## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 2982-1 was prepared by Technical Committee ISO/TC 4, *Rolling bearings*.

This second edition cancels and replaces the first edition (ISO 2982-1:1995), which has been technically revised. In particular, the title has been corrected and approximate values for  $B_2$  are indicated.

ISO 2982 consists of the following parts, under the general title: *Rolling bearings — Accessories*:

- *Part 1: Dimensions for adapter sleeve assemblies and withdrawal sleeves*
- *Part 2: Dimensions for locknuts and locking devices*

.....

# Rolling bearings — Accessories —

## Part 1: Dimensions for adapter sleeve assemblies and withdrawal sleeves

### 1 Scope

This part of ISO 2982 specifies:

- boundary dimensions of adapter sleeves with taper 1:12 and withdrawal sleeves with tapers 1:12 and 1:30 for rolling bearings of a number of dimension series as specified in ISO 15;
- the outside diameter of suitable locknuts;
- distance from bearing small bore face to outer face of locknut;
- distance from bearing small bore face to outer face of bolt head;
- overall length of withdrawal sleeve and bearing ring.

### 2 Normative references

The following documents, in whole or in part, are normatively referenced in this document and are indispensable for its application. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 15, *Rolling bearings — Radial bearings — Boundary dimensions, general plan*

ISO 2982-2, *Rolling bearings — Accessories — Part 2: Dimensions for locknuts and locking devices*

ISO 5593, *Rolling bearings — Vocabulary*

ISO 15241, *Rolling bearings — Symbols for physical quantities*

### 3 Terms and definitions

For the purposes of this document, the terms and definitions given in ISO 5593 and the following apply.

#### 3.1

##### **adapter sleeve assembly**

assembly comprising an adapter sleeve, a locknut, and a locking device

#### 3.2

##### **locking clip**

part in C-shape for securing a locknut

#### 3.3

##### **locking clip assembly**

assembly comprising a locking clip and a bolt

### 4 Symbols

For the purposes of this document, the symbols given in ISO 15241 and the following apply.

The symbols shown in [Figure 1](#) and the values given in [Table 1](#), [Table 2](#), [Table 3](#), [Table 4](#) and [Table 5](#) denote nominal dimensions, unless specified otherwise.

- $B_1$  adapter sleeve length or withdrawal sleeve length
- $B_2$  distance from bearing small bore face to outer face of locknut
- $B_3$  distance from bearing small bore face to outer face of bolt head
- $B_4$  overall length of withdrawal sleeve and bearing ring
- $B_5$  slot width (for lockwasher inner tab or locking clip)
- $B_6$  slot length
- $d$  bearing bore diameter
- $d_1$  bore diameter of sleeve
- $d_2$  outside diameter of locknut
- $G$  designation of screw thread

a) Adapter sleeve with locknut and lockwasher

b) Adapter sleeve with locknut and locking clip assembly

c) Withdrawal sleeve

Figure 1 — Adapter sleeve assemblies and withdrawal sleeve

## 5 Dimensions

### 5.1 General

Dimensions of adapter sleeve assemblies and boundary dimensions of withdrawal sleeves and overall lengths of withdrawal sleeve and bearing ring are given in [Table 1](#), [Table 2](#), [Table 3](#), [Table 4](#) and [Table 5](#).

Thread lengths are not specified but shall be appropriate for securing adapter sleeve with locknut or for withdrawing a rolling bearing on the withdrawal sleeve with locknut. Dimensions of locknuts, lockwashers, and locking clip assemblies for the adapter sleeves are given in ISO 2982-2. The locknuts are also suitable for the dismounting of the withdrawal sleeves.

### 5.2 Adapter sleeve assemblies with taper 1:12

Dimensions of adapter sleeve assemblies with taper 1:12 are given in [Table 1](#), [Table 2](#) and [Table 3](#). Slot lengths,  $B_6$ , are not specified but

- shall be at least long enough that lockwasher or locking clip can be installed when rolling bearing, adapter sleeve, and locknut are secured onto a shaft, and
- shall not be longer than 1,3 times thread lengths.

**Table 1 — Dimensions of adapter sleeve assemblies with taper 1:12 ( $15 \leq d \leq 110$ )**

#### 5.4 Withdrawal sleeves with taper 1:30

Boundary dimensions of withdrawal sleeves with taper 1:30 and overall lengths of withdrawal sleeve and bearing ring are given in [Table 5](#).

**Table 5 — Boundary dimensions of withdrawal sleeves with taper 1:30, and overall lengths of withdrawal sleeve and bearing ring**
