Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

Amendment 1 to ISO 16039:2004 was prepared by Technical Committee ISO/TC 195, *Building construction machinery and equipment*.

Road construction and maintenance equipment — Slipform pavers — Definitions and commercial specifications

AMENDMENT 1

Cover page, French title

Replace the French version of the title of ISO 16039:2004 by

Matériels pour la construction et l'entretien des routes — Machines à coffrage glissant — Définitions et spécifications commerciales

thereby substituting the term “*Machines à coffrage glissant*” for “*Machines pour le pavage*”.

Page 4, 4.4.1 Basic equipment

In the third list item, replace “width” by “width and depth”.

Page 5, 6.3.2, Specifications

In the ninth list item, replace “crawler plates” by “track pads”.

Page 7, 6.8, Additional features of a slipform paver

In the ninth list item, replace “rubber” by “non-metallic (e.g. rubber, polyurethane) or steel”.

Page 8, 6.9, Additional equipment

In the fourth list item, add “or plough” immediately after “auger”.

Page 10, Figure A.2

In item no. 14 in the legend to Figure A.2, delete the abbreviation “HF” so that the key item reads simply “vibrators”.
