## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 11111-3:2005 was prepared by Technical Committee ISO/TC 72, *Textile machinery and accessories*, Subcommittee SC 8, *Safety requirements for textile machinery*.

To reduce the need to move the needle board with the door open, the machine shall be designed such that the needle board comes automatically to a standstill in an open position, or else the needle board shall be moved into an open position, in preparation for access, by a separate control while the door is closed. When the door is open, the needle board shall be completely movable from the holding down board in the direction of reciprocation only by means of a handwheel or similar manual device.

*Page 4, Clause 6*

Replace the second paragraph with the following:

Noise emission values shall be determined for all machines covered by this part of ISO 11111 in accordance with ISO 9902-1 and ISO 9902-2, ISO 9902-3, ISO 9902-6 or ISO 9902-7, whichever is relevant, whether or not noise is a significant hazard.

*Page 4, Clause 7*

Replace the second paragraph with the following:
