Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 12402-4 was prepared by Technical Committee ISO/TC 188, *Small craft*, in collaboration with the European Committee for Standardization (CEN) Technical Committee CEN/TC 162, *Protective clothing including hand and arm protection and lifejackets*, in accordance with the Agreement on technical cooperation between ISO and CEN (Vienna Agreement).

Part 4: Lifejackets, performance level 100 — Safety requirements

AMENDMENT 1

Page 1, Clause 2

Replace “ISO 12402-7:—¹)” with “ISO 12402-7:2006” and delete footnote 1) at the bottom of the page.

Page 4, 5.1

In the first paragraph, delete the second sentence:

“The temperature cycling test and the rotating shock bin test shall be considered as reliability against wear and tear and shall be conducted prior to the appropriate physical properties test.”

In the third paragraph, last sentence, replace “ISO 12402-7:—³)” with “ISO 12402-7:2006” and delete footnote 3) at the bottom of the page.

Page 6, 5.3.2.2

Add the following sentence at the end of 5.3.2.2:

“The time from immersion until initiation of inflation in automatic mode shall not exceed 5 s.”

Page 6, 5.3.3

Replace subclauses 5.3.3.1 and 5.3.3.2 with the following:

5.3.3.1 Any inherently buoyant material used to provide buoyancy shall be capable of withstanding compression and movement in normal wear without sustaining permanent loss of buoyancy.”

5.3.3.2 Any inherently buoyant material shall prove to have properties in accordance with ISO 12402-7:2006, 4.8.”

Delete footnote 4) from the bottom of the page.

Page 7, 5.4.1

In the first paragraph, replace “ISO 12402-7:—⁵)”, 4.3.3” with “ISO 12402-7:2006, 4.3.3” and delete footnote 5) from the bottom of the page.

Page 7, 5.5

Add the following sentence at the end of 5.5:

“The load shall be maintained for 30 min, if not specified otherwise.”

Page 9, 5.6.3.1

Replace the first sentence of the first paragraph with the following:

“A lifejacket shall provide lateral and occipital support of the user's head so that the mouth of a relaxed individual is held clear of a still water surface, with the trunk of the body inclined backwards from the vertical at an angle of at least 30° and not more than 90° and an average face plane angle of at least 20° from the horizontal and not more than 90°, when tested in accordance with ISO 12402-9:2006, 5.6.”

Page 10, 6.2

In the third paragraph (i.e. paragraph after list item v) and NOTE), replace the second sentence with the following:

“The label shall not shrink more than 10 % after washing.”
