AMENDMENT 1
2011-12-15

**Low-pressure hose assemblies for use
with medical gases**

AMENDMENT 1

*Flexibles de raccordement à basse pression pour utilisation avec les
gaz médicaux*

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 5359:2008 was prepared by Technical Committee ISO/TC 121, *Anaesthetic and respiratory equipment*, Subcommittee SC 1, *Breathing attachments and anaesthetic machines*.

Low-pressure hose assemblies for use with medical gases

AMENDMENT 1

Page 13, Table 1

Change the allocation of connectors B11 and C19 as follows in order to align the allocation of these connectors with the corresponding allocation of NIST connectors, as given in EN 15908:2010.

B11: “Carbon dioxide” instead of “Carbon dioxide/oxygen mixture [CO₂ > 7 % (volume fraction)]”.

C19: “Carbon dioxide/oxygen mixture [CO₂ > 7 % (volume fraction)]” instead of “Carbon dioxide”.
