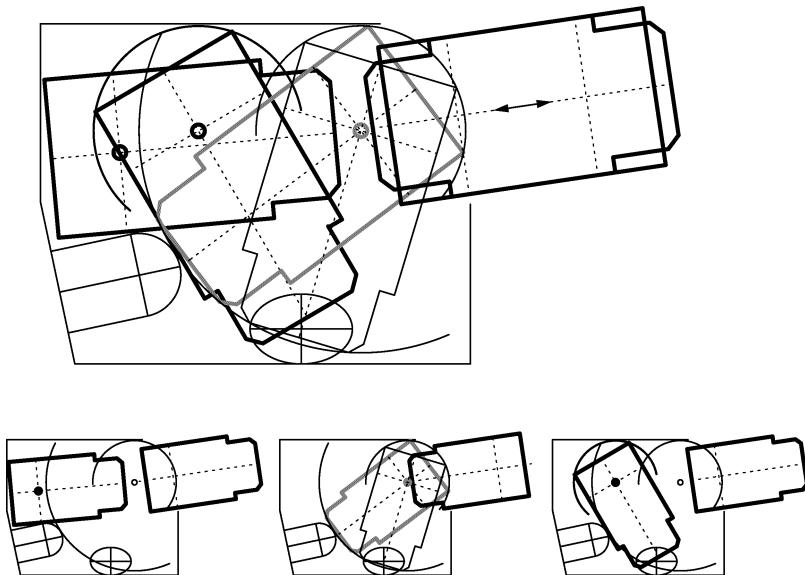

Dimensions in millimetres

**Key**

- 1 toilet seat
- 2 wash basin

**Figure C.5 — Example of transfer position assessment type B, turning inside toilet cubicle**

**Figure C.6 — Example of transfer position assessment type B, turning outside of toilet cubicle**

# British Standards Institution (BSI)

BSI is the national body responsible for preparing British Standards and other standards-related publications, information and services.

BSI is incorporated by Royal Charter. British Standards and other standardization products are published by BSI Standards Limited.

## About us

We bring together business, industry, government, consumers, innovators and others to shape their combined experience and expertise into standards-based solutions.

The knowledge embodied in our standards has been carefully assembled in a dependable format and refined through our open consultation process. Organizations of all sizes and across all sectors choose standards to help them achieve their goals.

## Information on standards

We can provide you with the knowledge that your organization needs to succeed. Find out more about British Standards by visiting our website at [bsigroup.com/standards](http://bsigroup.com/standards) or contacting our Customer Services team or Knowledge Centre.

## Buying standards

You can buy and download PDF versions of BSI publications, including British and adopted European and international standards, through our website at [bsigroup.com/shop](http://bsigroup.com/shop), where hard copies can also be purchased.

If you need international and foreign standards from other Standards Development Organizations, hard copies can be ordered from our Customer Services team.

## Subscriptions

Our range of subscription services are designed to make using standards easier for you. For further information on our subscription products go to [bsigroup.com/subscriptions](http://bsigroup.com/subscriptions).

With **British Standards Online (BSOL)** you'll have instant access to over 55,000 British and adopted European and international standards from your desktop. It's available 24/7 and is refreshed daily so you'll always be up to date.

You can keep in touch with standards developments and receive substantial discounts on the purchase price of standards, both in single copy and subscription format, by becoming a **BSI Subscribing Member**.

**PLUS** is an updating service exclusive to BSI Subscribing Members. You will automatically receive the latest hard copy of your standards when they're revised or replaced.

To find out more about becoming a BSI Subscribing Member and the benefits of membership, please visit [bsigroup.com/shop](http://bsigroup.com/shop).

With a **Multi-User Network Licence (MUNL)** you are able to host standards publications on your intranet. Licences can cover as few or as many users as you wish. With updates supplied as soon as they're available, you can be sure your documentation is current. For further information, email [bsmusales@bsigroup.com](mailto:bsmusales@bsigroup.com).

## BSI Group Headquarters

389 Chiswick High Road London W4 4AL UK

## Rewvisions

Our British Standards and other publications are updated by amendment or revision. We continually improve the quality of our products and services to benefit your business. If you find an inaccuracy or ambiguity within a British Standard or other BSI publication please inform the Knowledge Centre.

## Copyright

All the data, software and documentation set out in all British Standards and other BSI publications are the property of and copyrighted by BSI, or some person or entity that owns copyright in the information used (such as the international standardization bodies) and has formally licensed such information to BSI for commercial publication and use.
