Earth-moving machinery — Determination of emission sound pressure level at operator's position — Dynamic test conditions

TECHNICAL CORRIGENDUM 1

Engins de terrassement — Détermination du niveau de pression acoustique d'émission au poste de conduite — Conditions d'essai dynamique

RECTIFICATIF TECHNIQUE 1

Technical Corrigendum 1 to International Standard ISO 6396:2008 was prepared by Technical Committee ISO/TC 127, *Earth-moving machinery*, Subcommittee SC 2, *Safety, ergonomics and general requirements*, in collaboration with ISO/TC 43, *Acoustics*, Subcommittee SC 1, *Noise*.

Page 1, Clause 2

Date the reference to ISO 11201 so that it becomes "ISO 11201:—¹⁾".

Page 4, 8.1

Replace the first paragraph of the subclause with the following, reflecting a revision of accuracy grades as specified in ISO 11201 for the measurement of emission sound pressure levels:

"The time-averaged A-weighted emission sound pressure level at the operator's position shall be determined in accordance with ISO 11201:—, accuracy grade 2."

¹⁾ To be published. (Revision of ISO 11201:1995)"
