Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 11979-4:2008 was prepared by Technical Committee ISO/TC 172, *Optics and photonics*, Subcommittee SC 7, *Ophthalmic optics and instruments*.

Ophthalmic implants — Intraocular lenses —

Part 4: Labelling and information

AMENDMENT 1

Page 1, Normative references

Delete the following:

ISO 11979-9:2006, *Ophthalmic implants — Intraocular lenses — Part 9: Multifocal intraocular lenses*

Page 3, Clause 5

In Table 2, add table rows to provide the new items 21 and 22:

Item	Information	Primary package and/or wrapping(s)	Storage container	Comments
21	For toric intraocular lenses only: the spherical equivalent power (SE) and the absolute cylinder power (CYL).	x	x	Additionally sphere, cylinder and axis (in + or – cylinder notation) may be given.
22	For toric intraocular lenses only: the orientation of the meridian of lowest positive power or most negative power depicted in the lens drawing (see item 13).		x	

Page 3, Clause 6

Delete list item n).

In consequence, renumber list item o) as list item n) and list item p) as list item o).

Page 4

Add the following clause:

9 Additional information

Where UV blocking is stated, it shall be accompanied by the 10 % cut-off wavelength in nanometres.
