## **Nationales Vorwort**

Dieses Dokument (EN 12440:2008) wurde vom Technischen Komitee CEN/TC 246 „Naturwerksteine“ erarbeitet, dessen Sekretariat von UNI (Italien) gehalten wird.

Das zuständige deutsche Gremium ist der Gemeinschaftsausschuss NA 062-03-11 GA „Naturwerkstein; Anforderungen, Prüfverfahren und Terminologie“ in den Normenausschüssen Materialprüfung (NMP) und Bauwesen (NABau).

### **Änderungen**

Gegenüber DIN EN 12440:2001-01 wurden folgende Änderungen vorgenommen:

- a) weitere Gesteinsbezeichnungen zu Anhang A hinzugefügt;
- b) Norm redaktionell überarbeitet.

### **Frühere Ausgaben**

DIN EN 12440: 2001-01

**Deutsche Fassung**

**Naturstein —  
Kriterien für die Bezeichnung**

Natural stone —  
Denomination criteria

Pierres naturelles —  
Critères de dénomination

Diese Europäische Norm wurde vom CEN am 25. November 2007 angenommen.

Die CEN-Mitglieder sind gehalten, die CEN/CENELEC-Geschäftsordnung zu erfüllen, in der die Bedingungen festgelegt sind, unter denen dieser Europäischen Norm ohne jede Änderung der Status einer nationalen Norm zu geben ist. Auf dem letzten Stand befindliche Listen dieser nationalen Normen mit ihren bibliographischen Angaben sind beim Management-Zentrum des CEN oder bei jedem CEN-Mitglied auf Anfrage erhältlich.

Diese Europäische Norm besteht in drei offiziellen Fassungen (Deutsch, Englisch, Französisch). Eine Fassung in einer anderen Sprache, die von einem CEN-Mitglied in eigener Verantwortung durch Übersetzung in seine Landessprache gemacht und dem Management-Zentrum mitgeteilt worden ist, hat den gleichen Status wie die offiziellen Fassungen.

CEN-Mitglieder sind die nationalen Normungsinstitute von Belgien, Bulgarien, Dänemark, Deutschland, Estland, Finnland, Frankreich, Griechenland, Irland, Island, Italien, Lettland, Litauen, Luxemburg, Malta, den Niederlanden, Norwegen, Österreich, Polen, Portugal, Rumänien, Schweden, der Schweiz, der Slowakei, Slowenien, Spanien, der Tschechischen Republik, Ungarn, dem Vereinigten Königreich und Zypern.

## **Vorwort**

Dieses Dokument (EN 12440:2008) wurde vom Technischen Komitee CEN/TC 246 „Naturwerksteine“ erarbeitet, dessen Sekretariat vom UNI gehalten wird.

Diese Europäische Norm muss den Status einer nationalen Norm erhalten, entweder durch Veröffentlichung eines identischen Textes oder durch Anerkennung bis Juli 2008, und etwaige entgegenstehende nationale Normen müssen bis Juli 2008 zurückgezogen werden.

Dieses Dokument ersetzt EN 12440:2000.

Diese Europäische Norm ist Teil einer Reihe Europäischer Normen für Natursteinprodukte einschließlich Terminologie, Prüfverfahren und Produktnormen.

Entsprechend der CEN/CENELEC-Geschäftsordnung sind die nationalen Normungsinstitute der folgenden Länder gehalten, diese Europäische Norm zu übernehmen: Belgien, Bulgarien, Dänemark, Deutschland, Estland, Finnland, Frankreich, Griechenland, Irland, Island, Italien, Lettland, Litauen, Luxemburg, Malta, Niederlande, Norwegen, Österreich, Polen, Portugal, Rumänien, Schweden, Schweiz, Slowakei, Slowenien, Spanien, Tschechische Republik, Ungarn, Vereinigtes Königreich und Zypern.

## **Einleitung**

Die internationale Vermarktung von Naturwerkstein hat eine große Zahl von Namen gebracht, um die verschiedenen Varietäten von Naturstein zu bezeichnen. Meist sind es traditionell gebräuchliche Namen, die üblicherweise einen Hinweis auf die typische Farbe oder die natürlichen Eigenschaften des Gesteins sowie den Herkunftsort, obwohl dies nicht immer zutrifft.

In einigen Fällen beinhaltet der Name einer Gesteinsvarietät Begriffe der geologischen Gesteinsklassifikation (wie Granit, Marmor, Quarzit usw.), die mit dem genauen petrographischen Namen des Natursteins übereinstimmen können oder nicht. In anderen Fällen wird der gleiche Name für die Bezeichnung unterschiedlicher Natursteine verwendet, oder ähnliche Gesteinsvarietäten werden mit unterschiedlichen Namen bezeichnet.

Ziel dieser Europäischen Norm ist es, die Kriterien für die Bezeichnung der Natursteinvarietäten unter Beibehaltung der Handelsnamen und Einführung von Bezeichnungen über seine petrographische Beschaffenheit, typische Farbe und den Herkunftsort zu vereinheitlichen.

Ein informativer Anhang enthält eine vorläufige Liste der Namen, unter denen die meisten Gesteine von jedem beteiligten europäischen Land bekannt sind, ohne Anspruch auf Vollständigkeit. Diese Liste wird in künftigen Ausgaben überarbeitet werden.

## 1 Anwendungsbereich

Diese Europäische Norm legt die Kriterien für die Bezeichnung von Naturstein vom Rohmaterial bis zu Fertigprodukten fest.

## 2 Normative Verweisungen

Die folgenden zitierten Dokumente sind für die Anwendung dieses Dokuments erforderlich. Bei datierten Verweisungen gilt nur die in Bezug genommene Ausgabe. Bei undatierten Verweisungen gilt die letzte Ausgabe des in Bezug genommenen Dokuments (einschließlich aller Änderungen).

EN 12407, *Prüfverfahren für Naturstein — Petrographische Prüfung*

EN 12670:2001, *Naturstein — Terminologie*

## 3 Bezeichnung von Naturstein

### 3.1 Allgemeines

Die Bezeichnung von Naturstein muss folgende Teile beinhalten:

### 3.2 Name des Natursteins (Handelsname)

Der Name des Natursteins, unter dem er gehandelt wird. Dieser entspricht einem bestimmten Gestein von einem bestimmten Herkunftsort. Geographische Namen, die nicht mit dem tatsächlichen Ursprungsgebiet des Gesteins in Beziehung stehen, und Firmennamen müssen vermieden werden.

**ANMERKUNG** Oft reicht das Ursprungsgebiet eines bestimmten Gesteins nicht über reine Verwaltungsgrenzen hinaus. Ein Handelsname darf die Bezeichnung einer Varietät beinhalten, die eine bestimmte Auswahl innerhalb einer gegebenen Gesteinsart und innerhalb eines gegebenen Ursprungsgebietes kennzeichnet (z. B. die Bank oder Ebene im Steinbruch, oder eine typische Farbe oder ein typisches Merkmal).

### 3.3 Petrographische Familie

Wissenschaftlicher Name von Gesteinsfamilien nach 3.2 von EN 12670:2001. Wenn das Gestein nicht in der Klassifikation nach 3.2 von EN 12670:2001 enthalten ist, muss ein geeigneter wissenschaftlicher Begriff verwendet werden.

### 3.4 Typische Farbe

Farbbereich, den eine Gesteinsvarietät zeigt. Die visuelle Farberscheinung, beobachtet bei schattigem natürlichen Licht an einer oder mehreren trockenen und sauberen Sammelproben. Es ist zu beachten, dass die Oberflächenbeschaffenheit sowie andere Faktoren den visuellen Farbeindruck des Gesteins beeinflussen.

### 3.5 Herkunftsort

Die Ortsangabe des Gebietes oder des Steinbruches muss so genau wie möglich sein, und mindestens die Stadt oder Gemeinde, das Gebiet oder Land, jeweils durch ein Komma getrennt, beinhalten (siehe Anhang A).

## **4 Weitere Informationen**

### **4.1 Allgemeines**

Wenn verfügbar oder zwischen Käufer und Verkäufer vereinbart, dürfen die folgenden Angaben geliefert werden.

### **4.2 Gesteinsbearbeitung**

Für bearbeitete Erzeugnisse ist die Oberflächenbeschaffenheit mit einer passenden Bezeichnung nach EN 12670:2001, 2.3, zu beschreiben.

### **4.3 Natürliche Eigenschaften**

Natürliche Eigenschaften, die das Aussehen des Gesteins beeinflussen können, nach EN 12670:2001, Abschnitt 2, d. h. Adern, Einschlüsse, Knoten, Fremdeinschlüsse, Gefüge, Risse usw.

### **4.4 Petrographischer Name**

Wissenschaftlicher Gesteinsname nach EN 12670:2001, 3.2, bestimmt mit einer petrographischen Untersuchung nach EN 12407.

### **4.5 Geologisches Zeitalter**

Zeitalter des Gesteins nach EN 12670:2001, 3.1. Die Angabe muss wann immer möglich erfolgen. Falls vorhanden, dürfen weitere geologische Angaben gemacht werden.

## Anhang A (informativ)

### Traditionelle Handelsnamen europäischer Natursteine

#### A.1 Allgemeines

Dieser Anhang enthält eine nicht vollständige Liste der meisten europäischen Natursteine und ist ein erster Versuch, die in Europa produzierten Natursteine und ihre petrographische Klassifikation zu erfassen. Er wird bei Folgeausgaben dieser Europäischen Norm überarbeitet.

Die Reihenfolge der Angabe für jede Gesteinsvarietät ist:

- Name oder Namen (Handelsname);
- Petrographische Familie;
- Typische Farbe;
- Herkunftsort.

In einigen Fällen ist die Angabe der petrographischen Familie vorläufig und nach EN 12407 und EN 12670 zu ermitteln. Nichtverfügbare Angaben sind durch einen Bindestrich ersetzt.

#### A.2 Gesteinsliste

Abschnitt	Land	Seite
A.2.1	Österreich	8
A.2.2	Belgien	10
A.2.3	Kroatien (Republik)	12
A.2.4	Tschechische Republik	14
A.2.5	Dänemark	18
A.2.6	Finnland	19
A.2.7	Frankreich	23
A.2.8	Deutschland	34
A.2.9	Griechenland	41
A.2.10	Irland	44
A.2.11	Italien	47
A.2.12	Luxemburg	58
A.2.13	Niederlande	59
A.2.14	Norwegen	60
A.2.15	Portugal	63
A.2.16	Rumänien	70
A.2.17	Slowenien	73
A.2.18	Spanien	74
A.2.19	Schweden	91
A.2.20	Schweiz	95
A.2.21	Vereinigtes Königreich	97

ANMERKUNG Jede Varietät des Gesteins sollte in Klammern aufgeführt werden.
