AMENDMENT 1
2016-04-15

**Plastics — Symbols and abbreviated
terms —**

Part 4:
Flame retardants

AMENDMENT 1: Code numbers

Plastiques — Symboles et abréviations —

Partie 4: Ignifuges

AMENDEMENT 1: Numéros de code

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword – Supplementary information](#)

The committee responsible for this document is ISO/TC 61, *Plastics*, Subcommittee SC 1, *Terminology*.

Hexabromocyclododecane (HBCD) is now regulated as persistent organic pollutant (POP); thus, is excluded from codes 14 and 15 and is newly assigned to codes 23 and 24.

Silica is an inorganic compound and not an organic compound. "Silica compounds" is changed to "Silicon compounds".

Plastics — Symbols and abbreviated terms —

Part 4: Flame retardants

AMENDMENT 1: Code numbers

Clause 5, page 2

Add “(excluding hexabromocyclododecane)” after the word “compounds” for code 14 and after the first “compounds” word for code 15, in order to read:

14 aliphatic/alicyclic brominated compounds (excluding hexabromocyclododecane)

15 aliphatic/alicyclic brominated compounds (excluding hexabromocyclododecane) in combination with antimony compounds

Delete “23, 24 not allocated” and add the following:

23 hexabromocyclododecane

24 hexabromocyclododecane with antimony compounds

Clause 5, page 3

Replace “**Silica compounds**” with “**Silicon compounds**”.

In code 75, replace the word “silica” with “silicon” in order to read:

75 inorganic silicon compounds

In code 76, replace the word “silica” with “silicon” and add the word “(silicones)” after the word “compounds” in order to read:

76 organic silicon compounds (silicones)
