Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 433:1991 was prepared by Technical Committee ISO/TC 41, *Pulleys and belts (including veebelts)*, Subcommittee SC 3, *Conveyor belts*.

Conveyor belts — Marking

AMENDMENT 1

Page 1, Clause 1

Insert a second paragraph, as follows:

“It is not applicable to light conveyor belts as described in ISO 21183-1, *Light conveyor belts — Part 1: Principal characteristics and applications.*”

Page 2, 5.2.1

Replace the first paragraph with the following:

“The marks shall be approximately 50 mm to 100 mm from the left-hand edge and/or 50 mm to 100 mm from the right-hand edge of the belt, with reference to the part of the mark nearest the edge. The distance between marks should be agreed between the manufacturer and the customer, but marks shall be a maximum of 25 m apart.”

Page 2, 5.2.2

Replace NOTE 1 with the following:

“NOTE 1 In order to avoid moulded irregularities in the load-carrying part of the belts, transverse marks can be vulcanized either on rubber label strips or on the pulley side cover.”

Page 3, Figure 1

Replace the dimension “15 m max.” by “25 m max.”.
