Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 5457:1999 was prepared by Technical Committee ISO/TC 10, *Technical product documentation*, Subcommittee SC 1, *Basic conventions*.

Technical product documentation — Sizes and layout of drawing sheets

AMENDMENT 1

Page 1, Normative references

Replace the text with the following:

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 216, *Writing paper and certain classes of printed matter — Trimmed sizes — A and B series, and indication of machine direction*

ISO 3098-0, *Technical product documentation — Lettering — Part 0: General requirements*

ISO 7200, *Technical product documentation — Data fields in title blocks and document headers*

ISO 9958-1, *Draughting media for technical drawings — Draughting film with polyester base — Part 1: Requirements and marking*

ISO 9961, *Draughting media for technical drawings — Natural tracing paper*

Page 2, Table 1

In the column headed “Figure”, row “A4”, replace the text with the following:

“1 and 2”

Page 2, Figure 1

Replace the figure title with the following:

Figure 1 — Sizes A4 to A0

Page 3, 4.1

Replace the text with the following:

For the dimensions and layout of title blocks, see ISO 7200. The location of the title block for sizes A0 to A3 is situated in the bottom right hand corner of the drawing space. Only sheets positioned horizontally are permitted for these formats (see Figure 1). For size A4, sheets positioned both horizontally and vertically are permitted; the title block is situated in the bottom part of the drawing space (see Figure 1 and Figure 2). The direction of reading of the drawings is the same as that of the title block.

Page 4, 4.4, third paragraph

Replace the reference “ISO 3098-1” with “ISO 3098-0”.
